1973	2,567	9,345	36	2,299	246

[1] Data represent number of names listed in July issue of *Dun & Bradstreet Reference Book*. See table 814 for class of industries covered.

[2] Includes concerns discontinuing following assignment, voluntary or involuntary petition in bankruptcy, attachment, execution, foreclosure, etc.; voluntary withdrawals from business with known loss to creditors; also enterprises involved in court action, such as receivership and reorganization or arrangement which may or may not lead to discontinuance; and businesses making voluntary compromise with creditors out of court.

[3] Liabilities exclude long-term publicly held obligations; offsetting assets are not taken into account.

Section 18

Communications

This section presents statistics on usage, finances, and operations of the various communications media: Postal service, telephone, telegraph, radio, television, newspapers, and books. Data on the postal service are included in the *Annual Report of the Postmaster General.* Statistics on revenues, volume of mail, and distribution of expenditures are presented in the U.S. Postal Service's annual *Revenue and Cost Analysis Report.* Principal sources of wire, radio, and television data are the Federal Communications Commission's *Annual Report,* its annual *Statistics of Communications Common Carriers,* and its annual releases of financial data reported by radio and television stations and networks. Statistics on number and circulation of newspapers and periodicals and on sales of books and pamphlets are issued by the Bureau of the Census in reports of the Census of Manufactures. Annual data on number and circulation of daily and Sunday newspapers appear in *International Yearbook Number,* issued by Editor and Publisher, New York. Monthly data on new books and new editions of books are presented by R. R. Bowker Company, New York, in *Publishers' Weekly.*

Postal Service.—"Revenue and cost analysis" is the term used by the Postal Service to describe its system of attributing revenues and costs to classes of mail and service. This system draws primarily upon probability sampling techniques to develop estimates of revenues, volumes, and weights as well as costs by class of mail and special service. The costs attributed to classes of mail and special services are primarily incremental costs which vary in response to changes in volume; they account for roughly one-half of the total costs of the Postal Service. Postal rates are set sufficiently above these incremental cost levels to recover all costs of the Postal Service.

Telephone and telegraph systems.—Statistical coverage of wire and radio communications has been concentrated in the Federal Communications Commission since its establishment in 1934. According to the Communications Act of 1934, as amended, the Commission has jurisdiction over carriers engaged in interstate or foreign communications service by means of wire or radio. The Commission requires all except the smallest of these carriers to file annual and monthly reports and requires the companies controlling any but the smallest to file annual reports. Full jurisdiction applies to practically all domestic and overseas telegraph carriers and to the Communications Satellite Corporation but not to a large number of telephone carriers which are engaged in interstate or foreign service only by connection with the facilities of another unaffiliated carrier. However, the gross operating revenues of the telephone carriers reporting annually to the Commission are estimated to cover over 90 percent of the revenues of all telephone carriers in the United States.

Broadcast.—The number of broadcast stations authorized refers to the number licensed or holding construction permits. Total broadcast revenues are defined as total sales of time, talent, programs, and services of all networks and stations, less commissions to agencies. Reports filed with the Federal Communications Commission by broadcast stations and networks cover substantially all units operating in the United States and its outlying areas.

Nonbroadcast radio.—Most of the nonbroadcast radio services are grouped together as the safety and special radio services, which constitute the greatest number of radio stations licensed by the Federal Communications Commission. Utilization of these services by individuals, industry, commerce, and State and local government covers broad fields of operations in connection with protection of life and property, industrial and agricultural production, transportation, disaster, business and personal communications, and civil defense.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

NA Not available.

[1] After allowance for reimbursements, embossed envelope purchases, indemnity claims, and miscellaneous revenue and expenditure offsets. Revenues, expenditures, and deficits through 1950 include payments and receipts in a year applicable to prior years; beginning 1955, expenditures are shown in year in which obligation was incurred, and revenues in year which gave rise to the earnings, whether collected or accrued. During fiscal 1954, the Postal Service began receiving reimbursement for penalty and franked mail, and discontinued payment of subsidies to airlines. Revenues for 1960 include $37.4 million reimbursement from the Treasury General Fund for statutory public services. These and other changes affect comparability of figures.

[2] Includes capital expenditures for plant and equipment and cost of materials and supplies, but no provision for depreciation. Also includes costs of certain services rendered to other agencies without reimbursement but excludes costs of certain services rendered to the Postal Service by other agencies. Beginning 1955, represents obligations incurred. Beginning 1965, represents accrued expense including depreciation on fixed assets, reimbursable work for others, and expenses paid by certain other agencies without reimbursement by the Postal Service.

[3] Operating revenue only; based on Bureau of the Census estimated total population as of Jan. 1, including Armed Forces abroad. [4] Service not inaugurated. [5] Includes postal notes issued under act of Congress.

No. 818. Postal Service Revenues, by Source: 1950 to 1973

[**In millions of dollars.** For years ending June 30. Includes Puerto Rico and all outlying areas except Canal Zone. See text, p. 495]

[1] Net revenue after refunds of postage. Beginning 1965, includes operating reimbursements. [2] The U.S. Postal Service was established July 1, 1971. Revenues prior to that date are those of the Post Office Department. Revenues for 1969-1971 have been restated to be consistent with subsequent years. [3] Beginning 1955, includes controlled circulation publications. [4] Includes $37.4 million appropriated to postal revenues for public services as provided by the Postal Policy Act of 1958. [5] Discontinued April 1966.

[7] Items otherwise qualified as 1st-class or airmail that exceed 12 ounces and 8 ounces, respectively. [8] Includes publishers' type mail paid at other than bulk rates. Publishers' mail includes printed publications periodically issued and mailed at a known post office to paid subscribers. These include regular rate newspapers and magazines, and classroom and nonprofit rate publications. Outside-the-county publications are those mailed to destinations outside the county of publication.
[9] Publications of at least 24 pages and containing at least 25 percent nonadvertising content issued quarterly or more frequently for mainly free distribution. Includes certain trade publications and "shopper" guides.
[10] Items less than 16 ounces in weight not mailed at either 1st- or 2d-class rates. [11] Items not mailed at 1st 2d-, or 3d-class rates, except government and international mail. May include parcel post, catalogs weighing 16 ounces or more, books, films, and records. [12] Penalty and franked mail. [13] Mail from U.S. to foreign countries paid at international mail rates. [14] Includes free mail for blind and handicapped, nonpostal services for other agencies and, for revenues and reimbursements, unassignable revenues.

– Represents zero. NA Not available.

[1] Includes 456,600 service telephones (non-company telephones for which switching service is provided) in 1965, 463,200 in 1970, and 454,500 in 1972.

[2] Households with service are sum of residence main, apartment house private branch exchange and residence service main telephones, and other residence private branch exchange systems. There tends to be a slight overstatement of the proportion of households with telephone service.

No. 848. New Books and New Editions Published, by Subject: 1950 to 1973

[Comprises new books (those published for the first time) and new editions (those published with changes in text or format). Excludes State and Federal publications; subscription books, except encyclopedias; dissertations; second, third, or fourth printings or impressions; periodicals and quarterlies; and pamphlets of under 49 pages. Beginning 1965, data not strictly comparable with earlier years because of internal shifts in classifications. See also *Historical Statistics, Colonial Times to 1957*, series R 165–167]

X Not applicable.

[1] Includes receipts not specified by kind, as follows (in million of dollars): Textbooks, 1963, 3.1; 1967, 14.7; and 1972, 15.7; general reference, 1972, 3.3; technical, scientific, and professional, 1963, 6.2; 1967, 11.6; and 1972, 10.0; religious, 1963, 2.6; 1967, 12.9; and 1972, 10.1; general, 1963, 7.3; 1967, 14.3; and 1972, withheld; other, excluding pamphlets, 1972, 24.1.

[2] Includes private business and secretarial school, post high vocational schools, and institutes and training courses of college grade. [3] Objective tests, manuals, etc.; includes answer sheets.

[4] Represents books sold direct to the consumer through agents or distributors, usually on installment plan of payment. Includes multivolume encyclopedias, children's literature, biblical sets, etc. Copies sold represent number of volumes rather than sets. [5] Includes nursing and dental subjects.

[6] Includes missals and prayer books.

[7] For adults and juveniles.

[8] Digest size 4¼"x6½"; distributed 75 percent or more through magazine wholesalers in 1963, and 50 percent or more in 1967.

[9] Sold primarily through booksellers or book dealers (retail and wholesale) at trade discounts. Juvenile books represent hardbound and paperbound books, excluding toy books.

Section 19
Energy

This section presents statistics on power and energy. The principal sources are the Federal Power Commission, the Department of the Interior, the Edison Electric Institute, New York and the American Gas Association, Arlington, Va.

The Federal Power Commission, in its *Annual Report* and in periodic publications and surveys, issues information on the electric power and natural gas industries, and on water power. Among annual reports are *Statistics of Privately Owned Electric Utilities in the United States; Statistics of Publicly Owned Electric Utilities in the United States; Sales of Firm Electric Power for Resale; Steam-Electric Plant Construction Cost and Annual Production Expenses; Hydroelectric Plant Construction Cost and Annual Production Expenses; Statistics for Interstate Natural Gas Pipeline Companies; Sales by Producers of Natural Gas to Natural Gas Pipeline Companies;* and *World Power Data.* Monthly reports include *Electric Power Statistics* and *Statistics of Major Interstate Natural Gas Pipeline Companies.* Principal surveys are the *National Power Survey, 1964,* and *1970.* These various publications contain national and State data on production of electricity, capacity of generating plants, fuels used in energy production, energy sales and consumption, hydroelectric power, construction costs and production expenses of power plants, and depreciation practices.

The Commission also issues data on electric utility charges in its annual *All-Electric Homes* and *Typical Electric Bills;* projections for the future in its periodic *Electric Power Requirements and Supply of the United States, by Regions, Present and Future;* and maps showing principal natural gas pipelines and electric facilities.

The *United States Energy Through the Year 2000* prepared by the Department of the Interior presents indicators of current and projected energy consumption; the Bureau of Mine's *Minerals Yearbook* contains data on coal, oil, and natural gas production and utilization.

The Edison Electric Institute's Monthly Bulletin and annual *Statistical Year Book of the Electric Utility Industry for the Year* contain data on the distribution of electric energy by public utilities; information on the electric power supply, expansion of electric generating facilities, and the manufacture of heavy electric power equipment in the annual *Year End Summary of the Electric Power Situation in the United States.*

Energy Facts, prepared for the Subcommittee on Energy of the House Committee on Science and Astronautics by the Library of Congress, has a comprehensive selection of U.S. and foreign energy statistics obtained from primary sources.

The *Annual Statistical Review* of the American Petroleum Institute contains statistics on supply and demand, production, imports, stocks, and sales of crude petroleum, petroleum products, and natural gas.

The American Gas Association, in its monthly and quarterly bulletins and its yearbook, *Gas Facts,* presents data on gas utilities, including sales, revenues, customers, prices, and other financial and operating statistics. Other sources include the Atomic Energy Commission's *Annual Report to Congress,* containing data on atomic energy, equipment, finances, and licenses, and the Rural Electrification Administration's *Annual Statistical Report—Rural Electric Borrowers.*

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 851. Total Horsepower of All Prime Movers: 1940 to 1973

[**In millions.** As of January, except as noted. Prior to 1960, excludes Alaska and Hawaii, except as noted. Prime movers are mechanical engines and turbines, and work animals, which originally convert fuels or force (as wind or falling water) into work and power. Electric motors, which obtain their power from prime movers, are excluded to avoid duplication. See also *Historical Statistics, Colonial Times to 1957*, series S 1-14]

ITEM	1940	1950	1955	1960	1965	1970	1971	1972	1973 (prel.)

Aircraft [4] [7]	[5] 7	[5] 22	[5] 26	37	55	183	179	181	182

[1] Includes passenger cars, trucks, buses, and motorcycles. [2] As of July 1. [3] Beginning 1965, data are projections. [4] Beginning 1965, not strictly comparable with earlier years. [5] Includes Alaska and Hawaii. [6] For 1973 includes estimates of about 1.4 million hp. in work animals and 15,000 in windmills. [7] Includes private planes and commercial airlines.

No. 852. Mineral Fuel Resources and Electricity—Production and Consumption: 1940 to 1973

[**In trillions of British thermal units, except percent.** Prior to 1960, excludes Alaska and Hawaii, except data for bituminous coal include Alaska for all years. Unit heat values used are, B.t.u. per pound: Anthracite, 12,700; bituminous coal and lignite through 1954, 13,100; bituminous coal and lignite production: 1960, 12,830; 1965, 12,710; 1966, 12,650; 1967, 12,580; 1968, 12,530; 1969, 12,450; 1970, 12,290; 1971, 12,180; 1972 and 1973, 12,025; bituminous coal and lignite consumption: 1960, 12,740; 1965, 12,610; 1966, 12,550; 1967, 12,470; 1968, 430; 1969, 12,330; 1970, 12,110; 1971, 12,010; 1972 and 1973, 11,875. Crude petroleum, in B.t.u. per barrel: 5,800,000 through 1954; 1960, 5,695,000; 1965, 5,592,300; 1966, 5,257,440; 1967, 5,628,540; 1968, 5,585,010; 1969, 5,601,070; 1970, 5,620,900; 1971, 5,623,200; 1972, 5,598,000; 1973, 5,587,200. Natural gas: total production multiplied by 1,075 B.t.u. minus repressuring vent and waste gas multiplied by 1,035 through 1964; thereafter, dry natural gas production which excludes gas used for repressuring, vented, or flared multiplied by 1,032 B.t.u. per cubic foot for 1965 through 1968, and 1,031 in 1969-73, to which is added the computed energy equivalent of the heat value of natural gas liquids production for each year. For electricity series, hydropower and nuclear power converted to theoretical energy inputs calculated from national average heat rates for fossilfueled steam-electric plants using 10,760 B.t.u. per net kilowatt-hour in 1960; 10,453 in 1965; 10,415 in 1966; 10,432 in 1967; 10,398 in 1968; 10,447 in 1969; 10,494 in 1970. For 1971 to 1973, energy inputs for hydropower converted at an average heat rate of 10,379 B.t.u. per net kilowatt-hour generated; for nuclear power at an average heat rate of 10,660 B.t.u. per net kilowatt-hour based on information from the Atomic Energy Commission. See also *Historical Statistics, Colonial Times to 1957*, series M 71-87]

NA Not available. [1] Includes commingled condensate. Beginning 1950, consumption includes petroleum products (net imports).

[2] Marketed production; represents natural gas, wet (unprocessed) and includes amount stored and lost in transmission. Consumption includes dry and liquid gas. Beginning 1965, on pressure base of 14.73 pounds per square inch absolute; formerly, on base of 14.65. [3] From hydropower and nuclear power.

– Represents zero. NA Not available. [1] Preliminary, except loans approved. [2] Net; i.e., excludes loans rescinded. [3] Organizations, mainly cooperatives, to which loans for extending central station electric service in rural areas are made. [4] Includes data at time of repayment of loan for borrowers whose loans have been repaid in full. As of Dec. 31, 1973, there were 66 such borrowers, with 25,498 miles energized and 144,266 consumers served. [5] Rural electric distribution, generation, and transmission systems operated by REA borrowers. [6] Pole miles of electric distribution and transmission line in service. [7] Excludes energy sales and revenues of power sold by one REA borrower to another. [8] Includes rural-nonfarm and farm consumers.

No. 874. Gas Utility Industry, Summary, 1950 to 1973, and Projections, 1975

[Excludes Hawaii through 1955 and Alaska through 1960. Covers natural, manufactured, mixed, and liquid petroleum gas. Based on questionnaire mailed to all privately owned gas utilities and municipally owned gas departments in the United States, except those with annual revenues less than $25,000, which in the aggregate account for only a negligible portion of the industry]

Section 20

Science

This section presents statistics relating to various aspects of scientific and technical activity. Major topics are research and development, training and employment of scientists and engineers, space vehicles, and patents and trademarks. Principal sources of these data are the National Science Foundation and the National Aeronautics and Space Administration.

The National Science Foundation gathers data chiefly through recurring statistical surveys. Some current Foundation publications containing data on funds for research and development and on scientific and engineering personnel include the occasional bulletin series, *Reviews of Data on Science Resources;* annual and biennial reports such as *Federal Funds for Research, Development, and Other Scientific Activities; Research and Development in Industry; National Patterns of R & D Resources; Resources for Scientific Activities at Universities and Colleges; An Analysis of Federal R & D Funding by Function; Scientists, Engineers, and Physicians From Abroad; Federal Scientific, Technical, and Health Personnel; Graduate Science Education; Student Support and Postdoctorates; Federal Support to Universities, Colleges, and Selected Nonprofit Institutions; Scientific Activities of Independent Nonprofit Institutions; Research and Development in State Government Agencies;* and policy reports relating to national allocation of manpower and funds to science and technology. Statistical surveys in these areas pose particularly difficult problems of concept and definition and the data should, therefore, be regarded as broad estimates rather than precise quantitative statements. Detailed discussions of the scope and limitations of the data appear in the source publications.

The National Aeronautics and Space Administration does not publish any statistical reports as such. NASA's *Semiannual Report* contains current data on finances and its biweekly *Satellite Situation Report* presents information on artificial satellites, including both objects in orbit and decayed objects.

Other sources of statistics on scientific and technical activities include *The Budget of the United States Government,* which contains summary financial data on all Federal research and development programs and the *Annual Report of the Commissioner of Patents,* issued by the Department of Commerce's Patent Office and presenting data on patent applications and issuances and on trademark registrations and renewals.

Research and development.—The National Science Foundation defines research as a "systematic and intensive study directed toward a fuller knowledge of the subject studied" and development as "the systematic use of scientific knowledge directed toward the production of useful materials, devices, systems, methods, or processes." The data on funds are presented within the framework of a national economic structure composed of four sectors: (*1*) The *government sector,* made up primarily of Federal executive agencies; (*2*) the *industry sector,* consisting of manufacturing and nonmanufacturing firms and the Federally Funded Research and Development Centers they administer; (*3*) the *colleges and universities sector,* composed of colleges, universities, and their affiliated institutions, agricultural experiment stations and associated schools of agriculture, and Federally Funded Research and Development Centers administered by educational institutions; and (*4*) the *other nonprofit institutions sector,* consisting of such organizations as private philanthropic foundations, nonprofit research insti-

tutes, voluntary health agencies, and Federally Funded Research and Development Centers administered by nonprofit organizations. The federally funded centers are research and development organizations which are exclusively or substantially financed by the Federal government and which, in most instances, were originally established to meet a particular research and development need of the Government. They are administered on a contractual basis, by companies, educational institutions, or other nonprofit organizations. The research and development funds reported consist of current operating costs, including those for planning and administration, except as otherwise noted. They exclude funds for routine testing, mapping and surveying, collection of general-purpose data, dissemination of scientific information, and training of scientific manpower.

Scientists, engineers, and technicians.—Scientists and engineers are defined as persons engaged in scientific and engineering work at a level requiring a knowledge of sciences equivalent at least to that acquired through completion of a 4-year college course. They are generally classified according to the fields of their employment and not according to the discipline in which they received their major training. Technicians are defined as persons engaged in technical work at a level requiring knowledge acquired through a technical institute, junior college, or other type of training less extensive than 4-year college training. Craftsmen and skilled workers are excluded.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 880. Research and Development—Defense, Space, and Other Outlays: 1955 to 1974

[Includes basic research, applied research, and development. Defense related outlays comprise all research and development spending by Dept. of Defense including space activities, and a portion of Atomic Energy Commission funds. Space related outlays are those of the National Aeronautics and Space Administration; they exclude space activities of other Federal agencies, estimated at less than 5 percent of all space research and development spending]

YEAR	RESEARCH AND DEVELOPMENT OUTLAYS		AS PERCENT OF TOTAL RESEARCH AND DEVELOPMENT					
			Defense-space related			Other outlays

NA Not available. [1] H=height; D=diameter. [2] A revolution is the distance a spacecraft must travel to return to a specified line of earth longitude. [3] Vehicle lift-off weight, 260,000 lb.; dimensions, 93H-16D. [4] Dimensions and weight cover Apollo spacecraft command service and lunar modules including escape tower. [5] Recovery weight (in lb.): 2,400, 2,480, 2,440, and 2,460, respectively. [6] Vehicle lift-off weight, 340,000 lb.; dimensions, 109H-10D; payload recovery weight, 4,700 lb. [7] Vehicle lift-off weight, 6,500,000 lb.; maximum dimensions, 363H-33D; payload recovery weight, 11,700 lb. [8] 2 earth and 10 lunar orbits, 70 statute miles above the moon. [9] 2 earth orbits plus 30.8 lunar orbits by the command and lunar excursion modules; time in lunar orbit, 61 hours, 41 minutes. [10] Two earth revolutions and 30 lunar revolutions at 70 miles; first manned lunar landing; 47.6 lb. of rocks returned; astronauts on lunar surface 21 hrs. 36 min. [11] Two earth revolutions and 44.5 lunar revolutions at 70 miles; second manned lunar landing; about 75 lb. of rocks returned; astronauts on surface 31.5 hours. [12] Two earth orbits; spacecraft made one pass around moon and returned to earth. [13] Two earth revolutions and 34 moon revolutions; 33½ hours on surface of moon. [14] Two earth orbits and 74 lunar revolutions; 66 hours and 55 minutes on lunar surface. [15] Two earth revolutions and 65 lunar revolutions; astronauts on surface for 71 hours and 12 minutes. [16] Two and one-third earth revolutions and 75 moon revolutions; astronauts on surface for 75 hours. [17] All Skylab crews docked the Apollo spacecraft with the 187,000 lb. space station in Earth orbit. [18] Cosmonaut killed when spacecraft crashed when landing. [19] Cosmonauts killed during Soyuz XI reentry.

Section 21

Transportation—Land

This section presents statistics relating to the mileage, control, and financing of public roads and to the transportation of persons and goods by land. The modes of transport included are passenger car, truck, railroad, bus and streetcar, and pipeline.

The principal compiler of data on public roads and on ownership and operation of motor vehicles is the Department of Transportation's Federal Highway Administration. The annual *Highway Statistics* and the historical *Highway Statistics, Summary to 1965*, are publications of the Federal Highway Administration; *Accidents of Large Motor Carriers of Property* and *Accidents of Class I Motor Carriers of Passengers*, which present data on accidents involving intercity trucks and buses, respectively, are annual publications of the Bureau of Motor Carrier Safety. The department's Federal Railroad Administration presents data on accidents involving railroads in its annual *Accident Bulletin*.

Another major source of data on land transport is the Interstate Commerce Commission. Among its publications are the monthly *Transport Economics* and the *Annual Report*, containing operating data on all types of domestic transport, and the annual *Transport Statistics in the United States*, which is issued in separate parts. Part 1 is devoted to railroads, part 6 to oil pipelines, and part 7 to motor carriers. *Statistics of Railways in the United States*, published annually from 1887 through 1953, is a source of historical data.

Various censuses conducted by the Bureau of the Census also provide data relating to transportation. Data from the 1963, 1967, and 1972 censuses of transportation are presented in *Commodity Transportation Survey* (1972 report in process), *National Travel Survey*, and *Truck Inventory and Use Survey*. The *Annual Survey of Manufactures* and reports of the Census of Manufactures and the Census of Business contain statistics on the motor-vehicle and equipment industry and on retail, wholesale, and services aspects of this industry. Additional data from those reports are included in sections 28 and 29. Data on persons commuting to work are contained in the Census of Population subject report *Journey to Work*.

Nongovernmental data can be found in the weekly and annual *Cars of Revenue Freight Loaded* and the annual *Yearbook of Railroad Facts*, both published by the Association of American Railroads, Washington, D.C.; *Bus Facts*, issued annually by the National Association of Motor Bus Owners, Washington, D.C.; the *Transit Fact Book*, containing street railway and motorbus statistics, published annually by the American Transit Association, Washington, D.C.; and *Transportation Facts and Trends*, issued by the Transportation Association of America, Washington, D.C. Useful annual handbooks in the field of motor-vehicle transport are *Automobile Facts and Figures* and *Motor Truck Facts*, both issued by the Motor Vehicle Manufacturers Association of the U.S., Detroit; *American Trucking Trends*, issued by the American Trucking Association, Washington, D.C. and *Accident Facts*, issued by the National Safety Council, Chicago.

Highway systems.—The Federal-Aid Highway Act of 1916 provides for the sharing of highway construction costs between the States and the Federal Government with the initiative retained by each State for choosing projects and carrying them out. The planning and development of Federal-aid systems began in 1921. Federal funds share with State funds in costs of engineering, construction, and right-of-way acquisition on the designated systems while other charges, such as maintenance and policing, are borne entirely by the States and local agencies.

The Federal-aid primary system connects all of the principal cities, county seats, ports, manufacturing areas, and other traffic generating areas. In general, these are the same as the State trunklines. The Federal-aid secondary system consists of important feeder roads linking the farms, factories, distribution outlets, and smaller communities with the primary system.

Motor carriers.—Prior to 1950, class I for-hire motor carriers were classified by the Interstate Commerce Commission as those with $100,000 or more of gross annual operating revenue. For 1950–1958, class I carriers classified as having gross operating revenue of $200,000 for 3-year period. Beginning 1969, class I carriers classified as having gross operating revenue of $1,000,000 for 3-year period.

Railroads.—The total railroad mileage of the United States comprises companies reporting to the Interstate Commerce Commission, grouped as follows: (1) Regular line-haul (intercity) railroads (and their nonoperating subsidiaries); (2) switching and terminal railroads; (3) private railroads prior to 1964 (identified by the Commission as "circular" because they reported on brief circulars); and (4) unofficial railroads, so designated when their reports are received too late for tabulation. For the most part, circular, unofficial, and switching and terminal railroads, are not included in the statistics.

Nonoperating subsidiaries comprise proprietary companies, which are covered by the reports of operating carriers, and lessor companies, which have no traffic and whose reports appear only in statistics of capitalization, dividends, and investment.

Operating railroads are classified on the basis of operating revenues. Prior to 1956, the classification was as follows: Class I, those having more than $1,000,000 gross annual operating revenue; class II, from $100,000 to $1,000,000; and class III, less than $100,000. From 1956 to 1964, the following classification was in effect: Class I, $3,000,000 or more; and class II, under $3,000,000. Effective January 1965, the classification was changed to the following: Class I, $5,000,000 or more; and class II, under $5,000,000.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 910. Operating Revenues, by Type of Transport: 1940 to 1973

[Excludes Alaska and Hawaii, except as noted]

No. 911. Volume of Domestic Intercity Freight Traffic, by Type of Transport: 1940 to 1972

In billions of ton-miles, except percent. Motor vehicles and airways, prior to 1959, and other types of transportation, prior to 1960, exclude Alaska and Hawaii, except as noted. A ton-mile is the movement of 1 ton (2,000 pounds) of freight for the distance of 1 mile. Comprises public and private traffic, both revenue and nonrevenue. See also *Historical Statistics, Colonial Times to 1957*, series Q 1–11]

No. 927. Motor-Vehicle Travel, by Type of Vehicle: 1940 to 1972

[**In billions of vehicle-miles, except averages.** Prior to 1960, excludes Alaska and Hawaii. Estimates based on automatic traffic recorder data. Urban travel includes all travel in municipalities and most travel in urbanized areas. All other travel is classed as rural. See also *Historical Statistics, Colonial Times to 1957*, series Q 321-327]

– Represents zero. [1] Beginning 1965, excludes tactical vehicles. [2] A substantial part of the trucks and buses reported comprises chassis without body; hence, excludes the value of bodies for these chassis. [3] Beginning 1940, includes value of standard equipment. [4] Averages do not indicate price changes since total values may reflect changes in number of makes, models, and/or body types from year to year. [5] Includes publicly owned vehicles. Excludes vehicles owned by military services. [6] Prior to 1930, buses included with passenger cars. [7] Total includes, components exclude, Hawaii. [8] Estimate.

No. 932. Automobile Ownership, Age, and Financing: 1950 to 1971

[Excludes Alaska and Hawaii. For definition of family unit, see headnote, table 648]

Item	1950	1955	1960	1965	1968	1969	1970	1971
Total number of family units in U.S.[1]—millions	45.2	49.1	53.4	58.4	61.2	62.1	63.7	65.1
Family units owning automobiles—percent	59	70	77	79	79	79	82	83
Owning 1 automobile—percent	52	60	62	55	53	52	54	55
Owning 2 or more automobiles—percent	7	10	15	24	26	27	28	28
Automobiles owned, by age: [2]								
Less than 2 years old—percent	17	12	14	16	14	15	16	11
2 and 3 years old—percent	19	22	20	21	24	22	21	25
4-7 years old—percent	6	43	41	33	36	41	42	40
8 years old and over—percent	58	23	25	30	26	22	21	24
Total automobiles purchased [3]—millions		13.6	14.1	18.3	19.2	20.5	19.8	18.3
New cars—millions		4.4	5.2	7.2	6.9	7.5	8.3	5.9
Average price paid—dollars	(NA)	2,730	3,140	3,140	3,290	3,510	3,690	[4] 3,690
Used cars—millions		9.2	9.1	11.1	12.3	13.0	11.5	12.4
Average price paid, gross—dollars		780	980	920	1,050	1,000	1,170	[4] 1,273
Method of financing purchases:								
All passenger cars [5]—percent	100	100	100	100	100	100	100	100
Full cash (including trade-in allowance)—percent	47	38	38	48	42	47	47	50
Installment credit and other borrowing—percent	52	60	62	52	58	53	53	50
New passenger-car buyers [5]—percent	100	100	100	100	100	100	100	100
Full cash (including trade-in allowance)—percent	54	39	33	40	31	34	34	43
Installment credit and other borrowing—percent	46	60	67	60	69	66	66	57
Used passenger cars [5]—percent	100	100	100	100	100	100	100	100
Full cash (including trade-in allowance)—percent	41	37	41	53	50	51	52	50
Installment credit and other borrowing—percent	57	60	59	47	50	49	48	50

NA Not available. [1] At time of survey, early in year indicated.
[2] Age is determined by subtracting model year from year of survey. [3] Covers family units buying cars during preceding calendar year and still owning them at time of survey (January–February of year indicated).
[4] Data may be unreliable due to an unusually small sample.
[5] Refers to purchases during preceding year. Includes cars received as gifts, whether cash or credit purchased. Buyers for whom method of financing was not ascertained are excluded from the detail on purchases.

No. 935. Estimated Cost of Operating an Automobile: 1960, 1970, and 1974

[1974 estimates based on a 4-door sedan, costing $4,251, with an assumed life-span of 10 years, 100,000 miles. Similar specifications used in 1960 and 1970]

ITEM	10 YEAR TOTAL COSTS			CENTS PER MILE COST, 1974 (January)					
	1960 (Oct.)	1970 (Jan.)	1974 (Jan.)	10-year average	1st year (14,500 miles)	3d year (11,500 miles)	5th year (9,900 miles)	7th year (9,500 miles)	10th year (5,700 miles)
Total	$9,761	$11,890	$15,892	15.89	16.74	15.91	15.08	17.41	15.79
Costs excluding taxes	8,595	10,537	14,383	14.38	14.34	14.62	13.73	16.04	14.21
Depreciation	2,542	3,185	4,201	4.20	7.21	4.78	2.97	2.65	4.31
Repairs and maintenance [1]	1,722	1,521	2,940	2.94	.85	2.90	3.30	6.00	.62
Replacement tires and tubes [2]	181	385	386	.38	.13	.25	.43	.57	.61
Accessories [3]	140	28	57	.06	.02	.03	.03	.10	.11
Gasoline [4]	1,453	1,733	3,026	3.03	3.03	3.03	3.03	3.03	3.02
Oil [4]	187	158	195	.19	.14	.17	.21	.24	.21
Insurance [5]	1,290	1,722	1,618	1.62	1.41	1.67	1.79	1.42	2.37
Garaging, parking, tolls, etc. [6]	1,080	1,805	1,960	1.96	1.55	1.79	1.97	2.03	2.96
Taxes and fees [7]	1,166	1,353	1,507	1.51	2.40	1.29	1.35	1.37	1.58

[1] For 1974, includes lubrications, repacking wheel bearings, flushing cooling system, and aiming headlamps; replacement of minor parts such as spark plugs, fan belts, radiator hoses, distributor cap, fuel filter, and pollution control filters; minor repairs such as brake jobs, water pump, carburetor overhaul and universal joints; and major repairs such as a complete "valve job."
[2] For 1974, covers 7 new regular tires and 4 new snow tires during life of car.
[3] For 1974, includes a set of vinyl floor mats and seat covers. [4] For 1974, gasoline use set at 12.92 miles per gallon; associated oil use at 1 gallon oil to 159 gallons gas.
[5] For 1974, includes $50,000 combined public liability ($15,000/$30,000 bodily injury, and $5,000 property damage), $2,500 personal injury protection, uninsured motorist coverage, and full comprehensive coverage for the 10-year period; $100 deductible collision insurance was assumed for the first 5 years.
[6] For 1974, includes monthly charges of $11 for garage rental or cost of owner's garaging facility, parking fee average of $57 per year, and toll average of $7.00 per year. [7] For 1974, includes Federal excise taxes on tires of 10 cents per pound, lubricating oil of 6 cents per gallon, and gasoline of 4 cents per gallon; plus the Maryland tax on gasoline of 9 cents per gallon, titling tax of 4 percent of retail price, and registration fee of $20.00 for 3,700 pounds or less shipping weight, or $30.00 for vehicles over 3,700 pounds.

No. 949. Transit Industry—Summary: 1950 to 1973

[**Money figures in millions of dollars, except as indicated.** Prior to 1960, excludes Alaska and Hawaii. Comprises all privately and publicly owned organized local passenger transportation agencies except taxicabs, suburban railroads, and sightseeing and school buses. Covers (*a*) local motorbus lines, (*b*) electric street railways, (*c*) elevated and subway lines, (*d*) interurban electric railways, and (*e*) trolley coach lines. Based on financial and statistical reports received by American Transit Association from transit systems representing more than 85 percent of the industry. See also *Historical Statistics, Colonial Times to 1957*, series Q 330-340]

Section 22

Transportation—Air and Water

This section presents statistics on civil air transportation, both passenger and cargo, and on water transportation, including inland waterways, oceanborne commerce, the merchant marine, cargo and vessel tonnages, and shipbuilding. The principal sources of these data are the annual *FAA Statistical Handbook of Aviation,* issued by the Federal Aviation Administration; the annual *Waterborne Commerce of the United States* and the *Annual Report of the Chief of Engineers,* Part 2, issued by the Corps of Engineers of the Department of the Army; the monthly and annual *U.S. Waterborne Foreign Trade, U.S. Airborne Foreign Trade,* the annual *Vessel Entrances and Clearances,* and the monthly *Highlights of U.S. Export and Import Trade,* issued by the Bureau of the Census; and unpublished data from the Bureau of Customs and U.S. Coast Guard.

Data on air transportation are also presented in *Air Transport Facts and Figures,* published annually by the Air Transport Association of America, Washington, D.C. Additional sources of data on water transportation include *A Statistical Analysis of the World's Merchant Fleets,* issued periodically by the Maritime Administration of the Department of Commerce; *The Bulletin,* issued monthly by the American Bureau of Shipping, New York; and the *Annual Summary of Merchant Ships Launched in the World* and the *Register Book* published by Lloyd's Register of Shipping, London, England. The 1821 through 1946, the 1946–1963, the 1964, and the 1965 issues of *Foreign Commerce and Navigation of the United States,* published by the Bureau of the Census, are basic sources of historical data. Data relating to merchandise exports and imports are in section 30 of this *Abstract,* Foreign Commerce and Aid.

Civil aviation.—Federal promotion and regulation of civil aviation are carried out by the Federal Aviation Administration and the Civil Aeronautics Board. The Board issues certificates permitting persons to engage in air transportation as a business, fixes air mail rates which they may charge, and may establish maximum and minimum rates for transportation of passengers and goods. The responsibility for investigation of aviation accidents, formerly held by the Civil Aeronautics Board, resides with the National Transportation Safety Board of the Department of Transportation.

The principal activities of the Federal Aviation Administration are: Controlling the use of navigable airspace; prescribing regulations dealing with the competency of airmen, airworthiness of aircraft, and air traffic control; operation of air route traffic control centers, airport traffic control towers, and flight service stations; the design, construction, maintenance, and inspection of navigation, traffic control, and communications equipment for the airways; and promotion of air safety.

These agencies publish annual operational data on the use of airway facilities; data related to the location of airmen, aircraft, and airports; the activity volume in the field of non-air carrier (general aviation) flying; and aircraft production and registration.

Air carriers and service.—The term *certificated route air carrier* refers to air carriers holding certificates of public convenience and necessity, issued by the Civil Aeronautics Board, authorizing the performance of scheduled air transportation over specified routes and a limited amount of nonscheduled operations. This general carrier grouping includes the so-called passenger/cargo carriers and the all-cargo carriers, and comprises all of the airlines certificated by the board, except the supplemental air carriers. Certificated route air carriers are often referred to as "scheduled airlines," although they also perform nonscheduled service. *Nonscheduled service* comprises revenue flights that are not operated in regular scheduled service, such as charter flights, and all nonrevenue flights incident to such flights. *Scheduled service* is transport service operated over an air carrier's certificated routes, based on published flight schedules, including extra sections and related nonrevenue flights.

Vessel shipments, entrances, and clearances.—Shipments by dry cargo vessels comprise shipments on all types of watercraft, except tanker vessels; shipments by tanker vessels comprise all types of cargo, liquid and dry, carried by tanker vessels.

A vessel is reported as entered only at the first port which it enters in the United States whether or not cargo is unloaded at that port. A vessel is reported as cleared only at the last port at which clearance is made to a foreign port, whether or not it takes on cargo. Army and Navy vessels entering or clearing without commercial cargo and vessels touching at a United States port in distress, or for other temporary causes without discharging cargo, are not included in the figures.

Units of measurement.—Cargo tonnage and shipping weight both represent the gross weight of the cargo including the weight of containers, wrappings, crates, etc. However, shipping weight excludes lift and cargo vans and similar substantial outer containers. Other tonnage figures generally refer to stowing capacity of vessels, 100 cubic feet being called 1 ton. Gross tonnage comprises the space within the frames and the ceiling of the hull, together with those closed-in spaces above deck available for cargo, stores, passengers, or crew, with certain minor exceptions. Net or registered tonnage is the gross tonnage less the spaces occupied by the propelling machinery, fuel, crew quarters, master's cabin, and navigation spaces. It represents substantially space available for cargo and passengers. The net tonnage capacity of a ship may bear little relation to weight of cargo. Dead-weight tonnage is the weight in long tons required to depress a vessel from light water line (that is, with only the machinery and equipment on board) to load line. It is, therefore, the weight of the cargo, fuel, etc., which a vessel is designed to carry with safety.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 968. Scheduled Air Carriers—Number, Operating Revenues, and Expenses: 1955 to 1972

– Represents zero. NA Not available.

[1] Existing airports and airfields recorded with FAA. Includes military airports with joint civil and military use. Includes Puerto Rico, American Samoa, Canton, Guam, Virgin Islands, and Wake Island.

[2] Airport type definitions: Public—public use and public services, public control; Private—(*a*) public use and public services, private control, and (*b*) no public services, private control, military control, or Federal Government control. [3] Includes outlying areas U.S. . [4] Includes gliders, dirigibles, and balloons.

[5] Registered, not necessarily in operation. Includes helicopters.

[6] Includes autogiros; excludes air carrier helicopters. [7] Includes gliders, blimps, and balloons.

[8] Includes nonpilot technicians and flight instructors, not shown separately.

[9] Includes helicopter, glider, and other pilots, not shown separately.

[10] Corporation and individual business transportation, not for hire.

[11] Passenger and cargo transportation for hire, aerial application (crop dusting, spraying, seeding, etc.), patrol, survey, and other miscellaneous work use. [12] Comprises express and freight ton-miles.

[13] Includes some military ton-miles and may include a small amount of international traffic.

[14] Civil and military. [15] Beginning 1968, data not strictly comparable due to change of definition.

– Represents zero. NA Not available. Z Less than 0.05. [1] Excludes all-cargo operators. Beginning 1971, includes non-scheduled operators.

[2] For types of personnel, see table 973. [3] Not compiled for intra-Alaska prior to 1970.

[4] As of Dec. 31, based on fourth quarter.

[5] Represents aircraft of the certificated route air carriers; excludes those used for crew training and general utility purposes, or held for disposal. Beginning 1960, excludes aircraft operated by the scheduled all-cargo carriers. Includes helicopters, not shown separately.

[6] Obtained by dividing passenger seat-miles by revenue-miles flown in passenger service.

[7] Excludes freight flown by certificated all-cargo operators and irregular carriers.

[8] Beginning 1960, includes military contract operations.

[9] Includes midair collisions nonfatal to air carrier occupants; excluded in computation of fatal accidents.

[10] Includes crew members.

[11] Excludes passenger deaths occurring in dynamite accidents, as follows: Nov. 1, 1955, 39; Jan. 6, 1960, 29.

No. 980. United States Receipts and Payments for International Transportation: 1950 to 1973

[**In millions of dollars.** Data are international transportation transactions recorded for balance of payment purposes (see table 1,308). Receipts include freight on exports carried by U.S. operated carriers and foreign carrier expenditures in U.S. ports. Payments include freight on imports carried by foreign carriers and U.S. carrier port expenditures abroad. Freight on exports carried by foreign carriers is excluded since such payments are directly or indirectly for foreign account. Similarly, freight on U.S. imports carried by U.S. carriers is a domestic rather than an international transaction. Minus sign (−) denotes excess of payments over receipts. See *Historical Statistics, Colonial Times to 1957*, series U 170 and U 177, for totals]

[1] Estimates of personnel employed on U.S. merchant ships, 1,000 gross tons and over. Excludes vessels on inland waterways, Great Lakes, and those owned by, or operated for, the U.S. Army and Navy, and special types such as cable ships, tugs, etc. [2] Decrease due to seafaring strike. [3] Seamen on both coasts receive extra pay for Saturdays and Sundays at sea. Beginning November 1955, West Coast incorporated this extra pay into base wages but East Coast did not. [4] Represents basic wage, over and above subsistence (board and room), paid to seamen having qualifying experience and employed on U.S. flag merchant vessels. Excludes overtime and fringe pay benefits.

Source: U.S. Maritime Administration, *Seafaring Wage Rates*, and unpublished data. Beginning 1960, monthly employment data in *Maritime Manpower Report*.

No. 997. United States Flag Merchant Vessels, Steam and Motor: 1950 to 1973

FIG. XLI. CHANGES IN FARMING: 1940 to 1973

[See tables 1004 and 1006]

Source: Chart prepared by U.S. Bureau of the Census. Data from U.S. Department of Agriculture, Statistical Reporting and Economic Research Service.

Section 23

Agriculture

This section presents statisties eoneerning our agrieultural economy. Included are data on farms and farm population; land use and conservation; farm income, expenditures, and debt; farmer cooperatives; farm output and marketings; trade in agricultural products; specific crops; and livestock, poultry, and their products.

The principal sources of thesc data are reports issued by the Bureau of the Census, which conducts a census of agriculture every 5 years and censuses of irrigation and of drainage every 10 years; and three annual reports, *Agricultural Statistics*, *Crop Production*, and *Crop Values*, issued by the Statistical Reporting Service, Department of Agriculture. Other important sources include *The Balance Sheet of Agriculture*, *Changes in Farm Production and Efficiency*, *The Farm Income Situation*, and other *Situation* reports, issued by the Economic Research Service, Department of Agriculture. Sources of current data on agricultural exports and imports include *Foreign Agricultural Trade*, also published by the Economic Research Service, and the reports of the Bureau of the Census, partieularly Report FT 135, *U.S. Imports, General and Consumption, Schedule A Commodity and Country*, and Report FT 410, *U.S. Exports, Schedule B Commodity and Country*.

A census of agriculture has been taken by enumeration of individual farms every 10 years since 1840 and every 5 years since 1920. The 1969 Census of Agriculture is the most recent one for which complete data are available, and the first for which data collection was primarily by respondent-filled forms, sent and returned by mail.

Annual agricultural statistics of a wide variety have been issued by the Department of Agriculture for over 100 years. The 44 field offices of the Statistical Reporting Service collect data from voluntary reporters and from objective yield measurements taken in selected fields. State estimates and other information are sent to the Crop Reporting Board of the Statistical Reporting Scrvice, which issues reports containing State and national data.

Statistics compiled by the Statistical Reporting Service on crops, livestock and livestock products, agricultural prices, farm employment, and other related subjects are obtained from over 1.1 million reporters, mostly farmers, who report for their own and nearby farms on some 150 crops and 50 livestock items, and scores of other items pertaining to agricultural production and farm family living.

Farms and farmland.—Over time, the Bureau of the Census has used varying definitions of a farm. In the 1959, 1964, and 1969 censuses, places of less than 10 acres were countcd as farms if estimated sales of agricultural products for the year amounted to at least $250, and places of 10 or more acres if such sales amounted to at least $50. In the 1950 and 1954 censuses, places of 3 or more acres were counted as farms if the annual *value* of agricultural products, exclusive of home-garden products, amounted to $150 or more; places of less than 3 acres were counted as farms only if the annual *sales* amounted to $150 or more. For definitions uscd in earlier eensuses, see *U.S. Census of Agriculture: 1964*, vol. II, Introduction.

Estimates based on evaluation studies of the 1969 census results indicate a net underenumeration of 45 thousand farms with value of products $2,500 or more (about 3 pereent of all sueh farms) and 316 thousand farms with value of products less than $2,500 (about 29 percent). Taken together, those 361 thousand farms represent about 13.6 percent of the estimated total number of farms, compared with 8.4 pereent estimated net underenumeration in 1959 and 11.3 pereent in 1964. In both the 1959

and the 1964 censuses, the estimated net underenumeration of farms with value of products $2,500 or more was about 4 percent. The estimated net underenumeration of farms with value of products less than $2,500 was about 13.7 percent in 1959 and 19.3 percent in 1964. Published census data have not been adjusted for the estimated underenumeration. Additional details are given in *U.S. Census of Agriculture: 1969*, Vol. V, Part 16.

Currently included as farms are such agricultural enterprises as nurseries, greenhouses, hothouses, sod farms, mushroom houses, and cranberry bogs; excluded are fish farms, fish hatcheries, oyster farms, frog farms, kennels, game preserves, parks, and the like. In the case of landowners who had one or more tenants, renters, croppers, or managers, the land operated by each was counted as a separate farm.

Farmland refers to all land under the control of a farm operator and considered as part of his farm, including land not actually under cultivation or not used for pasture or grazing. Rent-free land was included as part of the farm only if the operator had sole use of it. Land used for pasture or grazing that was neither owned nor leased by the farm operator is not included except for grazing lands controlled by grazing associations.

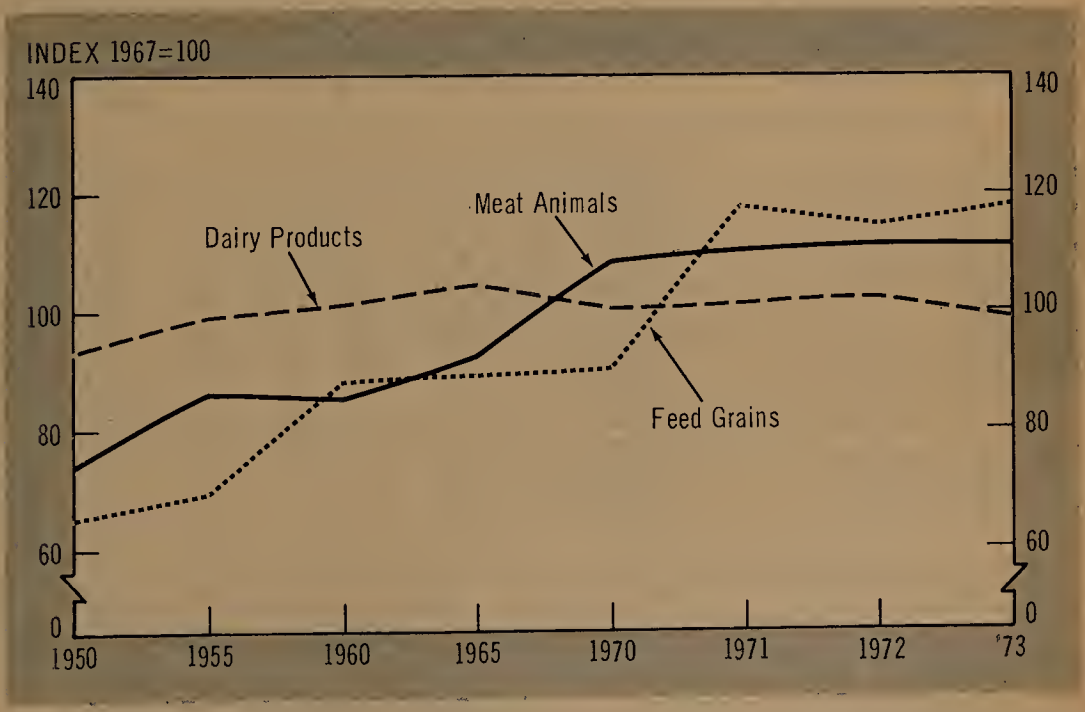
The universe for the 1969 census differed to some extent from the universes of prior, direct interview, censuses of agriculture. Interviewers tended to overlook some of the farms operated by nonresidents, and some of the agricultural operations located in urban areas. The 1969 mailing list included almost everyone who identified agriculture as a source of income or was a participant in government-sponsored agricultural programs, but tended to omit persons who did not identify any of their income as agricultural. All operators of farms with sales of $2,500 or more in 1969 were asked to complete the regular census form. Those with sales of less than $2,500 were included in the census on a 50-percent sample basis, and were sent an abbreviated form.

Irrigation.—Irrigated land is defined by the Bureau of the Census as the acreage in farms to which water is artificially applied during the census year. In some of the earlier censuses only irrigated crop acreage was enumerated. Beginning with 1920, irrigated land has included cropland, pasture, and any other land irrigated. Land not irrigated during the census year and irrigated land not in farms have always been excluded. In addition to collecting information on irrigation from individual farms in the quinquennial Census of Agriculture, the Bureau of the Census collects data in the operation of irrigation water supply organizations at 10-year intervals. An irrigation organization is defined as a group of two or more water users, a company, a corporation, or a governmental district or agency that operates facilities to supply water for irrigation of farm and ranch lands. All censuses of irrigation organizations from 1920 to 1969 covered the 17 conterminous Western States and Louisiana, and some censuses included Arkansas and/or Florida. In 1969, irrigation information was collected from farms and irrigation organizations for all States.

Farm income.—Cash income is the cash receipts from farm marketings and Government payments made directly to farmers for farm related activities. Farm marketings represent agricultural products sold by farmers multiplied by prices received per unit of production at the local market. Gross farm income includes cash income, value of farm products consumed in farm homes, and rental value of farm homes.

Information on prices received is obtained by the Statistical Reporting Service from over 4,500 voluntary reporters, including farmers, local merchants, and handlers of agricultural products. Season average prices received by farmers are calculated by weighting midmonth prices by monthly sales during the crop marketing season, beginning with the first month in which a particular crop harvest begins.

Crops.—Estimates of crop acreage and production by the Department of Agriculture's Statistical Reporting Service are based on current sample survey data obtained from individual reporters and objective yield counts which are supplemented by State assessors' enumerations of agricultural information, reports of carlot shipments, warehouse receipts, personal field observations by field statisticians, and reports from other sources. Cotton acreage and production are based on sample survey data and on ginning information gathered by the Bureau of the Census. Following receipt of the U.S. Census of Agriculture information, the estimates made since the previous census year are reviewed on the basis of the data that were currently used and other data that became available later, including the Census of Agriculture. If necessary, revisions are made in the estimates based on this historical review.



Livestock.—Each census of agriculture from 1840 through 1900 was taken as of June 1. The various censuses since then have been taken as of January, April, or the fall, as specified in the published results. For the 1969 census, inventories were as of December 31, 1969, and purchases, production, and sales data were for the calendar year 1969. Comparison of livestock inventories from census to census is seriously affected by changes in date of enumeration. Volume II of *U.S. Census of Agriculture-1964* shows a complete history of the enumeration of livestock and analyzes comparability from census to census.

Annual inventory numbers of livestock on farms and estimates of livestock, dairy, and poultry production prepared by the Department of Agriculture are based on information from farmers, supplemented by State assessors' data and by records of brand inspections, rail and truck shipments, and slaughter.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 1009. Farmer Cooperatives—Number, Memberships, and Business: 1950 to 1970

[For years ending June 30, with limited exceptions. 1950 excludes Alaska and Hawaii. Memberships and businesses are estimated. Comprises independent local associations, federations, large-scale centralized associations, and sales agencies. Data are for marketing season during which farm products are moved into channels of trade. Marketing seasons overlap. See also *Historical Statistics, Colonial Times to 1957*, series K 181–189]

[1] Comprises cropland used for crops, soil improvement crops, and idle cropland.
[2] Includes cropland used only for pasture.
[3] Includes grassland, arid woodland, and shrub and other forested land grazed.
[4] Excludes forest areas in parks and most other special uses.
[5] Comprises urban, industrial, and residential areas; rural parks; wildlife refuges; highway, road, and railroad rights-of-way; ungrazed desert; rocky, barren, swamp, tundra, and other land not otherwise counted.

[1] Value of farm products sold, $50–$2,499, and a farm operator under 65 years of age who did not work off the farm 100 days or more during the census year.

[2] Includes institutional farms, experimental and research farms, and Indian reservations, etc.

Source: U.S. Bureau of the Census, *U.S. Census of Agriculture: 1969*, vol. II.

No. 1017. Farms—Number, by Type and by States: 1969

[In general, a farm was classified as a particular type if its sales of a particular product or group of products amounted to 50 percent or more of total value of farm products sold. For composition of regions, see fig. I, inside front cover]

STATE	All farms	WITH SALES OF $2,500 OR MORE										With sales less than $2,500 [3]

Farm output per man-hour [5]	21	35	47	67	91	112	113	125	131	133
All livestock and products	27	37	46	62	87	112	119	130	138	139
Meat animals	50	55	62	70	90	110	116	124	132	131
Milk cows	25	35	43	60	87	115	123	136	148	148
Poultry	15	21	32	55	87	112	120	129	143	145
All crops	22	39	48	71	92	112	110	122	126	127
Feed grains	10	23	31	58	92	109	101	114	127	129
Hay and forage	30	55	63	84	96	145	148	152	15	163
Food grains	21	40	50	93	101	113	117	125	120	122
Vegetables	40	57	70	89	99	106	106	106	109	105
Fruits and nuts	51	64	75	74	95	109	107	110	109	121
Sugar crops	27	38	53	79	88	115	121	130	139	121
Cotton	17	25	39	56	101	117	125	127	143	152
Tobacco	56	66	75	87	95	98	104	101	105	100
Oil crops	18	47	60	84	100	114	115	120	123	125
Cropland used for crops [6]	107	111	111	104	99	98	98	100	98	104
Crop production per acre	63	69	74	88	100	107	102	112	115	114

[1] Refers to persons supplied farm products; includes the farmworker. [2] Series discontinued.
[3] Man-equivalent hours; represents overhead, and time used by average adult males in performing farm operations on crops and livestock. [4] Includes work on horses and mules.
[5] Index of farm output (production) divided by index of man-hours used.
[6] Harvested acreages plus acreages of crop failure and summer fallow.

No. 1042. Farm Labor—Man-Hours Per Unit of Production, Selected Crops and Livestock: 1935–39 to 1968–72

[Excludes Alaska and Hawaii. See also *Historical Statistics, Colonial Times to 1957*, series K 87, K 92, and K 97]

CROP AND ITEM	1935–1939	1945–1949	1955–1959	1968–1972 [1]
Corn for grain:				
Man-hours per acre [2]	28.1	19.2	9.9	5.4
Yield—bushels	26.1	36.1	48.7	84.0
Man-hours per 100 bushels	108	53	20	6
Wheat:				
Man-hours per acre [2]	8.8	5.7	3.8	2.9
Yield—bushels	13.2	16.9	22.3	31.3
Man-hours per 100 bushels	67	34	17	9
Hay:				
Man-hours per acre [2]	11.3	8.4	6.0	3.6
Yield—short tons	1.24	1.35	1.61	2.07
Man-hours per short ton	9.1	6.2	3.7	1.7
Potatoes:				
Man-hours per acre [2]	69.7	68.5	53.1	44.0
Yield—cwt	70	118	178	226
Man-hours per short ton	20	12	6	4
Cotton:				
Man-hours per acre [2]	99	83	66	25
Yield—pounds	226	273	428	467
Man-hours per bale	209	146	74	25
Tobacco:				
Man-hours per acre [3]	415	460	475	487
Yield—100 lb	0.9	1.2	1.5	2.0
Man-hours per 100 pounds	47	39	31	24

LIVESTOCK AND ITEM	1935–1939	1945–1949	1955–1959	1968–1972 [1]
Milk cows:				
Man-hours per cow	148	129	109	68
Milk per cow—cwt	4.4	5.0	6.3	9.5
Man-hours per cwt. of milk	3.4	2.6	1.7	0.7
Cattle, ex. milk cows:				
Man-hours per cwt. of beef produced [4 5]	4.2	4.0	3.2	1.8
Hogs: Man-hours per cwt. produced [5]	3.2	3.0	2.4	1.2
Chickens (laying flocks and eggs):				
Man-hours per 100 layers	221	240	175	86
Rate of lay	129	161	200	222
Man-hours per 100 eggs produced	1.7	1.5	0.9	0.4
Chickens (farm raised):				
Man-hours per 100 birds	30	29	23	13
Man-hours per cwt. produced [5]	9.0	7.7	6.7	3.5
Chickens (broilers):				
Man-hours per 100 birds	25	16	4	1
Man-hours per cwt. produced [5]	8.5	5.1	1.3	0.4
Turkeys: Man-hours per cwt. produced [5]	23.7	13.1	4.4	1.0

[1] Preliminary.
[2] Man-hours per acre harvested, including preharvest work on acreages abandoned, grazed, and turned under.
[3] Per acre planted and harvested.
[4] Production includes beef produced as a byproduct of the milk cow enterprise.
[5] Liveweight production.

[1] Values are based on season average prices; see footnote 2.
[2] Season average price received by farmers. State prices weighted by production to obtain U.S. price prior to 1958, but weighted by sales beginning 1958. For certain years, prices for wheat, rice, corn for grain, grain sorghums, oats, soybeans, and cotton include an allowance for unredeemed loans and purchase agreement deliveries.
[3] Based on reported price of grain sorghums.
[4] State production figures, which conform with U.S. Bureau of the Census annual ginning enumeration with allowance for cross-State ginnings, rounded to thousands and added for U.S. totals.
[5] Bales of 500 pounds, gross weight. Beginning 1969, bales of 480 lb., net weight.
[6] Average price to April 1, 1974. [7] Prices are for hay sold baled.
[8] Includes some quantities not harvested and/or not marketed on account of economic conditions.

[1] Sugar quotas govern the supply of sugar from all sources, foreign and domestic, available to the conterminous United States. The formulas for allocating the quotas among the supplying areas are established by Congress, the size of the quotas is determined by the Secretary of Agriculture. [2] Beginning 1973, includes Texas.
[3] Through 1965, includes Virgin Islands. Beginning 1970, P.R. included in United States total.
[4] Adjusted for changes in invisible stocks (estimated) held by manufacturers, wholesalers, and retailers.

Section 24

Forests and Forest Products

This section presents basic statistics on the area and ownership of commercial forest land, and on the annual growth, cut, and volume of timber on this land; forestry statistics covering the National Forests and Forest Service cooperative programs; product statistics for lumber, pulpwood, wood pulp, paper and board, turpentine, rosin, and veneer logs; and other similar data.

The principal sources of these data are *The Outlook for Timber in the United States*, issued in 1973 by the Forest Service of the Department of Agriculture, and *The Demand and Price Situation for Forest Products*, *National Forest System*, and *Wildfire Statistics*, issued annually by the Forest Service; and reports of the quinquennial Census of Manufactures and the monthly and annual *Current Industrial Reports*, issued by the Bureau of the Census. Additional information in this field is published in the *Annual Report* of the National Forest Reservation Commission, the *Annual Naval Stores Report* of the Department of Agriculture's Statistical Reporting Service, the monthly *Survey of Current Business* of the Bureau of Economic Analysis, and the monthly *Fingertip Facts and Figures* of the National Forest Products Association, Washington, D.C.

The Bureau of the Census also collects statistics on foreign trade of forest products. The Bureau of Labor Statistics publishes monthly and annual statistics of wholesale lumber prices. Information on the domestic movement of forest products is collected by the Interstate Commerce Commission and the Association of American Railroads, Washington, D.C.

The completeness and reliability of statistics on forests and forest products vary considerably. The data for forest land area and stand are, of course, much more reliable for areas which have been surveyed than for those which have not been surveyed. Estimates of fire damage or causes of fires are not completely reliable, although forest fire statistics for Federal lands are considered much better than those for private lands. In the field of forest products, much more data are available for lumber production and other manufactured products such as veneer and plywood, pulp and paper, naval stores, etc., than for the primary forest products such as poles and piling, fuelwood, and fence posts.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. 1079. Forest Land—Total and Commercial Area, Volume of Sawtimber, and Growing Stock: 1953, 1963, and 1970

– Represents zero. [1] All land (*a*) producing, or physically capable of producing, usable crops of wood, (*b*) economically available on date shown or prospectively, and (*c*) not withdrawn from timber utilization.

Source: U.S. Dept. of Agriculture, Forest Service, *The Outlook for Timber in the United States*, 1973.

No. 1083. Sawtimber and Growing Stock—Growth, Removals, and Volume on Commercial Timberland, by States: 1970

[Sawtimber comprises all live trees of commercial species which contain at least 1 saw log defined as follows: Softwoods must be at least 9.0 inches in diameter, breast height, except in California, Oregon, Washington, and coastal Alaska where the minimum diameter is 11.0 inches. Hardwoods must be at least 11.0 inches in diameter in all States. Growing stock comprises all live sawtimber trees, poletimber trees, saplings, and seedlings meeting specified standards of quality or vigor; excludes cull trees]

Allotments to Forest Service [8]	3.5	7.8	14.2	14.3	28.8	22.7	33.9	45.5

NA Not available. Z Less than $50 thousand.
[1] Includes land exchanges. [2] Includes some free use timber not reducible to board feet.
[3] Number permitted to graze. 1973 represents number that actually grazed. Through 1955, excludes national grasslands and land utilization project lands. Calendar-year data. Excludes Puerto Rico. [4] Excludes animals under 6 months of age. 1973 excludes swine. [5] Through 1965, excludes national grasslands.
[6] Payments made in following year. [7] No deposits credited after April 1, 1972 per Public Law 92-203, dated 12/18/71.
[8] For use in following year.

NA Not available.
[1] Comprises national forests, public domain, land administered by U.S. Dept. of the Interior, Soil Conservation Service, Tennessee Valley Authority, etc.
[2] Beginning 1965, includes nonforest watershed areas under U.S. Dept. of the Interior protection.
[3] Excludes Alaska and Hawaii. [4] For 1960, excludes Alaska.
[5] Includes nonforest watershed areas.
[6] For fire protection on State and private forest lands only, years ending June 30. [7] Excludes Alaska.
[8] Beginning 1970, data not comparable with prior years due to change of definition. Through 1969, figures represent "Machine use."
[9] Prior to 1965, lumbering and railroads included in "Miscellaneous"; thereafter, in various other classifications, except data for 1973 include 6,062 railroad fires and 8,402 fires caused by children.

Section 25

Fisheries

This section presents statistics relating to commercial fishing and the fish processing industry. The principal source of these data is the National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), of the U.S. Department of Commerce. For a list of publications, see "Fisheries" in Appendix II of this book.

The NMFS publishes monthly data on commercial landings of fish and shellfish, freezings, and holdings of fishery products, fish meal and oil production, and foreign trade in fishery products. Quarterly data are published on U.S. output of fish sticks, fish portions, and breaded shrimp. Annual reports for fisheries include calendar year data on quantity and value of commercial landings of fish and shellfish (by species, region, State, and by type of fishing gear), disposition of landings, number of fishermen, and number and kinds of fishing vessels and fishing gear. Reports for the fish-processing industry include annual data on output of canned, packaged, and industrial products. Annual data are published on foreign trade in fishery products and per capita consumption of edible fishery products. The NMFS publishes annual data for wholesaling and fish processing establishments showing annual and seasonal employment, and number of firms, by product and State.

The first comprehensive survey of U.S. fisheries and fishery industries, made for the year 1880, did not include the Mississippi River and its tributaries. A complete survey was conducted in 1908 by the Bureau of the Census and in 1931 by the Bureau of Fisheries. Various sections of the country have been surveyed from time to time. A complete survey of all sections, including manufacturing and wholesaling operations, was made for 1950. Beginning in 1954, complete data have been collected annually, except for a portion of the Mississippi River and its tributaries in 1961.

The Census of Commercial Fisheries for 1963 and 1967, conducted by the Bureau of the Census in cooperation with the Bureau of Commercial Fisheries, shows information classified by fishing regions and selected ports on commercial fishing vessel operators and fishing vessels, employment, gross receipts, and operating costs. Also included are data on vessel construction material, catch, and fishing gear.

The Water Quality Office of the U.S. Environmental Protection Agency publishes *Pollution-Caused Fish Kills* annually.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

No. **1103.** Fisheries—Quantity and Value of Catch: 1930 to 1973

[Prior to 1950, excludes Hawaii. See also *Historical Statistics, Colonial Times to 1957*, series L 110–111]

No. 1112. Fisheries—Disposition of Domestic Catch: 1950 to 1973

Round weight of catch in millions of pounds. Prior to 1960, excludes Hawaii. In addition to whole fish, a large portion of waste derived from canning, filleting, and dressing fish and shellfish is utilized in production of fish meal and oil. From 400 to 500 million pounds of waste were used in meal and oil production in each year shown. See also *Historical Statistics, Colonial Times to 1957*, series L 155–161]

Section 26

Mining and Mineral Products

This section presents statistics relating to the mineral industries and mineral products. The data are arranged in four broad groupings: General summary statistics, fuels, nonmetals other than fuels, and metals. Summary measures of production and employment are presented for mining and its products. More detailed data on value and quantity of production, prices, imports and exports, consumption, and distribution are shown for specific mineral industries and products.

The principal source of these data is the *Minerals Yearbook*, published by the Bureau of Mines, Department of the Interior. It consists of volume I, *Metals, Minerals, and Fuels;* volume II, *Area Reports—Domestic;* and volume III, *Area Reports—International.* Another major government source is the Census of Mineral Industries, conducted every 5 years by the Bureau of the Census. Non-government sources from which data are presented in this section include the *Annual Statistical Report* of the American Iron and Steel Institute, Washington, D.C.; *Metals Week* and the monthly *Engineering and Mining Journal*, issued by the McGraw-Hill Publishing Co., New York; and *The Iron Age*, issued weekly by the Chilton Co., Philadelphia.

Mineral statistics, with principal emphasis on commodity detail, have been collected by the Geological Survey or by the Bureau of Mines since 1880. Current data available from Bureau of Mines publications include quantity and value of minerals produced, sold or used by producers, or shipped; quantity of minerals stocked; crude materials treated and prepared minerals recovered; and consumption of mineral raw materials. The Mining Enforcement and Safety Administration also collects and publishes data on man-hours, employment, and accidents and injuries in the mineral industries.

Decennial censuses of mineral industries were conducted by the Bureau of the Census from 1840 to 1940. Censuses were taken again for the years 1954, 1958, 1963, 1967, and 1972. The 1967 census is the most recent for which complete data are available. The censuses provide, for the various types of mineral establishments, information on operating costs, capital expenditures, and labor, equipment, and energy requirements in relation to their value of shipments and other receipts. Commodity statistics on many of the manufactured mineral products are also collected by the Bureau at monthly, quarterly, or annual intervals and issued in its *Current Industrial Reports* series.

Data on mining and mineral products may also be found in other sections of this *Abstract*. For example, data on iron and steel, and on aluminum, magnesium, copper, clay, and other manufactured mineral products appear in section 28, Manufactures; summary data for outlying areas of the United States appear in section 31; and selected data on an international basis are presented in section 32.

In general, figures shown in the individual commodity tables include data for outlying areas, and may therefore not agree with summary table 1125. Except for crude petroleum, the export and import figures include foreign trade passing through the customs districts of Alaska, Hawaii, and Puerto Rico, but exclude shipments between conterminous United States and outlying areas.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

No. 1121. National Income Originating in Mining: 1950 to 1973

[**In millions of dollars.** 1950 excludes Alaska and Hawaii. For definition of national income, see text, p. 372]

ITEM	1950	1960	1965	1970	1971	1972	1973
Total	5,249	5,732	6,432	7,682	7,056	8,253	9,397

No. 1125. Mineral Production, 1960 to 1972, and Principal Producing States, 1972—Continued

[Value in thousands of dollars]

MINERAL	1960		1965		1970		1972		
	Quantity	Value	Quantity	Value	Quantity	Value	Quantity	Value	Principal producing States in order of quantity
Nonmetallic minerals (except fuels)—Continued									
Magnesium compounds from sea water and brines (except for metals)—1,000 short tons (MgO equiv.)	293	21,903	638	47,197	708	62,434	729	63,915	Mich., Calif., Fla., N.J.
Mica:									
Scrap—short tons	97,912	2,698	120,255	3,468	118,843	2,527	159,536	4,353	N.C., Ala., Ga., S.C.
Sheet—pounds	587,401	3,108	716,086	185	–	–	14,280	7	Colo.
Perlite—1,000 short tons	312	2,665	392	3,352	456	4,904	544	6,231	N. Mex., Ariz., Calif., Nev.
Phosphate rock—1,000 short tons	19,618	117,041	29,482	193,323	38,739	203,218	40,831	207,910	Fla., Idaho, Tenn., N.C.
Potassium salts—1,000 short tons (K_2O equiv.)	2,638	89,676	3,140	129,767	2,729	98,123	2,659	106,680	N. Mex., Calif., Utah.
Pumice—1,000 short tons	2,210	5,569	3,371	6,550	3,036	4,671	3,813	6,539	Oreg., Ariz., Calif., Hawaii.
Pyrites—1,000 long tons	1,016	7,936	875	5,333	(D)	(4)	741	6,652	Tenn., Colo., Ariz.
Salt (common)—1,000 short tons	25,479	161,140	34,687	215,699	45,896	304,759	45,022	296,772	La., Tex., Ohio, N.Y.
Sand and gravel—million short tons	710	720,432	908	957,416	944	1,115,705	913	1,199,520	Calif., Mich., Ohio, Ill.
Sodium carbonate (natural)—1,000 short tons	809	20,865	1,494	34,717	2,688	56,320	3,218	71,689	Wyo., Calif.
Sodium sulfate (natural)—1,000 short tons	450	8,706	620	11,024	602	10,932	701	11,396	Calif., Tex., Utah.
Stone [5]—million short tons	617	952,555	78	1,203,831	875	1,474,917	924	1,683,332	Pa., Ill., Fla., Tex.
Sulfur:									
Frasch-process mines—1,000 long tons	5,003	115,494	7,251	164,654	6,419	151,779	7,613	132,385	Tex., La.
Other mines—1,000 long tons	181	1,732	3	11	–	–	–	–	(X)
Talc, soapstone, and pyrophyllite—1,000 short tons	734	5,378	863	6,343	1,028	7,773	1,107	7,835	N.Y., Tex., Vt., Calif.
Tripoli—1,000 short tons	58	247	71	381	68	520	88	797	Ill., Okla., Ark., Pa.
Vermiculite—1,000 short tons	199	3,108	249	4,460	285	6,501	337	8,092	Mont., S.C.
Nonmetallic minerals, undistributed [6]	(X)	44,715	(X)	65,028	(X)	34,401	(X)	39,730	(X)

Metals	(X)	2,022,000	(X)	2,544,000	(X)	3,928,000	(X)	3,641,000	(X)	
Antimony ore and concentrate, short tons (antimony content)	635	(7)	845	(7)	1,130	(7)	489	386		Idaho, Mont., Nev.
Bauxite, 1,000 long tons (dried equivalent)	1,998	21,107	1,654	18,632	2,082	30,070	1,812	23,238		Ark., Ala., Ga.
Beryllium concentrate, short tons (gross weight)	509	162	(D)	(7)	(D)	(7)	(D)	(7)		Utah, S. Dak., Colo.
Copper (recoverable content of ores, etc.), 1,000 short tons	1,080	693,468	1,352	957,028	1,720	1,984,484	1,664	1,704,796		Ariz., Utah, N. Mex., Mont.
Gold (recoverable content of ores, etc.), 1,000 troy ounces	1,667	58,336	1,705	59,682	1,743	63,439	1,450	84,967		Nev., S. Dak., Utah, Ariz.
Iron ore, usable (excluding byproduct iron sinter), 1,000 long tons (gross weight)	82,963	724,131	84,079	801,388	87,176	941,739	77,884	950,365		Minn., Mich., Calif., Mo.
Lead (recoverable content of ores, etc.), 1,000 short tons	247	57,722	301	93,959	572	178,609	618,915	186,046		Mo., Idaho, Colo., Utah.
Manganese ore (35 percent or more Mn), short tons (gross weight)	80,021	5,352	29,258	(7)	4,737	(7)	578	(7)		Mont.
Manganiferous ore (5 to 35 percent Mn), 1,000 short tons (gross weight)	658	4,466	333	(7)	368	(7)	147,161	(7)		Minn., N. Mex.
Mercury, 76-pound flasks	33,223	7,002	19,582	11,176	27,296	11,130	7,286	1,590		Calif., Nev., Alaska, Idaho.
Molybdenum (content of concentrate), 1,000 pounds	69,941	87,406	77,310	120,801	110,381	190,077	102,197	170,530		Colo., Ariz., N. Mex., Utah.
Nickel (content of ore and concentrate), short tons	14,079	(7)	16,188	(7)	15,933	(7)	16,864	(7)		Oreg.
Silver (recoverable content of ores, etc.), 1,000 troy ounces	30,766	27,846	39,806	51,469	45,006	79,697	37,233	62,737		Idaho, Ariz., Utah, Colo.
Tin content of concentrate, long tons	10	12	47	126	(D)	(7)	(D)	(7)		Colo., Alaska.
Titanium concentrate: Ilmenite, 1,000 short tons (gross weight)	789	14,655	949	18,058	921	18,626	726	16,265		N.Y., Fla., N.J., Ga.
Tungsten ore and concentrate, short tons (60 percent WO_3 basis)	7,325	9,815	7,949	13,028	9,785	23,790	7,401	18,104		Calif., Colo., Nev., Utah.
Uranium (recoverable content U_3O_8) [8], 1,000 pounds	15,940	152,188	19,727	157,828	24,682	149,464	25,758	162,272		N. Mex., Wyo., Tex., Colo.
Vanadium (recoverable in ore and concentrate), short tons	4,971	17,749	5,226	18,284	5,319	34,923	4,887	30,867		Ark., Colo., Idaho, Utah.
Zinc (recoverable content of ores, etc.), 1,000 short tons	435	112,365	611	178,284	534	163,650	478	169,803		Tenn., Colo., Mo., N.Y.
Metals, undistributed [9]	(X)	26,891	(X)	44,804	(X)	58,430	(X)	50,664	(X)	

– Represents zero. D Withheld to avoid disclosing individual company data.
NA Not available. X Not applicable.

[1] Includes small quantity of anthracite mined in States other than Pennsylvania.

[2] 1960, refined only; thereafter, crude and refined.

[3] Grindstones, pulpstones, millstones (weight not recorded), grinding pebbles, sharpening stones, and tube-mill liners.

[4] Value included in "Nonmetallic minerals, undistributed."

[5] Excludes abrasive stone, bituminous limestone and sandstone, and ground soapstone, all included elsewhere in table. Includes calcareous marl and slate.

[6] Comprises value of items that cannot be disclosed: Aplite, brucite (1965), calcite (optical grade, 1965), calcium-magnesium natural and slag cement, chloride, diatomite (1960–65), graphite, iodine, kyanite, lithium minerals, magnesite, greensand marl, olivine, staurolite, and wollastonite and values indicated by footnote 4.

[7] Included with "Metals, undistributed."

[8] 1960, uranium ore.

[9] Comprises value of items that cannot be disclosed: Cobalt (1960–71) magnesium chloride for magnesium metal, manganiferous residuum, platinum-group metals (crude), rare-earth metal concentrates, titanium concentrate (rutile) (1965), zirconium concentrate, and values indicated by footnote 7.

Z Less than 500, 500,000, or $500,000.

[1] Includes single-unit establishments without paid employees.

[2] Gross earnings paid to all employees on payroll.

[3] Computed by subtracting cost of supplies, minerals received for preparation, purchased fuel and electric energy, contract work, and purchased machinery from the value of shipments and capital expenditures.

[4] Excludes proprietors and firm members of unincorporated concerns.

[5] Represents employees up through the working foreman level engaged in manual work. Includes development and exploration workers.

SUMMARY: 1963, 1967 AND 1972

"N.e.c." means not elsewhere classified. See also *Historical Statistics, Colonial Times to 1957*, series M 1-12]

[6] Excludes paid vacations, holidays, and sick leave; includes actual overtime hours (not straight-time equivalent).
[7] Represents value of shipments of primary and secondary products of the industry and amount received for services performed for other establishments on a contract, fee, or other basis.
[8] Not strictly comparable with data for earlier years because of change in reporting procedures for crude petroleum and natural gas companies.
[9] Excludes data for dimension stone quarries operated in conjunction with dressing plants.
[10] Excludes data for mining included in establishments classified in manufacturing industries.

World production, bituminous coal, lignite, and anthracite	1,997	2,899	3,079	3,086	3,188	3,295	3,322	[5] 3,356

Z Less than 500,000 short tons or $500,000. [1] Relates to mines having an output of 1,000 tons a year or more, including lignite and small output of anthracite produced outside Pennsylvania. [2] Includes anthracite. [3] Includes coal consumed by railroads (60,969,000 short tons in 1950, and 2,101,000 short tons in 1960) excluded in distribution. [4] Average number of men working daily. [5] Preliminary.

Average price cents per pound	28.8	37.3	32.1	35.4	58.2	52.0	51.2	59.5
World smelter production, new copper	3,280	3,630	5,040	6,105	6,752	6,739	7,300	(NA)

NA Not available. [1] Includes old tailings, smelted or retreated. Not comparable with mine production figures, which include recoverable copper content of ores not classified as "copper."
[2] Includes copper imported for immediate consumption plus material entering country under bond. Comprises copper in ingots, plates, and bars, ores and concentrates, regulus, blister, and scrap.
[3] Total exports of copper, excluding ore, concentrates, composition metal, and unrefined copper. Also excludes "Other copper manufactures," for which quantity not recorded before 1953. 1951–55 data not strictly comparable with later years due to changes in classification.

Source of tables 1153 and 1154: U.S. Bureau of Mines, *Minerals Yearbook*.

No. 1155. Iron Ore—Summary: 1950 to 1973

[**Quantities in thousands of long tons.** Excludes Alaska, Hawaii, and Puerto Rico, except for imports and exports. See also *Historical Statistics, Colonial Times to 1957*, series M 195–206]

Section 27
Construction and Housing

This section presents data on the construction industries and on various measures of construction activity and costs; housing units and financing and urban renewal.

The principal source of these data is the Bureau of the Census, which issues the monthly *Construction Reports* series (see below); the *Current Housing Reports* series, which comprises the quarterly *Housing Vacancies*, the quarterly *Market Absorption of Apartments*, and the irregularly-issued *Housing Characteristics;* and various reports of the censuses of housing and of construction industries. It also provides many of the data published by the Bureau of Domestic Commerce in the monthly *Construction Review*, compiling major construction statistics series of the Federal Government and also some series from private agencies. Other sources include the monthly *Dodge Construction Potentials* of F. W. Dodge Division, McGraw-Hill Information Systems Company, New York, N.Y., which presents State data on construction contracts; and the *Statistical Yearbook* of the Department of Housing and Urban Development.

Construction.—The first three censuses of the construction industry were taken for 1929, 1935, and 1939 as part of the censuses of business; the next census was taken for 1967 as part of the economic censuses. The latest census covers the year 1972.

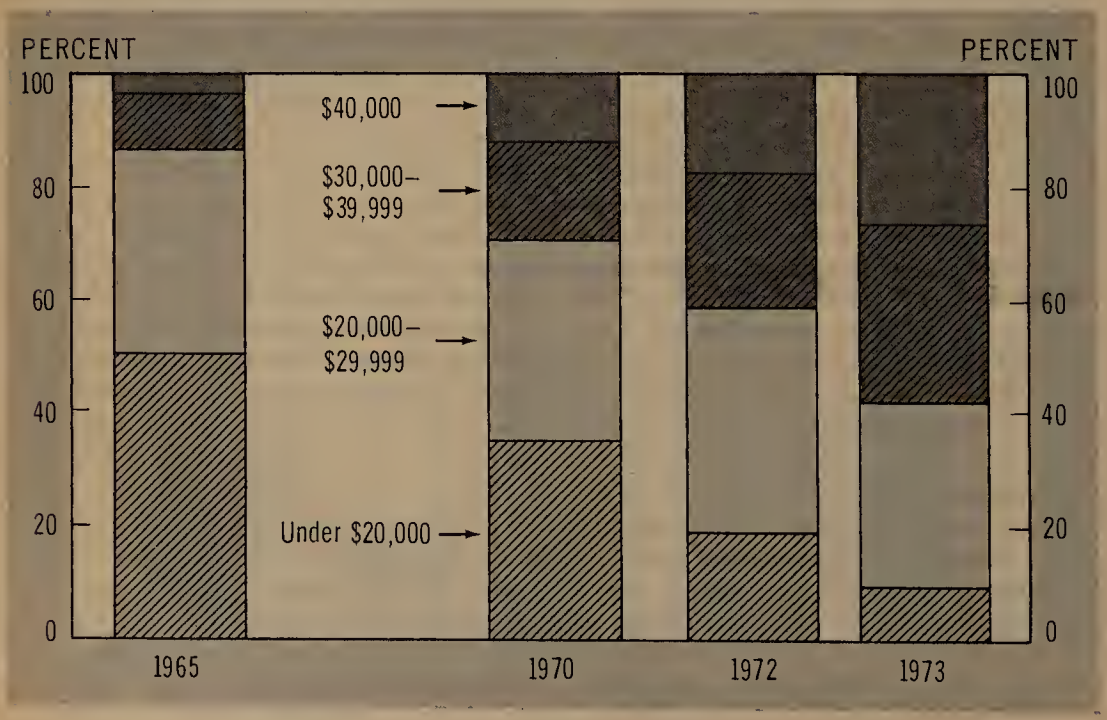
The 1972 Census of Construction Industries covered construction establishments as defined in the *Standard Industrial Classification Manual* issued by the Office of Management and Budget. A construction establishment was defined as a relatively permanent place of business where the usual business activities related to construction were conducted. Reports were required from all establishments with a payroll equivalent of 10 or more employees and all establishments operated by multi-establishment companies. Data for single unit companies with a payroll equivalent of less than 10 employees were estimated on the basis of a probability sample survey. In addition, limited data for more than 400,000 construction establishments without payroll were developed from Government administrative records. For information on 1967 published reports, see "1967 Census of Business" in Appendix II of this book. Preliminary industry reports for the 1972 census have been released; final industry and area reports should be available by the end of 1974.

Current construction statistics compiled by the Bureau of the Census appear in the *Construction Reports* series. Monthly statistics supplemented by quarterly or annual data are published in reports with the following subtitles: *Housing Starts* and *Housing Completions*, presenting data by type of unit; *Sales of New One-Family Homes*, which includes data also on homes available for sale; *Value of New Construction Put in Place*, which also includes monthly composite construction cost indexes and an annual price index for new one-family homes sold; *Housing Authorized by Building Permits and Public Contracts*, which covers approximately 14,000 permit-issuing jurisdictions in the United States and *Housing Units Authorized for Demolition in Permit-Issuing Places*, which covers approximately 4,000 jurisdictions issuing permits for demolition. Statistics on expenditures by owners of residential properties are issued quarterly in *Expenditures on Residential Additions, Alterations, Maintenance and Repairs, and Replacements* and annually in *Residential Alterations and Repairs*. Historical data on housing starts and building permits appear in *Housing Construction Statistics, 1899 to 1964*.

Housing.—From 1850 through 1930, the Bureau of the Census collected some housing data in conjunction with censuses of population and agriculture. Beginning in 1940, censuses of housing have been taken at 10-year intervals. For the 1970 census, data are presented on occupancy and structural characteristics, plumbing facilities, value, and rent. The 1970 data are limited to year round housing units.

Evaluation studies of the 1950, 1960, and 1970 censuses estimated erroneous omissions of occupied housing units at 2.9 percent, 2.4 percent, and 2.0 percent, respectively. These errors in the counts were partially offset by overenumeration of occupied housing units. In the 1950 and 1960 censuses, the net undercount of occupied units was estimated at 2.3 percent and 2.0 percent, respectively. The net undercount was not estimated for the 1970 census. The estimates for the various censuses are not strictly comparable due to differences in timing, procedures, and other factors. The census tabulations have not been adjusted to reflect the estimated undercounts.

Housing units.—In general, a housing unit is a group of rooms or a single room occupied or intended for occupancy as separate living quarters, that is, the occupants do not live and eat with any other persons in the structure, and there is either (1) direct access from the outside or through a common hall, or (2) complete kitchen facilities for the exclusive use of the occupants. Transient accommodations, barracks for workers, and institutional-type quarters are not counted as housing units.



Residential financing.—The Bureau of the Census began collection of detailed statistics on residential mortgages in 1890. In the 1920 and 1940 censuses, mortgage questions were asked of owners who occupied their own homes. In 1950, the census included a separate survey covering nonfarm residential mortgaged properties, both owner and renter. As part of the 1956 National Housing Inventory, data were collected on the financing of owner-occupied nonfarm properties. In 1960 and 1970, the Residential Finance Survey covered financing of both homeowner and rental properties and characteristics of nonmortgaged as well as mortgaged properties.

Data on home mortgages and foreclosures are provided by the Federal Home Loan Bank Board. The Housing Production and Mortgage Credit–FHA and the Veterans Administration compile data from their records on various aspects of home financing.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

FIG. XLIX. VALUE OF NEW PRIVATE NONFARM ONE-FAMILY HOMES SOLD: 1965 TO 1973

[See table 1189]

Source: Chart prepared by U.S. Bureau of the Census. Data from U.S. Bureau of the Census and U.S. Dept. of Housing and Urban Development, Office of the Deputy Undersecretary for Policy Analysis and Program Evaluation.

No. 1169. Value of New Construction Put in Place: 1955 to 1973

[**In millions of dollars, except percent.** Prior to 1960, excludes Alaska and Hawaii. Represents value of construction put in place during year; differs from building permit and construction contract data in timing and coverage. Includes installed cost of normal building service equipment and selected types of industrial production equipment (largely site fabricated). Excludes cost of shipbuilding, land, and most types of machinery and equipment. For 1915 to 1945, see *Historical Statistics, Colonial Times to 1957*, series N 1-28]

No. 1170. Value in Constant Dollars of New Construction Put in Place and Index of Physical Volume: 1955 to 1973

[**In millions of dollars, except as indicated.** Prior to 1960, excludes Alaska and Hawaii. Data in 1967 prices, based on revised figures shown in table 1169, are not directly comparable with data in 1957–59 prices for residential buildings, railroads, and petroleum pipelines. For details on derivation of constant values and description of revised series, see source. For 1915 to 1945, see *Historical Statistics, Colonial Times to 1957*, series N29–54]

NA Not available.

[1] For description of nature of revisions and the deflators used, see *Construction Reports*, series C30–72–4.

[2] For data in 1957–59 prices, 1957–59=100; other data, 1967=100.

[3] For the 1957–59 series: Years 1955–1965, only the totals include farm dwellings; 1970 excludes farms completely, although an estimate for all farm construction is included in total private construction. For the 1967 series, both totals and individual categories for all years shown include farm dwellings.

[4] Not available; estimate included in totals.

[5] Beginning 1965, new series, essentially comparable in level with old series. See *Construction Reports*, series C30–66S.

[6] Excludes building by privately owned public utilities.

[7] Includes construction with REA funds.

[8] Includes local transit.

[9] Beginning 1965, includes new 1957–59 series for State and local component of public construction. New and old series essentially comparable in level for total but not for most individual categories. See *Construction Reports*, series C30–66S.

[10] Prior to 1965, excludes military buildings.

Electric light and power [11]	84	102	107	118	125	110	119	128	135	144

NA Not available. [1] Includes value of site.

[2] Covers materials incorporated as integral part of a building or normally installed during construction and not readily removable. Excludes consumer durables, such as kitchen ranges, refrigerators, etc. Beginning 1965, applies to Alaska and Hawaii. Source: U.S. Bureau of Labor Statistics, unpublished data.

[3] Based on minimum wage rates agreed upon through collective bargaining; excludes overtime. As of July 1. Source: U.S. Bureau of Labor Statistics, *Union Wages and Hours: Building Trades*, annual.

[4] Covers both building and nonbuilding construction, excluding maintenance and repair. Represents a weighted average of various indexes used for different types of construction.

[5] Based on average contract unit bid prices for composite mile (involving specific average amounts of excavation, paving, reinforcing steel, structural steel, and structural concrete).

[6] Average for 30 cities of 4 types of buildings: Wood-frame, brick-wood frame, brick-steel frame, and reinforced concrete. Covers materials and labor costs in structural portion of buildings but excludes those for plumbing, heating, lighting, sprinklers, and elevators. Reflects employee-benefit costs, and allows for contractors' overhead and profit.

[7] Average of 20 cities for types shown. Weights based on surveys of building costs. Wage rates used for both common and skilled labor. Reflects payment of sales taxes and social security payroll taxes.

[8] Building construction index computed on basis of hypothetical unit of construction requiring 6 bbl. of Portland cement, 1.088 M bd. ft. of 2″ x 4″ lumber, 2,500 lb. of structural steel, and 68.38 hours of skilled labor. General construction index based on same materials components combined with 200 hours of common labor.

[9] Eastern cities. Based on firm's cost experience with respect to labor rates, materials prices, competitive conditions, efficiency of plant and management, and productivity. Reflects payment of sales taxes and employee-benefit costs.

[10] Based on data covering public utility construction costs for 95 items in 6 geographic regions. Covers skilled and common labor; does not reflect tax payments nor employee-benefit costs.

[11] As derived by U.S. Bureau of the Census. Covers steam production plants only; excludes hydraulic plants.

Percent of single-family private starts and mobile homes	18.3	21.8	22.2	26.1	33.7	33.0	30.1	30.5	33.9

[1] Includes farm housing. [2] A mobile home is a vehicular portable structure built on a chassis and designed to be used without a permanent foundation as a year-round dwelling when connected to utilities. The homes are defined as units more than 8 feet wide and 35 feet or longer and weighing over 4,500 pounds.

No. 1188. Characteristics of New Privately-Owned One-Family Homes: 1969 to 1973

[**Percent distribution, except total homes.** Data beginning 1971 show percent distribution of characteristics for all homes completed (includes new homes completed, homes built for sale completed, contractor-built and owner-built homes completed, and homes completed for rent). Data for 1969 and 1970 cover contractor-built, owner-built, and homes for rent for year construction started and homes sold for year of sale. Percents exclude homes for which characteristics specified were not reported. See also headnote, table 1189]

No. 1191. Vacancy Rates—Inside and Outside Standard Metropolitan Statistical Areas, and Regions: 1960 to 1974

[In percent. Annual averages, except as indicated. Based on Current Population Survey; see text, p. 1. Rate is relationship between vacant housing for rent or for sale and the total supply, which comprises occupied units, units already rented or sold and awaiting occupancy, and vacant units available for rent. For composition of regions, see fig. I, inside front cover; for definition of standard metropolitan statistical areas, see section 34]

Rate and period	United States	Inside SMSA's [1]	Outside SMSA's [1]	Regions			
				Northeast	North Central	South	West
Rental/vacancy rate:							
1960	8.1	7.0	10.3	4.9	8.3	9.5	11.5
1965	8.3	8.0	8.8	5.6	7.2	9.0	11.9
1970	5.3	4.9	6.4	2.7	5.8	7.2	5.6

No. 1194. Housing Units—Summary of Characteristics: 1960 and 1970

[In thousands, except percent. For definition of median, see p. XII]

ITEM	1960	1970
All housing units	58,326	68,679
Vacant, seasonal, and migratory	1,742	1,022
All year-round units	56,584	67,657
Urban	40,764	50,143
Rural	17,562	18,536
Units in 1-unit structures [1 2]	44,525	46,791
Percent of total	76.4	69.1
Units in 2–4 unit structures [2]	7,552	9,007
Units in 5-or-more unit structures [2]	6,238	9,829
Units lacking some or all plumbing facilities [2]	7,699	4,672
Percent of total	13.2	6.9
Year structure built: [2]		
1965 or later	(X)	8,874
1960–1964	(X)	8,082
1950–1959	16,046	14,499
1940–1949	8,640	8,786
1939 or earlier	33,632	27,458
Percent units built prior to 1940	57.7	40.6
Occupied units, total	53,024	63,450
With Negro head of household	(NA)	6,180
Percent of total occupied	(NA)	9.7
Owner-occupied units	32,797	39,885
With value of— [3]		
Less than $5,000	3,182	1,934
$5,000–$9,999	6,747	4,966
$10,000–$14,999	7,632	6,403
$15,000–$19,999	4,723	6,435
$20,000–$24,999	1,900	4,674
$25,000–$34,999	1,227	4,436
$35,000 or more	762	3,041
Median value—dol	11,900	17,000
Occupied units, total—Continued:		
Renter-occupied units	20,227	23,565
With monthly rent of— [4]		
Less than $40	2,277	1,864
$40–$59	3,999	2,925
$60–$79	4,906	4,098
$80–$99	3,490	3,301
$100–$119	1,693	2,520
$120–$149	973	3,024
$150 or more	571	3,274
Median monthly rent—dol	71	89
Units with— [2]		
1–2 rooms	4,409	3,764
3–4 rooms	19,425	21,701
5 rooms	14,323	16,874
6-or-more rooms	20,161	25,318
Median number of rooms	4.9	5.0
Persons per unit—median	3.0	2.7
Units with— [5]		
Telephone—percent	78.5	81.6
Air conditioning—percent	12.4	35.8
Home food freezer—percent	18.4	28.2
One or more automobiles—percent	78.4	82.5
Vacancy rate:		
Homeowner units	1.6	1.2
Rental units	6.7	6.6

NA Not available. X Not applicable. [1] Excludes mobile homes or trailers. [2] Based on a complete count but tabulated on a 20-percent sample basis. [3] Limited to one-family homes on less than 10 acres and no business on property. [4] Excludes one-family homes on 10 acres or more. [5] Occupied housing units.

X Not applicable. [1] Occupied or available for occupancy.
[2] Comprises units to be constructed and units that will go directly into "under management" category because they need no rehabilitation.
[3] Excludes units which have been sold to mutual housing associations, limited dividend corporations (PWA), and homestead associations on which HUD has mortgages for collection.
[4] Covers units designed specifically for persons 62 years old or over, disabled, or handicapped.
[5] New housing constructed on the Local Housing Authority (LHA) site pursuant to a contract let by the LHA.
[6] New housing purchased by the LHA from a private developer upon completion of construction pursuant to an earlier agreement.
[7] Existing housing acquired by the LHA, requiring substantial rehabilitation which can be done either by the LHA (conventional) or by the seller (turnkey).
[8] Existing housing leased by the LHA from an owner under a contract permitting the LHA to sub-lease the units.

NA Not available.

[1] Statistics on the number of occupied units are essentially comparable although identified by various terms—the term "family" applies to figures for 1930 and earlier; "occupied dwelling unit," 1940 and 1950; and "occupied housing unit," 1960 and 1970. For 1910 and 1920, includes the small number of quasi-families; 1900 and 1930 represent private families only.

[2] From 1950 to 1970, population in occupied housing units was determined by dividing population in housing units by number of occupied housing units.

[3] Not comparable with data for earlier censuses because of a basic change in definition of farm residence. For definitions used in 1960 and 1970, see text, p. 2.

[4] For 1900 to 1920, includes a small proportion of urban-farm families in addition to rural-farm.

[1] For definition of median, see p. XII. [2] Includes hot and cold piped water, as well as a flush toilet and bathtub or a shower inside the structure for exclusive use of the people in the unit.
[3] Base is total of units occupied by owners and available vacant units for sale.
[4] Base is total of units occupied by renters and available vacant units for rent.

No. 1201. First Homes, 1967 and 1970, and Second Homes, 1967

[**In thousands, except as indicated.** As of April. Based on sample of households. A second home is a residence other than the one where the household usually lives, which was owned or rented by the household for the entire year. The home must have been reserved for the occasional use of the owner during the entire year. Includes homes shared with co-owners or co-renters. Excludes homes outside the United States, those used for income and investment purposes only, trailers, tents, etc.]

FIG. L. INDUSTRIAL PRODUCTION INDEXES: 1965 TO 1973

[1967=100. See table 1218]

Source: Chart prepared by U.S. Bureau of the Census. Data from Board of Governors of the Federal Reserve System.

Section 28

Manufactures

This section presents measures of the manufacturing segment of the economy and its component inputs and outputs. The input data include figures for establishments; employment and wages; raw materials, fuels, and electricity consumed; plant and equipment expenditures; and water use. The output data include figures for value and quantity of production and shipments; and value added by manufacture. Both types of data are shown for manufacturing as a whole, for major product groups, and for specific selected products.

The principal sources of these data are the Bureau of the Census reports of the quinquennial Census of Manufactures; the *Annual Survey of Manufactures;* and the *Current Industrial Reports* series, which presents monthly, quarterly, or annual data on production, shipments, and stocks for particular commodities. Indexes of industrial production are presented monthly in the Federal Reserve Board's *Federal Reserve Bulletin*. Reports on current activities of industries, or current movements of individual commodities, are also compiled by such government agencies as Bureau of Labor Statistics, Statistical Reporting Service of the Department of Agriculture, Bureau of Domestic Commerce, Fish and Wildlife Service, Tariff Commission, and Internal Revenue Service; and by private research or trade associations such as the American Iron and Steel Institute and the National Canners Association, both in Washington, D.C., and the National Association of Hosiery Manufacturers, Charlotte, N.C.

Data on financial operations and intercorporate relations of manufacturing corporations are collected from time to time by the Securities and Exchange Commission, the Tariff Commission, and the Federal Trade Commission. Financial statistics for certain manufacturing industries in the form of balance sheets, profit and loss statements, analyses of sales and expenses, lists of subsidiaries, and types and amounts of security issues are summarized and published for the leading corporations registered with the Securities and Exchange Commission. The Tariff Commission publishes commodity surveys which cover economic and competitive aspects of production, distribution, and international trade in selected important industries. The Federal Trade Commission has made several comprehensive studies of individual industries.

Censuses and annual surveys.—The first Census of Manufactures covered the year 1809. Thereafter, a census was taken at 10-year intervals to 1899, with the exception of 1829. It was conducted at 5-year intervals from 1904 through 1919, and at 2-year intervals from 1921 through 1939. It was suspended during the World War II period until the 1947 census. Thereafter, censuses were taken covering 1954, 1958, 1963, 1967, and 1972.

The *Annual Survey of Manufactures*, conducted for the first time in 1949, carries forward, for the intercensal years, measures of manufacturing activity covered in detail by the quinquennial Census of Manufactures. It provides statistics on employment, payrolls, value added by manufacture, value of shipments, inventories, new capital expenditures, and value of fixed assets for industry groups, individual industries, geographic divisions, States, and large standard metropolitan statistical areas.

The most recent annual survey is based on a sample of about 70,000 of an approximate total of 310,000 manufacturing establishments. It comprises all large plants, which account for approximately two-thirds of total manufacturing employment in the United States, and a representative selection of the more numerous small plants. Government-owned and -operated establishments are excluded.

Establishments and classification.—The Census of Manufactures for 1947 through 1972 covered operating manufacturing establishments as defined in the *Standard Industrial Classification Manual* issued by the Office of Management and Budget. The 1972 edition of the *Manual* was used for the 1972 census. Reports were required from all establishments employing one or more persons at any time during the census year. In the 1967 and 1972 census, reports were required only from establishments with 10 or more employees and establishments operated by multi-establishment companies. Data for single unit companies with less than 10 employees were estimated on the basis of Government administrative records and industry averages. Each of the establishments tabulated was classified in one of the more than 450 manufacturing industries as defined by the Standard Industrial Classification system in 1972, as compared to 400 industries in the 1967 Census. This system defines an industry as a number of establishments producing a single product or a closely related group of products. An establishment is classified in a particular industry if its production of this product or product group exceeds in value its production of any other product group. In a few instances, the industry classification of an establishment is determined not only by its product group but also by the processes employed in making the products.

Final reports for the 1972 Census of Manufactures present data based on the classifications in the 1972 edition of the *Standard Industrial Classification Manual.* Wherever possible, data for previous censuses are presented. However, for some industries and industry groups comparable data are not available.

While some establishments produce only the products of the industry in which they are classified, it rarely happens that all the establishments in an industry specialize to that extent. The statistics on employment, payrolls, value added, inventories, and expenditures, therefore, reflect not only the primary activities of the establishments in that industry but also activities of a secondary nature. For this reason the industry statistics usually cannot be directly related to statistics on the total shipments of products primary to the industry.

The censuses for 1947 through 1972 were conducted on an establishment basis. The term "establishment" signifies a single physical plant site or factory. It is not necessarily identical with the business unit or company, which may consist of one or more establishments. A company operating establishments at more than one location is required to submit a separate report for each location. An establishment engaged in distinctly different lines of activity and maintaining separate payroll and inventory records is also required to submit separate reports.

The basic statistical measures of manufacturing activity, such as employment, payrolls, value added, etc., are defined in essentially the same way for the annual surveys as for the Census of Manufactures. Consequently, these series may be considered comparable, except for the changes brought about by the revisions in the industry classification system noted above. However, beginning with 1949, average employment was calculated from the figures reported for the pay periods ending nearest the fifteenth of March, May, August, and November, whereas for 1947 such averages were based on 12 monthly employment figures. In 1967 and 1972, the average employment calculation was revised to the pay periods which include the 12th of March, May, August, and November in order to provide data more comparable with other statistical series. The 1954 figures are an average of reported employment totals for the four specified months, except for highly seasonal industries, where a 12-month average was obtained. For 1958 and later censuses, averages of production workers for the four specified months plus the March figure for "all other employees" were used for all industries.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

Technical Note—Annual Survey of Manufactures

The annual survey data are estimates derived from a sample survey. They are apt to differ somewhat from the results of a survey covering all companies in the sampled lists but otherwise conducted under essentially the same conditions as the actual sample survey. Measures of the potential differences between the estimates obtained and the results theoretically obtainable from a comparable complete coverage survey—"Relative standard errors"—are presented in the Annual Survey of Manufactures reports. In addition to the errors due to sampling, individual figures may be subject to biases arising from undetected response or procedural errors. Such nonsampling errors are partly reflected in the "standard errors" as derived, which are usually of the same order of size or only moderately lower than the total error. For particular estimates, however, the total error may considerably exceed the "standard error" shown.

No. 1217. Manufactures—Summary: 1947 to 1972

[Prior to 1958, excludes Alaska and Hawaii. Census data through 1967; thereafter, estimates based on sample, see text, pp. 711–713. Covers all establishments employing 1 or more persons at any time during year. See also *Historical Statistics, Colonial Times to 1957*, series P 1–8]

NA Not available. [1] Beginning 1958, includes administrative offices and auxiliary units.
[2] Includes data for employees of manufacturing establishments engaged in distribution and construction work. Beginning 1954, includes administrative offices and units auxiliary to manufacturing.
[3] Data for most industries in 1954 are based on pay periods ending nearest 15th of March, May, August, and November. For 1947, and industries of a seasonal type in 1954, data represent average of 12 monthly figures.
[4] Unadjusted for 1947; thereafter, adjusted. Unadjusted value added is obtained by subtracting cost of materials, supplies, containers, fuel, purchased electric energy, and contract work from value of shipments for products manufactured plus receipts for services rendered. Adjusted value added also takes into account (a) value added by merchandising operations (that is, difference between the sales value and cost of merchandise sold without further manufacture, processing, or assembly), plus (b) net change in finished goods and work-in-process inventories between beginning and end of year. [5] Includes extensive and unmeasurable duplication from shipments between establishments in the same industry classification.
[6] Beginning 1954, includes plants under construction and not yet in operation.

No. 1222. Index of Manufacturing Capacity and Relation of Output to Capacity: 1950 to 1974

[1967 output=100. Annual figures are averages of quarterly data. Capacity represents estimated quantity of output, relative to output in 1967, which the *current* stock of plant and equipment in manufacturing industries was capable of producing. Primary processing industries comprise textiles, lumber, paper and pulp, petroleum, rubber, stone, clay, glass, primary metals, fabricated metals, and a portion of chemicals. Advanced processing industries comprise chemical products, food, beverages, tobacco, apparel, furniture, printing and publishing, leather, machinery, transportation equipment, instruments, ordnance, and miscellaneous industry groups]

Year	Index of capacity	Relation of output to capacity (percent): All manufacturing	Primary processing	Advanced processing
1950	50	92	98	89
1955	64	90	94	88
1960	79	80	79	80
1965	100	89	91	88
1967	114	88	86	89
1968	121	88	87	88
1969	128	87	89	85
1970	135	78	82	76
1971	140	75	79	73
1972	145	79	85	75
1973 (prel.)	150	83	90	79
1974, 1st qtr. (prel.)	154	80	87	76

No. 1233. Percent of Shipments Accounted for by Large Manufacturing Companies, Selected Industries: 1947 to 1970

[Prior to 1967, excludes Alaska and Hawaii. First 50 industries as determined by value added by manufacture in 1970. Industry codes and descriptions are based on the 1967 *Standard Industrial Classification Manual* (SIC). Determination of company affiliation of establishment is based on census reports and publicly available records. "Largest" companies are determined by each company's value added by manufacture *in the specified industry*. Industries in the "not elsewhere classified" category are omitted, regardless of their value added]

D Withheld to avoid disclosure. NA Not available.
S Withheld because data did not meet publication standards. X Not applicable.

[1] Standard Industrial Classification code.

[2] Derived by subtracting total cost of materials, supplies, fuel, electric energy, cost of resales, and contract work done by others from value of shipments including resales, and other receipts and adjusting resulting amount by net change in finished products and work-in-process inventories between beginning and end of year.

[3] Comprises for all manufacturing establishments classified in an industry value of (a) products primary to the industry, (b) secondary products which are primary to other industries, (c) miscellaneous receipts such as those for contract and commission work on materials owned by others, scrap, salable refuse, repair, etc., and (d) resales, i.e., products resold in the same condition as bought.

[4] Percent computed on value added as there was substantial duplication in data for value of shipments.

[6] A number of small establishments were misclassified into this industry affecting the number of companies, but having no appreciable effect on value or percentage of shipments.

[6] Value of work done reported instead of value of shipments; therefore, value added not adjusted for inventory change.

[7] Value of production reported instead of value of shipments; therefore, formula for computing adjusted value added modified to include only changes in work-in-process inventories between beginning and end of year.

[8] Includes foundries producing gray-iron castings for other plants of the same company. Accordingly, percentages do not reflect market shares in industry as such.

49	Costume jewelry and notions	396	53	214	415	1,608	52	252	528
50	Misc. manufactures [10]	399	379	2,631	4,155	6,932	544	4,345	7,163
51	**Administrative and auxiliary** [9 11]	60	728	6,615	(X)	5,460	831	8,728	(X)

D Withheld to avoid disclosing figures for individual companies. S Figure does not meet publication standards. X Not applicable.

[1] Standard Industrial Classification code.

[2] "All employees" represents the average of "production workers" plus all other employees for the payroll period ended nearest the 15th of March.

[3] Value of shipments less cost of materials, supplies, containers, fuels, purchased electricity, and contract work, plus net change in finished goods and work-in-process inventory, and value added in merchandising activities of manufacturing establishments.

[4] Includes extensive duplication arising from shipments between establishments in the same industry classification.

[5] Includes expenditures for plants in operation and plants under construction but not yet in operation.

[6] Includes industries not shown separately.

[7] Beginning 1972, data not strictly comparable with earlier data due to differences in coverage.
[8] Value of production. The formula for computing value added by manufacture was modified to exclude any change in finished products inventories between beginning and end of year.
[9] Beginning 1967, data not strictly comparable with data for 1963 due to difference in coverage.
[10] Through 1967, includes ordnance from privately owned and/or operated establishments classified in "Ordnance and accessories." Excludes Government-owned and operated equipment.
[11] Manufacturing concerns often reported separately for central offices or auxiliaries which serve the manufacturing establishments of a company, rather than the general public. Separate reports were obtained from such units if at a different location or if they serviced more than one establishment.

[1] Includes central administrative offices and auxiliary units.
[2] Includes employment and payroll at administrative offices and auxiliary units.
[3] "Production workers" represents the average of the employment for the payroll periods ended nearest the 12th of March, May, August, and November. "All employees" represents the average of "production workers" plus all other employees for the payroll period ended nearest the 12th of March.

BY STATES: 1963, 1967, AND 1972

Z Less than 0.01 percent. [1] Barrels of 31 wine gallons (see footnote 10). [2] Source: U.S. Bureau of Domestic Commerce. Based on U.S. Bureau of the Census estimated population 18 years old and over, as of Jan. 1, including Armed Forces abroad. Prior to 1960, excludes Alaska and Hawaii.

[3] Prior to 1960, represents registered distilleries, fruit distilleries, and industrial alcohol plants. In some instances, a plant was operated at different times in more than one of these categories and was counted in each.

[4] Prior to 1960, represents internal revenue bonded warehouses and industrial alcohol bonded warehouses.

[5] Prior to 1960, net production obtained by deducting total products used in redistillation from gross production of neutral product (spirits); thereafter, each kind of distilled spirits used in redistillation was deducted from gross production of same kind. [6] Excludes alcohol produced for industrial use.

[7] A tax gallon for spirits of 100 proof or over is equivalent to the proof gallon; for spirits of less than 100 proof, to the wine gallon. (See footnotes 8 and 10.) [8] A proof gallon is the alcoholic equivalent of a U.S. gallon at 60° F, containing 50 percent of ethyl alcohol by volume. [9] Includes ethyl alcohol.

[10] A wine gallon is the U.S. gallon, equivalent to the volume of 231 cubic inches.

[11] Production represents total amount removed from fermenters, including distilling material, and beginning 1970, includes increase after fermentation (by amelioration, sweetening, and addition of wine spirits). In 1970, 407 million gallons of distilling materials were produced; in 1971, 293 million gallons; in 1972, 407 million gallons and in 1973, 258 million gallons.

[12] Includes special natural wines. [13] Excludes distilling materials.

[14] Includes champagne, other effervescent wines, and artificially carbonated wines.

[1] Represents all spindles in place regardless of fiber spun.
[2] Comprises cotton-system spindles active last day of year, regardless of type of fiber spun. On Aug. 4, 1973 there were 9,934,000 spindles active on cotton, 7,899,000 on synthetics and other fibers and blends, and 1,339,000 idle
[3] Includes foreign and domestic cotton.
[4] Linters stocks are stocks held by consuming establishments. Cotton stocks include stocks at public storage and compresses.

Sodlum silicate (soluhle silicate glass, llquld and solid) (anhydrous) [13]	1,000 sh. tons	497	588	628	661	727
Sodium sulfate:						
High purlty (more than 99% Na_2SO_4)	1,000 sh. tons	303	428	812	801	848
Glauber's salt (100% $Na_2SO_4 \cdot 10H_2O$)	1,000 sh. tons	32	[14] 976	561	526	573
Lower purlty (99% or less Na_2SO_4)	1,000 sh. tons	738				
Sulfurlc acid, gross (100% H_2SO_4) [15]	Mil. sh. tons	18	25	30	31	32
Titanium dioxide (composite and pure) (100% TiO_2)	1,000 sh. tons	456	577	655	718	772

D Withheld to avoid disclosing figures for individual companies. NA Not availahle.

[1] Excludes quantltles of acetylene produced and consumed hy rallroad shops, shipyards, and small estahlishments uslng portahle generators. [2] Excludes quantities produced and consumed hy municipalities.

[3] Excludes hyproduct coke-oven productlon.

[4] Includes data for dccolorizing and water purification grades only.

[5] Excludes quantities produced and consumed in plants manufacturing soda ash or urca.

[6] Total production, including quantities liquefied for use, storagc, or shipment.

[7] Beginning 1960, excludes quantities produced and consumed in manufacture of methanol and ammonia, produced hy ammonia dlssoclation process, or disposed of as waste, e.g., vented, used as fuel, etc. Beginnlng 1970, excludes amounts of hydrogen produced in petroleum refineries for captive use. [8] Combined with low purlty.

[9] Includes quantitles used to manufacture caustic soda, sodium hlcarhonate, finished light and dense soda ash.

[10] Ammonia soda and caustic carhonation processes. [11] Excludes quantities converted to finished dense soda ash.

[12] Collected by or ln cooperation with Bureau of Mines.

[13] Excludes amounts produced and consumed ln making meta-, ortho-, and sesquisilicates.

[14] Includes Glauher's salt converted to 100% Na_2SO_4. [15] Includes sulfuric acld of oleum grades.

No. 1266. Copper-Base Mill and Foundry Products—Shipments: 1950 to 1972

[**In millions of pounds, metal weight.** Excludes Alaska and Hawaii]

TYPE OF PRODUCT	1950	1955	1960	1965	1968	1969	1970	1971	1972 (prel.)
Total	5,037	5,130	4,298	6,288	5,824	6,548	5,640	5,820	6,452
Brass mill products	2,554	2,532	1,878	2,974	2,757	3,111	2,513	2,711	2,985
Alloyed [1]	1,663	1,644	1,128	1,711	1,778	1,936	1,542	1,632	1,859
Unalloyed	890	888	750	1,263	979	1,175	971	1,079	1,126
Copper wire mill products [2]	1,427	1,556	1,521	2,177	2,213	2,524	2,329	2,354	2,647
Brass and bronze foundry products	1,057	999	862	1,075	791	853	751	705	767
Copper-base powder mill products	(NA)	43	39	62	63	60	47	50	54

NA Not available.
[1] Excludes webbing scrap generated in production of military ammunition cups and discs. [2] Copper content.

No. 1267. Machinery (Except Electrical)—Value of Shipments: 1950 to 1972

[**In millions of dollars.** Prior to 1960, excludes Alaska and Hawaii. Based on sample and subject to sampling variation; see Technical Note, p. 713]

CLASS OF PRODUCT	1950	1955	1960	1965	1969	1970	1971	1972 (prel.)
Addressing, dictating, duplicating and other office machines, n.e.c.	206	271	247	312	443	402	426	504
Automatic vending machines	(S)	(S)	185	240	290	266	309	336
Ball and roller bearings and components	450	674	836	1,224	1,386	1,295	1,258	1,441
Blowers and fans	130	274	269	386	567	647	693	675
Commercial laundry, dry-cleaning, and pressing machines.[1]	77	87	120	178	224	204	195	182
Electronic computing equipment [1]	(NA)	(NA)	(NA)	2,964	5,213	5,671	5,169	6,228
Calculating and accounting machines [1]					577	525	447	688
Carburetors, pistons, and other machinery prod.	(S)	883	1,252	1,943	633	530	654	687
Construction machinery, except tractors	974	1,456	1,451	2,444	2,554	2,630	2,673	3,911
Mining machinery			338	444	574	715	841	738
Conveyors and conveying equipment	241	419	367	532	744	814	819	829
Domestic laundry equipment	532	733	695	871	1,025	1,024	1,125	1,286
Elevators and moving stairways [1]	102	131	205	261	317	326	384	404
Fabricated pipe [2] made from purchased pipe	(S)	210	224	348	475	514	545	652
Farm machinery (except tractors)	1,052	1,128	1,449	2,060	3,053	3,065	3,184	4,090
Food products machinery	324	383	462	617	792	823	795	837
Heat exchangers and steam condensers	77	124	146	240	397	424	479	447
Hoists, cranes, and monorails	(S)	(S)	201	292	460	487	453	448
Household mech. refrigerators, incl. electric and gas	925	713	624	796	1,003	946	1,023	1,192
Industrial furnaces and ovens	72	159	215	309	382	377	336	327
Industrial trucks, tractors, trailers, and stackers [1]	166	312	389	637	1,010	890	865	992
Internal combustion engines, exc. auto. and aircraft	(NA)	(NA)	1,215	1,762	2,885	2,762	2,927	3,407
Mechanical power-transmission equipment	442	700	711	1,095	1,441	1,412	1,342	1,573
Mechanical stokers [1]	19	16	(NA)	6	2	2	1	1
Metal-cutting machine tools [1]	363	801	747	1,386	1,794	1,544	1,113	1,269
Boring and drilling machines	63	131	86	179	(S)	205	142	149
Grinding and polishing	61	124	117	223	274	237	171	180
Lathes and milling	126	243	215	397	(S)	403	245	289
Metal forming machine tools	515	782	379	569	713	735	585	692
Presses, incl. forging	[3] 91	171	105	214	240	242	184	196
Office machines	208	271	247	312	555	513	521	[4] 1,076
Oil and gas field machinery and tools, incl. drilling equipment	333	647	507	685	813	934	962	923
Paper industries machinery [1]	115	207	348	424	505	455	451	372
Printing trades machinery and equipment [1]	201	248	350	482	701	657	576	717
Pumps and compressors	504	924	1,107	1,614	2,100	2,203	2,197	2,357

Section 29
Distribution and Services

This section presents statistics relating to retail and wholesale trades and selected service industries. Data shown for the distribution trades, classified by kind of business, and for the various categories of services (personal, business, repair, amusement, hotel, etc.) cover sales or receipts, establishments, employees, payrolls, proprietors, and other items. Also included are several tables on advertising expenditures.

The principal sources of these data are the reports of the Census of Business and of annual and monthly surveys conducted by the Bureau of the Census. Data on retail sales, wholesale inventories and sales, consumer expenditures for services, etc. appear in the monthly *Survey of Current Business*, issued by the Bureau of Economic Analysis (formerly the Office of Business Economics). Financial data for tax-filing and securities-listed corporations engaged in retail, wholesale, or service activities, and for sole proprietorships and partnerships similarly engaged, appear in the annual *Statistics of Income*, published by the Internal Revenue Service, and are also available from the Securities and Exchange Commission. The Federal Trade Commission collects operating statistics on firms and chains in various kinds of business.

Censuses and current surveys.—Censuses of business have been taken at intervals since 1929. Beginning with the 1967 census, legislation provides for a quinquennial census to be conducted for years ending in "2" and "7".Only preliminary and incomplete results from the 1972 census, conducted in 1973, were available in July 1974.

Current sample surveys conducted by the Bureau of the Census cover various aspects of the retail and wholesale trades and selected service industries. Estimates of weekly sales in retail stores are shown for the United States, by kind of business, in the Bureau's *Weekly Retail Sales Report*. Its *Monthly Retail Trade Report* contains monthly estimates of sales and end-of-month accounts receivable of all retail stores, and of retail organizations operating 11 or more stores, for the United States, by kind of business. Also included are monthly retail sales data for census regions and divisions, 15 large States, and 20 large standard metropolitan statistical areas. Annual figures on sales, sales-stock ratios, merchandise purchases, and year-end inventories and accounts receivable, by kind of business, appear in the *Annual Retail Trade Report*.

Statistics from the Bureau's monthly wholesale trade survey include merchant wholesalers' sales, inventories, and stock-sales ratios by kind of business, for the United States, as well as sales and inventory trends by kind of business and by geographic divisions. Monthly sales estimates are also shown by geographic divisions for the summary groups—durable and nondurable goods wholesalers and all wholesalers combined. These data, based on reports submitted by a sample of firms, appear in the *Monthly Wholesale Trade Report*. The monthly *Selected Services Receipts Report* provides monthly estimates of receipts for six major kind-of-business groups for the United States as a whole. These data also appear in the *Survey of Current Business*.

Estimates obtained from annual and monthly surveys are based on sample data and are not expected to agree exactly with results that would be obtained from a complete census of all establishments. Data include estimates for establishments not reporting; however, measures of sampling variability, shown in the source reports, exclude biases arising from differences of response or from nonreporting.

Establishments and coverage.—The business establishments covered in the Census of Business are classified into 3 groups as follows: (1) *Retail trade,* places of business primarily engaged in selling merchandise for personal or household consumption; (2) *Wholesale trade,* establishments primarily engaged in selling goods to dealers and distributors for resale or to purchasers who buy for business uses; and (3) *Selected services,* establishments engaged primarily in the sale of services as contrasted with the sale of merchandise. Figures for establishments refer to those in business at the end of the year.

The Census of Business excludes the activities of doctors, dentists, and others performing a professional or scientific service except that dental laboratories, law firms, architects, and engineers were covered in the 1967 census (see table 268). Also excluded are educational institutions; religious or charitable institutions; hospitals and infirmaries; public utilities; and Government-operated enterprises, except wholesale and retail liquor operations.

Data from the 1958 census exclude retail and service nonemployer establishments which had receipts of less than $2,500 and $1,000, respectively. In the 1963 and 1967 censuses, nonemployer establishments which did not operate the entire year were included if, during the period they operated, their receipts were at a rate which would have reached the annual totals specified had they operated the entire year. Wholesale trade establishments with no paid employment are excluded.

Advertising.—The statistics on advertising expenditures are compiled by private organizations. McCann-Erickson, Inc., which compiles certain of the data shown, defines national advertising as the advertising done for companies whose products are distributed nationally, and for which national media rates are paid; and local advertising as the advertising done for companies which market their products locally and which may pay special "local" media rates. Monthly figures are published regularly in *Advertising Age* and in the *Survey of Current Business.* Total corporate expenditures for advertising, by industry, appear in *Statistics of Income.*

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957.* See preface.

Section 30

Foreign Commerce and Aid

This section presents data on the flow of goods, services, and capital between the United States and other countries; changes in official gold reserves of the United States; international investments; foreign assistance programs; and import duties.

The Bureau of Economic Analysis (formerly the Office of Business Economics) publishes current figures on the U.S. balance of payments and international investment position in its monthly *Survey of Current Business*, and on total foreign aid by the Federal Government in its periodic *Foreign Grants and Credits by the United States Government*. Figures for earlier periods are presented in *Balance of Payments—Statistical Supplement*, 1963 revised edition, and in the June issues of the *Survey of Current Business*. Statistics for the foreign aid programs are presented by the Agency for International Development in its semiannual *Operations Report* and in two annual reports, *U.S. Economic Assistance Programs Administered by the Agency for International Development and Predecessor Agencies* and *U.S. Overseas Loans and Grants, and Assistance from International Organizations;* and by the Department of Agriculture in its *Foreign Agricultural Trade of the United States*. Geographic data on foreign income received by U.S. corporations and foreign taxes paid on this income are presented by the Internal Revenue Service in its *Supplemental Statistics of Income* reports.

The principal sources of import and export data are publications of the Bureau of the Census. Current data are presented monthly in Report FT 135, *U.S. Imports, General and Consumption, Schedule A Commodity by Country*; Report FT 410, *U.S. Exports, Schedule B Commodity by Country*; and Report FT 990, *Highlights of U.S. Export and Import Trade*. Historical data appear in *Foreign Commerce and Navigation of the United States*, issued annually through 1946 and resumed in 1965 with a volume covering the years 1946 to 1963, followed by volumes for 1964 and 1965. For a complete list of the Bureau's monthly and annual reports in this field, consult the *Bureau of the Census Catalog* and the *Guide to Foreign Trade Statistics* (issued annually since 1967). In addition, the Bureau of International Economic Policy and Research and the Bureau of Economic Analysis present summary and selected commodity and country data for U.S. foreign trade in the *Overseas Business Reports* and the *Survey of Current Business*, respectively. The Treasury Department's *Annual Report of the Secretary* contains information on import duties.

International accounts.—The balance of payments table (No. 1308) shows, for given time periods, the transfer of goods, services, grants, and financial assets and liabilities between the United States and the rest of the world.

The international investment position table (No. 1310) presents for specific dates the value of U.S. investments abroad and of foreign investments in the United States. The movement of foreign and U.S. capital as presented in the balance of payments is not the only factor affecting the total value of foreign investments. Among the other factors are: Changes in the valuation of assets or liabilities, including securities; defaults; expropriations; write-offs; and reinvested earnings of subsidiaries operating abroad and of foreign subsidiaries operating in the United States.

Foreign aid.—Foreign assistance is divided into three major categories—grants (military supplies and services, and other grants), credits, and other assistance (through net accumulation of foreign currency claims from the sale of agricultural commodities). The U.S. Government's capital investments in the international financial institutions constitute an additional measure taken by the Government to promote foreign economic recovery and development.

Grants are transfers for which no payment is expected (other than a limited percentage of the foreign currency "counterpart" funds generated by the grant), or

which at most involve an obligation on the part of the receiver to extend aid to the United States or other countries to achieve a common objective. *Credits* are loan disbursements or transfers under other agreements which give rise to specific obligations to repay, over a period of years, usually with interest. In some instances, assistance has been given with the understanding that a decision as to repayment will be made at a later date; such assistance is included in grants. At such time as an agreement is reached for repayment over a period of years, a credit is established. Such credits cannot, as a rule, be deducted from specific grants recorded in previous periods; an adjustment for grants converted into credits is made at the time of agreement. All known returns to the U.S. Government stemming from grants and credits (reverse grants, returns of grants, and payments of principal) are taken into account in net grants and net credits, but no allowance is made for interest or commissions. *Other assistance* represents the transfer of U.S. farm products in exchange for foreign currencies (plus, since enactment of Public Law 87–128, currency claims from principal and interest collected on credits extended under the farm products program), *less* the Government's disbursements of the currencies as grants, credits, or for purchases. The net acquisition of currencies represents net transfers of resources to foreign countries under the agricultural programs, in addition to those classified as grants or credits.

Figures as published in *Foreign Grants and Credits by the United States Government* are not identical with figures shown for Government unilateral transfers and capital in the balance of payments, mainly because of differences in treatment of particular items by the two sets of accounts. Such items include: Contributions to the multilateral construction program of the North Atlantic Treaty Organization; Government investments in certain productive enterprises abroad; Government receipts on funded claims; and net changes in foreign currency holdings resulting from transactions other than those under the farm products program, such as by collection of principal and interest and by purchase for dollars.

The basic instrument for extending military aid to friendly nations has been the Mutual Defense Assistance Program authorized by the Congress in 1949. Prior to 1952, economic and technical aid was authorized in the Foreign Assistance Act of 1948, the 1950 Act for International Development, and other legislation which set up programs for specific countries. In 1952, these economic, technical, and military aid programs were combined under the Mutual Security Act, which in turn was followed by the Foreign Assistance Act passed in 1961. Appropriations to provide military assistance to certain countries in Southeast Asia were made in the Department of Defense Appropriation Act (rather than the Foreign Assistance Appropriation Act) beginning in 1966. Figures on activity under the Foreign Assistance Act as reported in *Foreign Grants and Credits* differ from data published by the Agency for International Development or its immediate predecessors due largely to differences in reporting, timing, and treatment of particular items.

Exports.—Export data are compiled by the Bureau of the Census primarily from Shipper's Export Declarations which are required to be filed with customs officials for shipments leaving the United States. Export data include shipments made after World War II under the Department of the Army Civilian Supply Program for 1948 and subsequent years and, in addition, U.S. exports under mutual security programs. They exclude shipments to U.S. Armed Forces for their own use.

Export values are based on the selling price (or on the cost, if not sold) of the commodity shipped and include inland freight, insurance, and other charges to the U.S. port of exportation. They exclude transportation and other costs beyond the U.S. port of exportation. The country of destination is defined as the country of ultimate destination or country where the merchandise is to be consumed, further processed, or manufactured, as known to the shipper at the time of exportation. In the event the shipper does not have definite information as to the country of ultimate destination, the shipment is credited (for statistical purposes) to the last country to which the shipper knows the merchandise will be shipped in the same form as exported.

Certain export commodity classifications were grouped for security reasons into special categories beginning with May 1949, with periodic amendments to include additional commodities or to remove commodities from the special category list. With the adoption of new security regulations, effective July 1950, publication of the country of destination and customs district detail for special category commodities and groups was discontinued. Data for such commodities are included in all total export statistics and, for 1967 through 1972, in totals for individual countries except a few for which regulations still restrict the release of such information. All annual 1973 country, continent, and area totals shown here include exports of Special Category commodities as a result of the declassification of such totals.

Through the years and continuing to date, the export statistics include estimated data for certain low-valued shipments, based upon selected samples of such shipments. In general, shipments valued $100–$499 were estimated for July 1953 through September 1969, except for January–June 1956 when shipments valued $100–$999 were estimated. For Canada, the upper value limit of the sampled shipments was increased from $499 to $1,999, effective January 1963. Effective October 1969, data are estimated for shipments valued $251–$1,999 to Canada and $251–$499 to other countries, except for January–August 1970 when the data were fully compiled. The statistics also include estimates for shipments valued under $100 prior to October 1969 and shipments valued under $251 effective October 1969, not classified by commodity. The over-$251 sampled shipments represent about 3 percent of the total value of exports, and the under-$251 shipments about 1.5 percent.

Imports.—Import data are compiled by the Bureau of the Census from import entries (various customs forms) which importers are required to file with customs officials. Import values are, in general, based on market value in the foreign country and exclude U.S. import duties, freight charges from the foreign country to the United States, and insurance. The country of origin is defined as the country in which the merchandise was grown, mined, or manufactured. If the importer does not know the country of origin, the merchandise is credited (for statistical purposes) to the country of shipment.

Imports are classified either as general imports or imports for consumption. General imports represent total arrivals of imported goods (except for in-transit shipments), that is, merchandise entered for immediate consumption ("duty free" merchandise, merchandise on which duty is paid on arrival, and merchandise entered into customs bonded manufacturing warehouses for processing and subsequent export of the main product) plus merchandise entered into customs bonded storage warehouses and into customs bonded smelting and refining warehouses. Imports for consumption are the total of entries for immediate consumption plus merchandise withdrawn from customs bonded storage warehouses for consumption, withdrawn from customs bonded smelting and refining warehouses, and transferred from customs bonded storage warehouses to customs bonded manufacturing warehouses for manufacturing and export.

The import statistics include estimated data for certain low-valued shipments. From July 1953 through June 1965, data for informal entries (generally containing items valued under $251) and various types of formal entries valued under $100, in general, were estimated, while data for formal and informal entries valued under $251 have been estimated since July 1965. The estimates, although not compiled in terms of individual commodities, are included in country and continent figures and in total import figures. The total value of the estimated low-valued shipments generally amounts to about 1 percent of the monthly or annual import total.

Area coverage.—The geographic area covered by these statistics, except as noted, is the United States customs area, which includes the 50 States, the District of Columbia, Puerto Rico, and, for 1935 through 1939, the Virgin Islands.

Historical statistics.—Tabular headnotes provide cross-references, where applicable, to *Historical Statistics of the United States, Colonial Times to 1957*. See preface.

– Represents zero. NA Not available. Z Less than $50 million. [1] Beginning 1960, excludes Cuba; 1959 total for U.S. direct investment in Cuba was $956 million (book value). [2] Private liquid claims included with short-term nonliquid claims. [3] U.S. Government liabilities are broken down into those to foreign official reserve agencies and those to others including foreign official agencies other than reserve agencies. In years for which this break is not available, all U.S. Government nonliquid liabilities are entered as being to other than foreign official reserve agencies. [4] Includes other readily marketable liabilities and nonliquid liabilities for foreign official agencies.

[5] Includes international and regional organizations other than International Monetary Fund.

[6] Includes nonliquid liabilities reported by U.S. banks and investment in debt securities of U.S. Government corporations and agencies, private corporations, and State and local Governments.

Source of tables 1309 and 1310: U.S. Bureau of Economic Analysis, *Survey of Current Business*, various monthly issues.

No. 1311. U.S. Reserve Assets and Short-Term Liabilities to Foreigners: 1960 to 1974

[**In millions of dollars.** As of end of year or month. Covers U.S. gold stock, including gold in Exchange Stabilization Fund; holdings of convertible foreign currencies by U.S. monetary authorities; and liabilities maturing in 1 year or less as reported by U.S. banks. For changes in types of liabilities and holders, see table 1312. "Foreigners" refers to international and regional organizations, foreign governments, central banks, and other official institutions, as well as banks, organizations, and individuals domiciled abroad and the foreign subsidiaries and offices of U.S. banks and commercial firms]

– Represents zero. [1] International Monetary Fund (IMF). [2] Excludes holdings of dollars by IMF derived from payments of U.S. subscription and from exchange transactions and other transactions of the IMF. (Liabilities representing "gold investment" of IMF included until Feb. 1972, when investment was terminated.) Also, excludes holdings of U.S. Treasury letters of credit and nonnegotiable, non-interest-bearing special U.S. notes by other international and regional organizations. Excludes Bank for International Settlements and European Fund; see footnote 3. [3] Represents liabilities to foreign central banks, foreign central governments and their agencies, Bank for International Settlements, and European Fund.

No. 1316. U.S. Government Foreign Grants and Credits: 1945 to 1973—Con.

[**In millions of dollars.** "P.L." means Public Law. Minus sign (−) denotes decrease. See text, pp. 775–777]

PROGRAM	Post World War II period [1]	July 1945–Dec. 1955	1956–1965	1966–1968	1969	1970	1971	1972	1973 (prel.)
Other assistance (through net accumulation of foreign currency claims)[11]	2,273	541	2,802	−263	−201	−101	−246	−213	−47
Developed countries [7]	367	190	330	−46	−17	−20	−23	−30	−17
Developing countries [7]	1,906	351	2,472	−217	−184	−80	−224	−183	−30
Currency claims acquired	16,798	813	11,498	2,503	486	451	339	345	363
Sales of farm products	14,990	813	11,170	2,142	334	287	164	75	5
Second-stage operations [12]	1,808	–	329	361	152	164	175	270	358
Less: Currencies disbursed	14,525	272	8,696	2,766	687	552	585	558	410
Economic grants and credits to purchasing country	10,940	182	6,861	2,206	464	329	375	317	207
Other uses	3,585	90	1,835	560	223	222	211	241	203

– Represents zero. Z Less than $500,000. [1] July 1, 1945, through Dec. 31, 1973. All lend-lease and conversions of prior grants to credits are from V-J Day (Sept. 2, 1945). [2] For details, see table 1317.
[3] Foreign Assistance Act of 1961 (P.L. 87–195), as amended. Also includes predecessor and related programs.
[4] Includes military assistance under Dept. of Defense Appropriation Act. 1966 (P.L. 89–394) and later acts.
[5] Beginning 1964, Defense Dept. transactions estimated. [6] Net new grants not adjusted for settlements, postwar relief and other grants under agreements, and net new credits exclude prior grants converted into credits, which were as follows: July 1945–December 1955, $2,198 million; 1956–66, $491 million; 1972, $994 million. Repayments on these settlements are included in net new credits.
[7] Developed countries include Australia, Canada, Japan, New Zealand, Republic of South Africa, all countries listed under "Western Europe" in table 1317, except Spain, Yugoslavia, and Malta and all countries listed under "Eastern Europe" in table 1317. Developing countries include all other countries listed in table 1317.
[8] Agricultural Trade Development and Assistance Act. [9] Outstanding credits on Dec. 31, 1973, totaled $33,226 million representing net credits extended since organization of Export-Import Bank, Feb. 12, 1934, less chargeoffs, and net adjustments due to exchange rates ($1,288 million), and excluding World War I debts. The amount repayable in dollars at U.S. Government option was $27,534 million; the remainder was repayable in foreign currencies, commodities, or services, at the option of the borrowers. [10] Commodity Credit Corporation Charter Act.
[11] Equivalent value of currencies still available to be used, including some funds advanced from foreign governments and after loss by exchange rate fluctuations ($1,334 million), was $938 million on Dec. 31, 1973. [12] Includes foreign currencies acquired from triangular trade operations and principal and interest collections on credits, originally extended under P.L. 83–480, which—since enactment of P.L. 87–128—are available for the same purposes as P.L. 83–480 currencies.

– Represents zero.

[1] The figures for Economic Aid shown in this table represent total U.S. Economic Aid—not just the Aid under the Foreign Assistance Act. Major componets in recent years include the Agency for International Development, Food for Peace, the Peace Corps, and paid-in subscriptions to International Financial Institutions, such as IBRD, and IDB. The cumulative totals for 1946–1973 are ture totals net of deobligation; annual figures however, are gross unadjusted program figures. The Military Aid data include Military Assistance Program (MAP) Grants, foreign military credit sales, service-funded programs, and excess defense articles. More detailed data ane a more detailed description of the data, both economic and military, are contained in the source documents listed below.

No. 1320. Foreign Aid—Commitments for Economic Assistance Under the Foreign Assistance and Predecessor Acts: 1948 to 1973

[**In millions of dollars.** For periods ending June 30. Falls under the economic portion of the Foreign Assistance Act. The economic aid data cover commitments for economic and technical assistance by the Agency for International Development and predecessor agencies. The 1948–1972 cumulative totals are on a *net* basis, representing total new obligations entered into during the entire period, adjusted for any deobligations. Data for the period 1948–1952 also are net; but data for the two periods 1953–1961, (beginning with 1955) and 1962–1972, are on a gross basis, i.e., representing total new obligations entered into, not adjusted for deobligations of prior years' funds]

– Represents zero. X Not applicable. Z Less than $500,000.

[1] For 1960, reflects declassification of special category commodities as authorized January 5, 1968; area and country totals reflect relaxation of security restrictions as authorized July 17, 1969. See footnote 8.

[2] Includes estimates for low-valued shipments from countries which could not be identified because of illegible reporting on import entries.

[3] Includes 677 unidentified countries, not shown separately.

[4] Developed countries include Canada, Western Europe, Japan, Australia, New Zealand, and Republic of South Africa; developing countries include rest of the world excluding Communist areas in Europe and Asia. Assignment of countries generally follows that made by United Nations.

[5] Finland included in Other Western Europe for 1960 and in EFTA and OECD thereafter.

[6] Excludes Special Category exports, if any, for 1960; includes Special Category exports, if any, thereafter. See footnote 8.

[7] Iceland included in Other OECD for 1960 and in EFTA thereafter.

[8] Prior to 1973, security regulations required that information on exports of Special Category Commodities be excluded from the totals for certain countries. See *Abstract* text page 777. See also the 1946–1963 and 1965 issues of *Foreign Commerce and Navigation of the United States*; Oct. 1969 and Nov. 1973 issues of Report FT 990; and Jan. 1970 issue of Report FT 410 for further explanation and list of Special Category Commodities.

No. 1326. Exports and Imports of Merchandise, by Continent, Area, and Country: 1960 to 1973—Continued

[In millions of dollars. Beginning 1965, includes uranium, thorium, and related products; beginning 1970, includes silver ore and bullion. See *Historical Statistics, Colonial Times to 1957*, series U 116–179, for selected countries]

[1] Employment in a specific industry required to produce the commodity or service in the form in which it is exported.

[2] Employment related to that part of an industry's output incorporated in all other types of exports.

[3] Covers wage and salary employees, self-employed, and unpaid family workers; excludes general Federal, State, and local government employment, and private household employment. [4] Preliminary data.

Section 31

Outlying Areas Under the Jurisdiction of the United States

This section presents summary statistics on the industrial, social, and agricultural organization of the Commonwealth of Puerto Rico, and similar data for the principal possessions of the United States (Virgin Islands, Guam, and American Samoa), the Canal Zone, and, wherever possible, the Trust Territory of the Pacific Islands.

Primary sources of these data are the decennial censuses of population, housing, and agriculture, and the quinquennial censuses of business and manufactures conducted by the Bureau of the Census; the annual *Vital Statistics of the United States* issued by the Public Health Service; the biennial *Statistics of State School Systems* published by the Office of Education; and the *Minerals Yearbook* of the Bureau of Mines.

Jurisdiction.—The circumstances under which the United States gained jurisdiction over these areas are as follows:

The islands of Puerto Rico and Guam, surrendered by Spain to the United States in October 1898, were ceded to the United States by the Treaty of Paris, ratified in 1899. Puerto Rico became a commonwealth on July 25, 1952.

The Virgin Islands were purchased by the United States from Denmark in 1917.

American Samoa was acquired by the United States in accordance with a convention among the United States, Great Britain, and Germany, ratified in February 1900.

The use, occupation, and control of the Canal Zone were granted to the United States under the terms of a treaty with the Republic of Panama, ratified in 1904.

The Trust Territory of the Pacific Islands is comprised of 2,141 atolls and islands, about 96 of which are inhabited. This territory, formerly under Japanese mandate, was placed under the United Nations trusteeship system by an agreement approved by the Security Council in April 1947, and by the United States in July 1947.

For a brief summary of the territorial development of the United States, see tables 4 and 288 in sections 1 and 6, respectively.

Censuses.—Because of differences in the population and housing characteristics and the varieties of agricultural products among the outlying areas, the presentation of census data is not uniform for all areas. However, the tables in this section give, as nearly as possible, comparable data for the areas. The 1960 Census of Population covered all of the places listed above except the Trust Territory of the Pacific Islands (the census of which was conducted in April 1958 by the Office of the High Commissioner), whereas the 1960 Census of Housing covered only Puerto Rico, Guam, and the Virgin Islands. The 1970 census of Population and Housing covered all six areas. The 1959 and 1969 censuses of agriculture covered Puerto Rico, American Samoa, Guam, and the Virgin Islands; the 1964 Census covered the same areas except American Samoa. Censuses of business and manufactures were conducted in Puerto Rico for 1954, 1958, 1963, 1967, and 1972, and in Guam and the Virgin Islands for 1958, 1963, 1967, and 1972. Preliminary data are available from the 1972 Census of Manufactures, but are not available from the censuses of business—wholesale trade, retail trade, and selected services.

For definition and explanation of terms used, see section 1, Population; section 23, Agriculture; section 27, Construction and Housing; section 28, Manufactures; and section 29, Distribution and Services.

Information in other sections.—In addition to the specialized statistics presented in this section, other data are included as integral parts of many tables showing distribution by States in various sections of the *Abstract*.

No. 1336. Estimated Population, by Areas: 1940 to 1970

Section 32

Comparative International Statistics

This section presents summary statistics on the industrial, social, and agricultural developments of the various nations and on finances of international agencies.

The principal source for the data presented in this section is the United Nations *Statistical Yearbook.* Statistics of the individual nations may be found primarily in official publications, generally in the form of yearbooks, issued by most of the nations at various intervals in their own national languages, expressed in their own or customary units of measure. For handier reference, especially for international comparisons, the Statistical Office of the United Nations compiles and issues a number of international summary publications, generally in English and French. Among these are the *Statistical Yearbook;* the *Demographic Yearbook;* the *Yearbook of International Trade Statistics;* the *Yearbook of National Accounts Statistics:* Vol. III, *International Tables, Population and Vital Statistics Reports* (quarterly); the *Monthly Bulletin of Statistics; World Energy Supplies;* and *The Growth of World Industry:* Vol. I, *General Industrial Statistics,* and Vol. II, *Commodity Production Data.*

For foreign agricultural, labor, and education statistics, the outstanding sources are publications of specialized agencies of the United Nations, such as the *Production Yearbook* issued by the Food and Agriculture Organization, the *Yearbook of Labour Statistics* issued by the International Labour Office, and the *Statistical Yearbook* issued by the Educational, Scientific, and Cultural Organization. The *International Population Statistics Reports,* series P–90 and P–91, issued by the Bureau of the Census, also present population figures for many foreign countries.

Statistical coverage and country names.—Problems of space and availability of data limit the number of countries and the extent of statistical coverage shown here. The list of countries included is based on, but not limited to, the membership rosters of the United Nations and of the larger specialized agencies of the United Nations (see table 1384). In a few instances, member countries were omitted because of an almost complete lack of data.

Country names are generally shown here as specified in the source publications cited. In two instances, the form of presentation differs from that of the source, the United Nations *Statistical Yearbook.* "China" in the *Yearbook* is identified here as the "People's Republic of China" and "China (Taiwan)" respectively, and "United Republic of Tanzania" is identified here as "Tanzania".

Economic associations.—The Organisation for European Economic Co-operation (OEEC), a regional grouping of Western European countries established in 1948 for the purpose of harmonizing national economic policies and conditions, was succeeded on September 30, 1961, by the Organisation for Economic Co-operation and Development (OECD). The OECD consists of the member nations of the former OEEC—Austria, Belgium, Denmark, France, Germany (Federal Republic), Greece, Iceland, Ireland, Italy, Luxembourg, the Netherlands, Norway, Portugal, Spain, Sweden, Switzerland, Turkey, and the United Kingdom—and also Finland, Canada, the United States, Japan, and Australia, plus Yugoslavia and New Zealand in special status categories.

The European Economic Communities (EEC), or "Common Market," consists of Belgium, France, Germany (Federal Republic), Italy, Luxembourg, the Netherlands, and, as of January 1, 1973, Denmark, Ireland, and the United Kingdom. The EEC was formed in 1958 as the European Economic Community for the purpose of promoting European economic integration. It is based on agreement among the member nations to stimulate their economic growth, primarily through the gradual elimination of trade barriers among themselves, the establishment of a common external tariff, the

coordination of monetary, fiscal, and agricultural policies, and the removal of restrictions on movement of services, labor, capital, and business enterprises within the community.

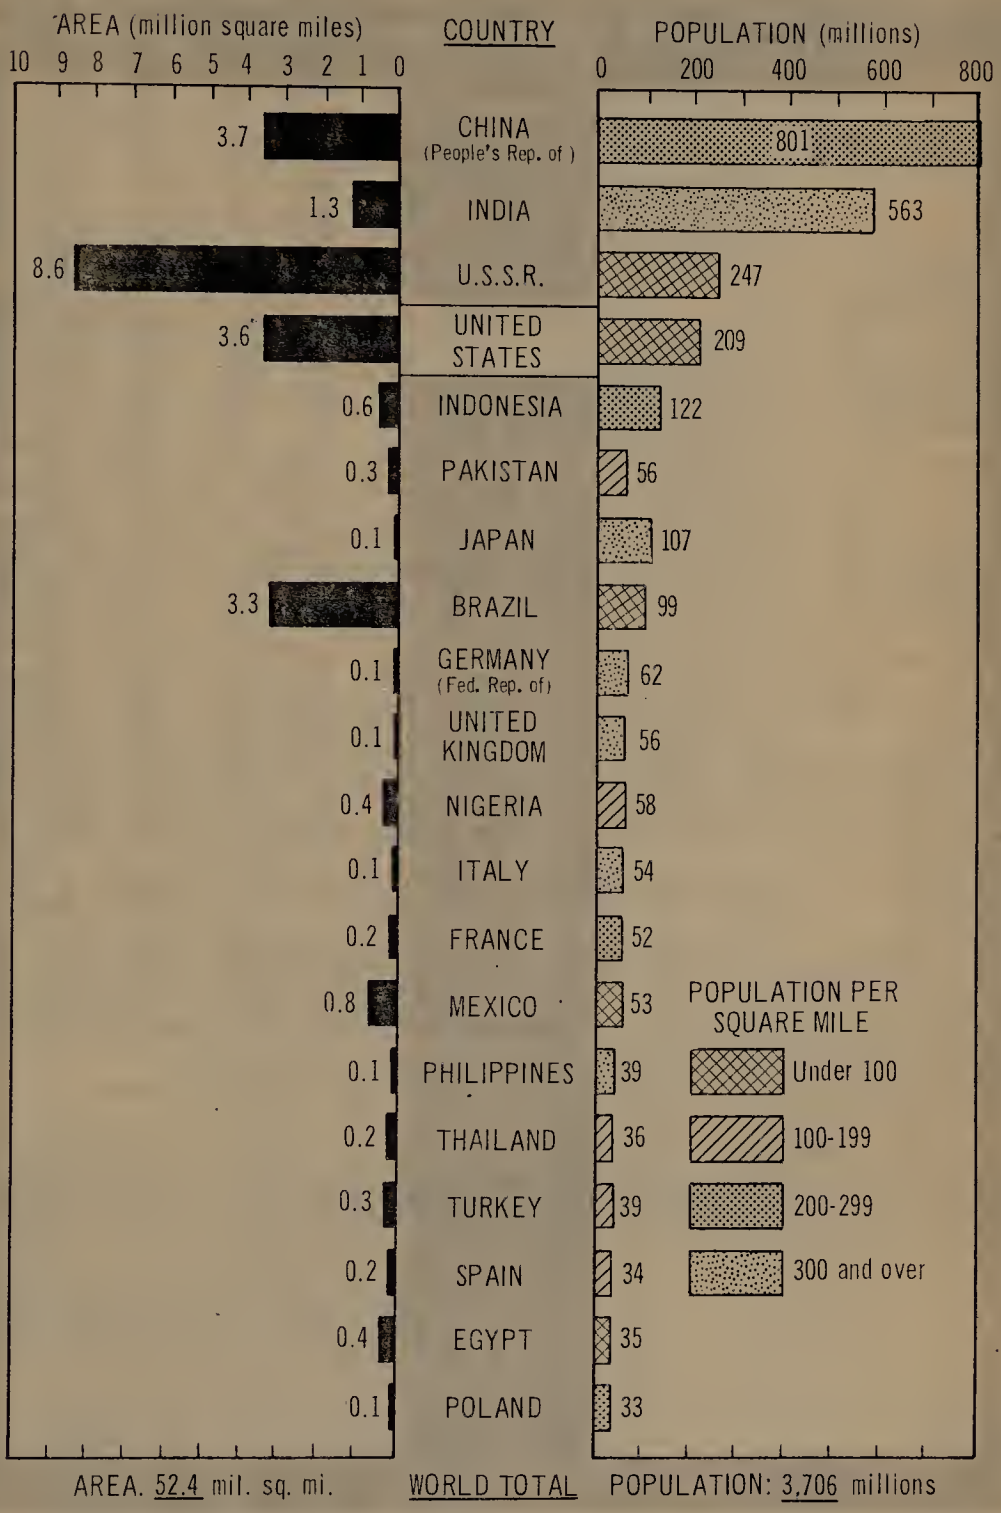
The European Free Trade Association (EFTA), established in late 1959, consists of Austria, Finland, Iceland, Norway, Portugal, Sweden, Switzerland and, prior to 1973, Denmark and the United Kingdom. It represents an agreement among the member nations to promote free trade and economic cooperation in Europe through gradual elimination of tariffs and quotas among themselves but without establishment of a common external tariff.

Quality and comparability of the data.—The quality and the comparability of the data presented here are affected by a number of factors:

(1) The year for which data are presented may not be the same for all subjects for a particular country, or for a given subject for different countries, though the data shown are the most recent available. All such variations have been noted. The data shown are for calendar years except as otherwise stated in headnotes or footnotes. Space considerations made it impracticable to present the data for a series of years except for a limited number of subjects.

(2) The bases, methods of estimating, methods of data collection, extent of coverage, precision of definition, scope of territory, and margins of error may vary for different items within a particular country, and for like items for different countries. Footnotes and headnotes to the tables give a few of the major time-period and coverage qualifications attached to the figures; considerably more detail is presented in the source publications. Many of the measures shown are, at best, merely rough indicators of magnitude.

(3) Figures shown in this section for the United States may not always agree with figures shown in the preceding sections. Disagreements may be attributable to the use of differing original sources, a difference in the definition of geographic limits (the 50 States, conterminous United States only, or the United States including certain outlying areas and possessions), or to possible adjustments made in the United States figures by the United Nations in order to improve their comparability with figures from other countries.



Conversion factors.—To facilitate comparison in terms of familiar units, some items shown in metric units in the source have been converted to U.S. equivalents by means of the abbreviated conversion factors shown below. Additional conversion factors appear, pages x and xi.

CONVERSION FACTORS

Metric units	*U.S. equivalents*
1 kilometer	0.6214 mile
1 square kilometer	0.3861 sq. mile
1 kilogram	2.2046 pounds
1 metric ton (1,000 kilograms)	1.1023 short tons
1 metric ton-kilometer	0.6849 short ton-mile
1 hectolitre	26.4172 U.S. gallons
1 cubic meter	35.3147 cubic feet

No. 1356. Population and Area, by Country

[Population data generally are present-in-area estimates for the present territory. For some countries, however, estimates include national armed forces and diplomats stationed outside the country and exclude alien armed forces, foreign diplomats, and enemy prisoners of war stationed within the country. Except as noted, area data include inland waters. See text, p. 812, for general comments concerning the data. For details of methodology, coverage, and reliability, see source]

NA Not available. X Not applicable.

[1] Includes Bermuda, Canada, Greenland, St. Pierre and Miquelon, and United States.

[2] Includes Caribbean, Temperate South, Middle, and Tropical South American countries.

[3] Excludes countries with estimated population in 1970 of 100,000 or less. [4] United Nations estimate.

[5] Excludes Indian Jungle population. [6] Excludes area of frontier rivers. [7] Population and density for 1970; change for 1963–70.

[8] Rate not computed because of lack of comparability between estimates shown for 1963 and 1972.

[9] African population only. [11] Population and density for 1971; change for 1963–71. [11] Includes East Berlin.

[12] Includes West Berlin.

[13] India (except for census data) includes and Pakistan excludes Jammu and Kashmir.

[14] Excludes West Iran (population 923,440 at 1971 census). [15] Includes Okinawa, formerly shown as Ryukyu Islands. [16] Excludes Bangladesh. [17] Estimate not revised in accord with latest census. [18] Paraguay and Papua, New Guinea share the same rank of 104. To make the lowest rank equal to the number of countries shown, the number 105 is omitted.

[19] Walvis Bay included in Namibia (area 434 square miles, population 12,648 in 1960). [20] Land area only.

No. 1357. Birth and Death Rates, by Country

[**Crude birth rate:** Number of live births per 1,000 persons. **Crude death rate:** Number of deaths per 1,000 persons; excludes stillbirths. **Infant mortality rate:** Deaths of infants under 1 year of age per 1,000 live births; exeludes stillbirths. Except as noted, rates based on complete or virtually complete registration data. For details of methodology, coverage, and quality, see United Nations *Demographic Yearbook*]

No. 1359. Housing and Health, by Country

[**Housing:** Data generally intended to refer to conventional (permanent) dwellings only. For some countries, however, data include nonpermanent structures, improvised shelters, and mobile trailers, or, as noted, refer to housing units and to household accommodation (the space occupied by a private household) rather than to dwellings. **Health:** Hospital data refer to hospitals and other medical establishments with beds but exclude old people's homes and establishments for custodial or preventive care only; personnel data refer to persons fully qualified from medical or dental schools and working within the country. See text, p. 812, for general comments concerning the data. For additional qualifications of data for individual countries, see source]

No. 1359. Housing and Health, by Country—Continued

Housing: Data generally intended to refer to conventional (permanent) dwellings only. For some countries, however, data include nonpermanent structures, improvised shelters, and mobile trailers, or, as noted, refer to housing units and to household accommodation (the space occupied by a private household) rather than to dwellings. **Health:** Hospital data refer to hospitals and other medical establishments with beds but exclude old people's homes and establishments for custodial or preventive care only; personnel data refer to persons fully qualified from medical or dental schools and working within the country. See text, p. 812, for general comments concerning the data. For additional qualifications of data for individual countries, see source]

No. 1361. Education and Book Production, by Country

[**Teachers and students:** Data cover both public and private schools for school year beginning in year stated and exclude adult education, and correspondence schools. **Expenditures:** Include both capital and current expenditures converted to U.S. dollars at par values of exchange rates then in effect. **Book production:** Covers printed nonperiodical publications made available to the public, excluding those issued for advertising purposes and those in which text is not most important part. Refers to first editions and re-editions of originals and translations. For all items, intercountry comparisons subject to caution owing to variations in definition and coverage. See text, p. 812, for general comments concerning the data. For additional qualifications for individual countries, see source]

No. 1362. Average Annual Rates of Growth of Gross Domestic Product, by Kind of Economic Activity

[**In percent.** Based on gross domestic product at constant prices. Methods used to obtain estimates of gross domestic product at constant prices and the years to which these prices relate vary widely among countries. In general, "Agriculture" includes forestry, hunting, and fishing; "Industrial activity" covers mining, manufacturing, electricity, gas, and water; and "Other" comprises financing, insurance, real estate, and business services; community, social, and personal services; and public administration and defense. Unless otherwise stated, data are calculated on the former System of National Accounts (see *Yearbook of National Accounts Statistics*, 1969)]

NA Not available.

[1] Refers to calendar year in which all or most of the harvest took place, generally 1971. All commodities index relates to food, fibers, tobacco, industrial oilseeds, rubber, tea, and coffee; food index relates to crops and livestock products for human consumption. Deduction made for feed and seed used in production process.

[2] Components of these indexes vary considerably among countries; for details, see source.

[3] Refers, in general, to salaried employees and wage earners in manufacturing. Includes workers on holiday or vacation; excludes employers, self-employed, and workers on strike, on temporary military leave, or temporarily laid off.

[4] In many instances, represents index only for principal city (or cities) of particular country.

[5] General wholesale price index numbers usually weighted by gross value of sales on wholesale markets.

[6] As of 3d quarter of 1973, except as noted. Indexes based primarily on common shares traded on leading exchange. In some cases, where an index of industrial shares is not available, a general index, including shares of companies in transportation, distribution, and finance fields, is reported.

[7] 4th quarter 1973. [8] Year beginning July 1. [9] Basic materials. [10] For 1969. [11] 2d quarter 1972. [12] Year ending June 30. [13] Includes mining and quarrying. [14] 1964=100. [15] General index. [16] Data for 1 month. [17] For 1971. [18] For 1966. [19] 1971=100. [20] Wage earners only. [21] 1st quarter 1972. [22] For 1970. [23] 1965=100. [24] 4th quarter 1971. [25] 1970=100. [26] 1968=100. [27] Civilian labor force employed. [28] July 1966–June 1967=100. [29] July 1965–June 1966=100. [30] Area of San Salvador. [31] 1967=100 [32] For 1967. [33] Guatemala City only. [34] 1966=100. [35] 1960=100. [36] Year beginning Mar. 21. For Iran, March 21, 1963–March 20, 1964=100. [37] Includes working proprietors. [38] 3d quarter 1972. [39] Excludes Okinawa. [40] 2d quarter 1973. [41] Year beginning Apr. 1. [42] Excludes Bangladesh. [43] Includes Bangladesh. [44] July 1962–June 1963=100. [45] Farm products only. [46] Includes sea fishing. [47] None or negligible quantity. [48] Averages of less than 12 months. [49] 1969=100.

NA Not available. [1] Generally, data are for a specific date in the 1960's; for Mexico and U.S.S.R., 1970. Includes unemployed. [2] Comprises utilities generating primarily for public use. Relates to production at generating centers, including station use and transmission losses. [3] Based on apparent consumption of coal, lignite, petroleum products, natural gas, and hydro and nuclear electricity. [4] Production of manufactured goods, including assembly of component parts and, except in the case of consumer goods, repair services. Excludes gas manufacture and electricity. For 1971, except as noted.

[5] Coverage varies widely. For most countries, refers, to single plants or factories with more than a specified number of employees, as noted. For additional or alternative qualifications, see source.

[6] Comprises average number of employees, working proprietors, and unpaid family workers, except as noted.

[7] Covers merchandise including silver (except current coin); excludes gold and issued paper currency. Imports generally valued c.i.f.; exports, f.o.b. Generally includes government trade (including foreign aid, war reparations, and military goods), trade of foreign concessionaires, and postal trade. See source for "general trade" or "special trade" distinctions. Roughly half the countries shown fall into each category, thus affecting comparability.

[8] Excludes trade of People's Republic of China, Mongolia, Democratic People's Republic of Korea, and Democratic People's Republic of Vietnam with one another.

[9] Excludes inter-trade between German Democratic Republic and Federal Republic of Germany.

[10] Imports and exports include Puerto Rico. [11] Net production (excluding station use).

[12] Source: 1967 Census of Manufactures. [13] Establishments with 1 or more employees.

[14] Paid employees, excluding working proprietors. [15] F.O.B.

[16] Includes foreign aid. [17] For 1964. [18] Excludes armed forces abroad.

[19] Year ending June 30. [20] Establishments with 20 or more employees.

[21] Luxembourg included with Belgium. [22] For 1968. [23] For 1969.

[24] All enterprises in socialist sector except publishing. [25] For 1970. [26] For 1963.

[27] Year ending Sept. 30. [28] Establishments with 10 or more employees.

[29] Excludes armed services. [30] For 1967. [31] For 1971. [32] Excludes armed forces and unpaid family workers. [33] Establishments with 5 or more persons engaged or gross value of production of 24,000 pesos or more.

[34] Establishments with 5 or more engaged.

[35] Establishments with 6 or more employees. [36] Establishments with 5 or more employees.

[37] Establishments with 7 or more engaged.

[38] Private establishments with 10 or more engaged and all public establishments. [39] Year ending Sept. 10.

[40] Establishments with 5 or more engaged, or equivalent in installed power equipment. [41] For 1972.

[42] Total mining and manufacturing. [43] Total mining, manufacturing, electricity, gas, and water.

[44] Establishments with 10 or more engaged. [45] Establishments with 30 or more engaged.

[46] Year beginning Apr. 1. [47] Establishments with 10 or more persons engaged using power or with 20 or more persons engaged not using power. [48] Public utility plants only. [49] Includes peat.

[50] Establishments with 3 or more engaged. [51] Enterprises with 20 or more engaged. [52] For 1965.

[53] Man-years. [54] Includes small net purchases from private plants.

[55] Establishments with 2 or more engaged.

[56] Establishments with annual value of production exceeding 12,000 cordobas. [57] Excludes Bangladesh.

[58] State enterprises under direction of central government.

[59] Includes data for Botswana, Lesotho, Namibia, and Swaziland. [60] Includes Canary Islands.

[61] Includes Canary Islands and Ceuta. [62] Registered establishments.

[63] Establishments subject to labor laws. [64] For 1966.

NA Not available.

[1] Beef and veal (incl. buffalo meat), pork (incl. bacon and ham), and mutton and lamb (incl. goat meat). Except as noted, relates to commercial and farm slaughter and excludes lard, tallow, and edible offals. [2] Beet and cane. Data generally in terms of raw sugar. [3] Excludes Alaska and Hawaii. [4] Year beginning July. [5] Includes slaughter fat. [6] Includes edible offals. [7] For 1967. [8] FAO estimate. [9] For 1971. [10] Data shown under EEC. For 1965, data shown under the individual countries: Belgium-Luxembourg; France (Metropolitan, Guadeloupe, Martinque, Reunion); Germany, Fed. Rep. of; Italy; and Netherlands. [11] For meat, production from indigenous animals only, including, where applicable, meat equivalent of exported live animals. [12] Polarization or grade unknown. [13] For 1970. [14] None or negligible quantity. [15] Commercial production. [16] Crop year. For Thailand, prior to 1968 only. [17] Inspected production. [18] Includes Okinawa. [19] Year ending Sept. For Southern Rhodesia, on farms and estates. [20] Beginning 1972, excludes Bangladesh. [21] Year beginning March 1. [22] Azores and Madeira only. [23] Slaughter weight.

[1] Source presents data in metric tons. Conversion to barrels allows for differences in specific gravity of petroleum. Figures refer to crude petroleum including shale oil, but excluding natural gasoline. [2] Excludes lignite and brown coal, except as noted. [3] Total production of crude steel, both ingots and steel for castings. Excludes wrought (puddled) iron. [4] Data represent apparent consumption (i.e., production plus imports minus exports) and do not take into account changes in stocks. [5] Data do not include steel for castings made in foundries operated by companies not producing ingots. [6] Year ending June 30. [7] Luxembourg included with Belgium. [8] Excludes alloy steels. [9] Ingots only. [10] Includes lignite. [11] Includes brown coal. [12] For 1970. [13] Year beginning March 21. [14] Includes Okinawa. [15] For 1971. [16] Svalbard: Norweigan operated mines only. [17] Excludes Bangladesh. [18] Great Britain only. Excludes production at quarries.

NA Not available. Z Less than 50,000. *Except as noted for world total and United States.

[1] Refers to production of milk (cow, sheep, goat, and buffalo) for consumption fresh or for conversion into butter, cheese, condensed milk, etc. Excludes milk sucked by, but includes milk fed to, young animals. Data include estimates of Food and Agriculture Organization.

[2] Covers malt liquors (beer, ale, stout, porter, etc.) of varying specific gravity or alcoholic strength. Excludes tax-free malt beverages of very low alcoholic content.

[3] Refers generally to iron content of marketable ores mined, including manganiferous iron ores but excluding pyrites. Some data are rough estimates obtained by applying a fixed percentage to figures for crude ore production.

[4] Covers, as far as possible, all hydraulic cements used for construction (portland, metallurgic, aluminous, natural, etc.).

[5] Covers both sea and inland fisheries, in terms of live weight. Includes shellfish; excludes whales, dolphins, etc.

[6] Excludes tire cord yarn, except as noted. [7] Refers to carded and combed (worsted) yarn.

[8] Covers the production of non-cellulosic man-made continuous filaments, excluding spun fibers and textile glass continuous strands. These filaments are best known as nylon, terylene, orlon and saran.

[9] In thousands of gallons. [10] Excludes manganiferous iron ores containing 5% or more of manganese.

[11] For 1968. [12] For 1971. [13] For 1970. [14] Excludes liquid malt. [15] Year beginning July 1.

[16] Includes tire cord yarn. [17] Including milk sucked by young animals. [18] Includes landings by domestic craft in foreign ports and excludes landings by foreign craft in domestic ports. [19] For 1969.

[20] Production in Sao Paulo only. [21] Includes yarn of man-made staple. [22] Includes both landings by domestic craft in foreign ports and by foreign craft in domestic ports. [23] Factory production only.

[24] Government production only. [25] Shipment from mines. [26] Year beginning April 1.

[27] Includes landings by foreign craft in domestic ports. [28] Data for Taiwan Province are included with China.

[29] Year ending Sept. 30. [30] Excludes landings by foreign craft in domestic ports. [31] For 1966.

[32] Year ending Sept. 10. [33] Excludes yarn made from waste. [34] Excludes both landings by domestic craft in foreign ports and by foreign craft in domestic ports. [35] Year ending July 1. [36] Year beginning March 21.

[37] Excludes landings by foreign craft in foreign ports and includes landings by foreign craft in domestic ports.

[38] Includes iron content of iron sand and pyrites. [39] Includes Okinawa. [40] Includes some carbonated drinks.

[41] For 1965. [42] Year ending in May. [43] Excludes Bangladesh. [44] Includes Bangladesh. [45] For 1967.

[46] Includes iron content of iron pyrites. [47] Production for sale only. [48] Includes Walvis Bay.

[49] Excluding milk fed to livestock. [50] Includes Ceuta, Melilla, Balearic Islands and Canary Islands.

[1] As of June 30. Represents gross registered tons (see text, p. 576) for vessels of 100 gross tons and over. Excludes vessels without mechanical means of propulsion; includes sailing vessels with auxiliary power. Excludes ships trading on Caspian Sea.

[2] In general, represents sum of net registered tonnages (see text, p. 576) of seagoing foreign and domestic merchant vessels (power and sailing) entered with cargo from a foreign port and refers to only one entrance for each foreign voyage. Except as noted, excludes vessels "in ballast," i.e., entering without unloading goods.

[3] Represents weight of all goods (including their packing) in external trade loaded to and unloaded from seagoing vessels of all flags at ports of country specified. For most countries, excludes bunkers, ships stores, ballast, and transshipment (goods transshipped from an importing vessel to an exporting vessel).

[4] Relates to domestic and international traffic on all railway lines within each country shown, excluding railways entirely within an urban unit and plantation, industrial mining, funicular and cable railways. In general, passenger miles include all passengers except military, government, and railway personnel when carried without revenue; ton-miles relate to freight net ton-miles and include all goods whether carried by fast or ordinary trains except service traffic, mail, baggage, and nonrevenue governmental stores.

[5] Covers both domestic and international scheduled services operated by companies registered in each country. Includes supplementary services occasioned by overflow traffic on regularly scheduled trips and preparatory flights for new scheduled services.

[6] Represents officially estimated number of vehicles in use. Includes passenger cars and commercial vehicles. For most countries shown, excludes 2-and 3-wheeled cycles and motorcycles, trams, trolley buses, ambulances, hearses, military vehicles, police and special purpose or government security vehicles, trailers, and farm tractors.

[7] Includes Great Lakes. [8] After time adjustment, loaded approximately same as unloaded. [9] Excludes People's Republic of China, U.S.S.R. (which became a member of ICAO on Nov. 14, 1970), and other nonmembers of International Civil Aviation Organization as of Dec. 31, 1970.

[10] Excludes People's Republic of China, Democratic Republic of Vietnam, and Democratic People's Republic of Korea.

[11] Includes Great Lakes international traffic. [12] Includes vessels in ballast. [13] For 1971.

[14] Year ending June 30. [15] For 1970. [16] All entrances counted. [17] For 1968.

[18] Includes service traffic. [19] Year ending Sept. 30. [20] Including Great Lakes and St. Lawrence international traffic. [21] Year beginning Apr. 1. [22] Includes Faeroe Islands. [23] For 1967.

[24] For 1969. [25] Year beginning March 21. [26] For 1964. [27] Excludes Bangladesh.

[28] Buses and trucks only. [29] Includes Namibia. [30] Excludes Northern Ireland.

– Represents zero. NA Not available.

[1] Comprises public and private telephones installed which can be connected to a central exchange.

[2] Items mailed for distribution within national territories. Comprises letters, postcards, printed matter, merchandise samples, small packets, and phonopost packets. Includes mail carried without charge, but excludes ordinary packages, and insured letters and boxes.

[3] Publications containing general news and appearing at least 4 times a week; may range in size from a single sheet to 50 or more pages. Circulation data include copies sold outside the country.

[4] Data cover estimated number of receivers in use, except as noted, and apply to all types of receivers for radio broadcasts to the public, including loudspeakers connected to a radio "redistribution system" but excluding television sets.

[5] Estimated number of sets in use, except as noted.

[6] Domestic and foreign, including ordinary packages as well as insured letters and boxes.

[7] English dailies only. [8] For 1970. [9] For 1968. [10] For 148 dailies only. [11] Year ending June 30.

[12] Number of licenses issued. [13] For 1971. [14] Year beginning Apr. 1. [15] 116 dailies only. [16] For 1969.

[17] Includes Faeroe Islands and Greenland. [18] For 8 dailies only.

[19] German language dailies only, but including 700 regional editions. [20] For 6 dailies only.

[21] For 10 dailies in Athens and Salonika only. [22] For 534 dailies only. [23] For 1965.

[24] For 16 dailies only. [25] Includes Okinawa. [26] For 3 dailies only. [27] Excludes Bangladesh.

[28] For 1964. [29] For 5 dailies only. [30] For 58 dailies only. [31] For 18 dailies only.

[32] For 25 dailies only.

NA Not available.

[1] Excludes gold used in payment of a country's subscriptions to International Monetary Fund or International Bank for Reconstruction and Development. Reported in U.S. dollars at $38 per ounce.

[2] Foreign exchange holdings ordinarily include foreign currencies, bank deposits abroad, payment and clearing agreement balances, and short-term foreign bills and securities (generally those with an original maturity of 1 year or less) and, in those instances where information is available, foreign investments held by official institutions. Excludes subscriptions to International Monetary Fund, drawing rights in the European Payments Union or the European Fund, undrawn portions of foreign loans, and similar rights to incur foreign debts. Holdings have been converted into U.S. dollar equivalents at par value or, in absence of a par value, at official exchange rate.

No. 1383. Foreign Exchange Rates, by Country: 1971 and 1972

[**National currency units per U.S. dollar.** As of December 31. Except as indicated, represents mid-point rates, which are averages of selling and buying rates. Selling rates are rates at which monetary authorities and authorized banks sell foreign exchange against payment in national currency. Buying rates are rates at which the authorities and banks buy foreign exchange from those obtaining it. Free market rates are rates which fluctuate in response to purchases and sales of foreign exchange by private individuals]

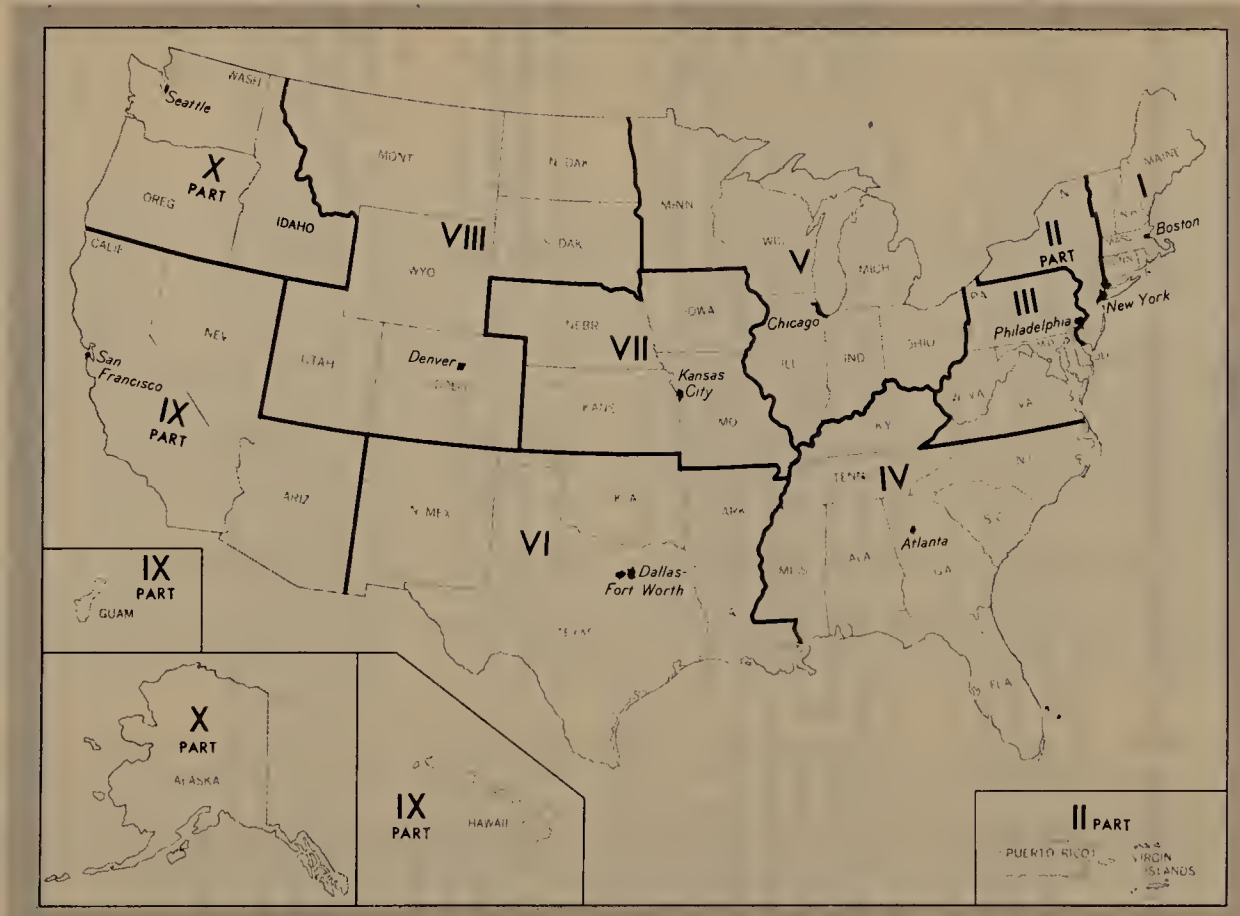
Section 33

Statistics for Federal Administrative Regions and States



This section presents statistics for the ten standard Federal administrative regions (SFAR's) and their component States as officially designated by the U.S. Office of Management and Budget (Circular No. A–46, Transmittal Memorandum No. 16, August 1972). For reader identification, the title of each region, as shown here, includes the name of the city in which the region headquarters offices are located.

In a directive issued in 1969, President Nixon instructed various Federal agencies (among them the Department of Health, Education, and Welfare, the Department of Labor, the Office of Economic Opportunity, and the Small Business Administration) to adopt a uniform field system of ten geographic regions with common boundaries and headquarters cities. The President's action was taken to correct the development over a period of many years of a fragmentation of Federal field organization structures, as each agency or component evolved along its own lines with little reference to other agency arrangements. As a result of the President's directive, most Federal domestic agencies or their components have completed realignments and relocations to conform to the SFAR's shown here.

In February 1972, President Nixon issued Executive Order 11647 establishing a Federal Regional Council for each of the SFAR's in further implementation of "the development of closer working relationships between major Federal grant making agencies and State and local governments and improved coordination of the categorical grant system."

Reprints of this section of the *Statistical Abstract* and section 34, Metropolitan Area Statistics, may be obtained under the title of "Statistics for Federal Regions, States, and Metropolitan Areas" from the Superintendent of Documents, Washington, D.C., 20402, or from any U.S. Department of Commerce District Office. The price per copy is $1.15; a 25 percent discount is allowed on orders of 100 copies or more sent to the same address.

FIG. LIV. MAP OF THE UNITED STATES AND OUTLYING AREAS, SHOWING FEDERAL ADMINISTRATIVE REGIONS

Source: U.S. Bureau of the Census.

Federal Administrative Regions and States

[As defined by the Office of Management and Budget, Region II includes Puerto Rico and Virgin Islands, and Region IX includes Guam. Totals shown here for Region II and Region IX, however, exclude these areas]

Section 34

Metropolitan Area Statistics

Statistics from various Federal Government and private sources are presented here for areas officially designated by the U.S. Office of Management and Budget (OMB) as Standard Metropolitan Statistical Areas (SMSA's). Definitions of the SMSA's in terms of their geographic components are presented in U.S. Bureau of the Budget (predecessor of OMB), *Standard Metropolitan Statistical Areas,* issued in 1967, with subsequent amendments. See also U.S. National Bureau of Standards, *Metropolitan Statistical Areas,* Federal Information Processing Standards Publication (FIPS Pub. 8–4, June 30, 1974).

Data shown here are based on the SMSA definitions as amended by OMB to April 5, 1974. On that date, there were 269 SMSA's (including 4 in Puerto Rico). Area titles, county components, and population totals for all SMSA's are shown on pages 926–931. However, in the table beginning on p. 866, data are presented only for the 157 SMSA's having 200,000 or more inhabitants in 1970, excluding San Juan, Puerto Rico. A total of 202 items is shown for each SMSA. Many of the source publications cited also present statistics for the SMSA's with less than 200,000 inhabitants.

Standard definitions of metropolitan statistical areas were first issued by the then Bureau of the Budget in 1949, under the designation "Standard Metropolitan Areas"; the present designation was adopted in 1959. The general concept of a metropolitan area is one of an integrated economic and social unit with a large population nucleus.

The criteria for the establishment and definition of SMSA's have undergone several modifications since 1949. The current criteria were adopted in November 1971; they provide that each SMSA must include at least:

(a) One city with 50,000 or more inhabitants, or

(b) A city having a population of at least 25,000 which, with the addition of the population of contiguous places, incorporated or unincorporated, having a population density of at least 1,000 persons per square mile, and which together constitute, for general social and economic purposes, a single community with a combined population of at least 50 000. provided that the county or counties in which the city and contiguous places are located has a total population of at least 75,000. (In New England, the cities and towns qualifying for inclusion in an SMSA must have a total population of at least 75,000.)

In addition to the central city or cities, the criteria provide that the SMSA include the county in which the central city is located, and adjacent counties that are determined to be metropolitan in character and economically and socially integrated with the county of the central city, according to specific rules. (In New England, as noted below, the units comprising the area are cities and towns rather than counties.) The largest city in each SMSA is designated a "central city"; in addition, there may be up to two additional central cities if certain criteria are met. With two exceptions, the title of each SMSA includes the names of its central city or cities. An SMSA may include other cities of 50,000 or more besides its central cities, and may include territory in more than one State.

Reprints of this section and section 33 of the *Statistical Abstract* may be obtained under the title of "Statistics for Federal Regions, States, and Metropolitan Areas" from the Superintendent of Documents, Washington, D.C. 20402, or from any U.S. Department of Commerce District Office. The price per copy is $1.15; a 25 percent discount is allowed on orders of 100 copies or more sent to the same address.

New England SMSA's and SEA's. Because SMSA's in New England are defined in terms of cities and towns, rather than counties, some statistical data that are available only for counties cannot be compiled for individual New England SMSA's. Therefore, data are shown for New England areas for both metropolitan State economic areas (SEA's) and SMSA's wherever possible. The SEA's are defined in terms of counties and represent approximations of the New England SMSA's in county terms.

Effect of changes in SMSA definitions. Changes in the definitions of SMSA's since 1949, have included the recognition of new areas, for example, as cities reached 50,000 population, and the addition of counties (or towns in New England) to existing SMSA's. Several formerly separate SMSA's have been merged. and occasionally territory has been transferred from one SMSA to another or (in rare instances) from an SMSA to nonmetropolitan territory. Comparisons of SMSA figures over time may be affected if the SMSA definitions underwent alteration. Where possible in this volume, in order to maintain comparability, data for an earlier period have been revised to reflect the SMSA boundaries of the more recent period. However, this could not always be done. In particular, for data based on a sample survey, it is usually not possible to reflect changes in SMSA definitions that occurred after the survey was made.

In the 3 tables that follow, data are given for SMSA's as defined for specified dates, and thereby indicate the extent of change in population and land area resulting from revisions in definitions.

Table A. Number, Population, and Land Area of SMSA's as Defined at Specified Dates: 1940 to 1970

[The differences in population shown here for each census year (in the successive columns of the table) result entirely from net expansion of metropolitan territory through changes in the SMSA definitions. The differences in population shown for each SMSA definition (on the successive lines of the table) result entirely from population changes within that territory, unaffected by changes in SMSA definitions. The changes in 1970 land area result entirely from net expansion of SMSA territory. All data include Alaska and Hawaii and exclude Puerto Rico. Subtraction of any line of the table from the line below will show the net effect of change in population and land area undergone by the SMSA's as the result of changes in definitions between the specified dates. Such changes typically occurred throughout the period, not on any single date, and may have included subtractions from, as well as additions to, SMSA territory. The area data for the 1950 and 1960 census definitions of SMSA's differ from the data published in those censuses because they are based on a remeasurement of land areas made during the 1960's, and also reflect changes in inland water area occurring up to 1970]

SMSA definition as of—	Number of SMSA's	Population				Land area (sq. mi.)
		1940	1950	1960	1970	1970
1950 census (Mar. 1952)	169	[1] 69,534,737	[2] 84,853,700	106,344,548	122,132,357	207,474
1960 census (Nov. 1960)	212	[3] 72,844,551	89,316,903	[4] 112,885,139	130,924,721	309,677
1964 (Aug. 31, 1964) [5]	217	74,869,415	91,644,188	115,876,343	134,639,374	349,557
1968 (Jan. 31, 1968) [6]	230	76,408,154	93,629,986	118,413,604	137,915,338	378,322
1970 census (Feb. 28, 1971)	243	77,154,871	94,579,008	[7] 119,593,498	[8] 139,418,811	[9] 387,601
1972 (Dec. 31, 1972)	265	78,807,814	96,702,805	122,597,097	143,241,829	412,317
1973 (Dec. 31, 1973)	264	81,964,042	100,101,102	126,501,161	148,012,561	489,834
1974 (Apr. 5, 1974)	265	82,033,517	100,187,647	126,613,710	148,131,506	491,098

[1] Corresponds to total 1940 population for 1950 SMSA's published in 1950 census (69,279,675), with addition of Honolulu SMSA and corrected by subtracting population (3,194) of Colonial Heights town erroneously included in Richmond SMSA.

[2] Corresponds to total SMSA population for 1950 published in 1950 census (84,500,680) plus Honolulu SMSA.

[3] Corresponds to total 1940 population for 1960 SMSA's published in 1960 census (72,834,468), corrected by adding population (13,277) erroneously omitted from Stamford SMSA (remainder of Stamford town), and subtracting population (3,194) of Colonial Heights town erroneously included in Richmond SMSA.

[4] Corresponds to total SMSA population for 1960 published in 1960 census (112,885,178), corrected by subtracting population (39) erroneously included in Franklin County, Ohio (Columbus SMSA).

[5] SMSA's as defined for the 1963 economic censuses. [6] SMSA's as defined for the 1967 economic censuses.

[7] Corresponds to total 1960 population for 1970 SMSA's published in 1970 census (119,594,754), corrected by subtracting 1,256 population from Lawrence-Haverhill SMSA; this represented an addition to the 1960 population of Andover town made subsequent to the original census tabulations, and therefore not reflected in State or national totals. [8] Corresponds to total SMSA population for 1970 published in 1970 census.

[9] Corresponds to total SMSA land area published in 1970 census (387,616 square miles), corrected by subtracting 15 square miles erroneously included in Roanoke SMSA.

APPENDIX I

Historical Series—Index to Tables in Which *Historical Statistics* Series Appear

[Listed below are those statistical time series (identified by number) appearing in *Historical Statistics of the United States, Colonial Times to 1957*, and its companion volume, *Historical Statistics . . . Continuation to 1962 and Revisions*, for which tables in the *Statistical Abstract* present comparable figures. Historical series are listed only where comparable data are available for one or more years later than 1957. In a few instances, it may be necessary to combine figures shown in the *Abstract* to obtain totals comparable to the series shown in *Historical Statistics*]

Appendix II

Guide to Sources of Statistics

Alphabetically arranged by subject, this guide contains references to the important primary sources of statistical information for the United States. Secondary sources have been included if the information contained in them is presented in a particularly convenient form or if primary sources are not readily available. Nonrecurrent publications presenting compilations or estimates for years later than 1964 or types of data not available in regular series are also included.

Much valuable information may also be found in State reports (see pp. 979-981) and in reports for particular commodities, industries, or similar segments of our economic and social structure, many of which are not included here.

Publications listed under each subject are divided into two main groups: "U.S. Government" and "Other." The location of the publisher of each report is given except for Federal agencies located in Washington, D.C. Most Federal publications may be purchased from the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, or from Government Printing Office bookstores in certain major cities. In some cases, Federal publications may be obtained from the issuing agency.

Major reports, such as the Census of Population, which consist of many volumes, are listed by their general, all-inclusive titles. Specific volume numbers and subtitles of the major census publications are listed on pp. 974-978.

Accidents—*see also* Health; Insurance; *and* Vital Statistics

U.S. Government

Bureau of Labor Statistics
Injury Rates by Industry. Annual.

Department of Transportation
Automobile Personal Injury Claims, Vol. I. (Automobile insurance and compensation study.) July 1970.
Economic Consequences of Automobile Accident Injuries, Vol. I. (Automobile insurance and compensation study.) April 1970.

Publications of Recent Censuses

Listed below are major reports of the most recent censuses. In most cases separate reports are available for each State, subject, industry, etc. Preliminary reports which have been issued are not included in the list.

Complete information on publications of all the censuses appears in the *Bureau of the Census Catalog*, which is published quarterly and cumulated to the annual issue. A list of data files (computer tapes and punchcards) and unpublished materials is also included, beginning with the 1964 issues. A sample copy of the *Catalog* is available from the Bureau of the Census on request. The annual subscription price is $10.90 for 4 quarterly issues and 12 monthly supplements ($2.75 additional for foreign mailing).

1972 CENSUS OF GOVERNMENTS

Vol. 1. Governmental Organization. Number of governmental units and public school systems, by States and counties. Includes data on governmental structures and characteristics.

Vol. 2. Taxable Property Values. Data on valuations set for general property taxation, including statistics by State, county, and selected cities; and results of a sample survey of real estate sales.
- Part 1—Taxable and Other Property Values.
- Part 2—Assessment–Sales Price Ratios and Tax Rates.

Vol. 3. Public Employment.
- No. 1. Employment of Major Local Governments.
- No. 2. Compendium of Public Employment.
- No. 3. Management-Labor Relations in State and Local Governments.

Vol. 4. Governmental Finances.
- No. 1. Finances of School Districts.
- No. 2. Finances of Special Districts.
- No. 3. Finances of County Governments.
- No. 4. Finances of Municipalities and Township Governments.
- No. 5. Compendium of Government Finances. A comprehensive summary of Federal, State, and local governmental finances.

Vol. 5. Local Government in Metropolitan Areas. Data on local governments, employment, and finances.

Vol. 6. Topical Studies.
- No. 1. Employee-Retirement Systems of State and Local Governments.
- No. 2. State Reports on State and Local Government Finances.
- No. 3. State Payments to Local Governments.
- No. 4. Historical Statistics on Governmental Finances and Employment.
- No. 5. Graphic Summary of the 1972 Census of Governments.

Vol. 7. State Reports. 52 reports; 1 for each State, the District of Columbia, and Puerto Rico. Data on governmental structure, employment, and finances.

Vol. 8. Guide to 1972 Census of Governments.

1972 CENSUS OF TRANSPORTATION

TC72-N1 to N3. National Travel Survey. Data presented on seasonal and summary basis for 1972. Trips, person-trips, person-nights, person-miles, and accommodations used, by such travel characteristics as means of transport, purpose, duration, origin, destination, distance of trip, size of party, vacation, and weekend, and by such socioeconomic characteristics as family income level, residence, occupation and education.

TC72-T1 to T52. Truck Inventory and Use Survey. Data presented for each of the 50 States, the District of Columbia, and the United States. Data cover the characteristics and uses of private and commercial truck resources; number of vehicles and such characteristics as major use, body type, vehicle-size class, year model, type of fuel, range of operation, vehicle type and axle arrangement, acquisition, and cab type.

TC72-C1 to C51. Commodity Transportation Survey. Data on shipments of commodities by manufacturers. One report for the United States as a whole on flow of commodities at

various transportation commodity classification (TCC) levels showing tons and ton-miles of shipments by means of transport, length of haul, weight of shipment, origin, and destination; and a series of geographic reports on flow of commodities from manufacturing plants located in each of 27 production areas (each area consists of one or a cluster of standard metropolitan statistical areas) and selected States. Data on tons and ton-miles of commodities shipped by means of transport, length of haul, and areas of destination of shipments.

1970 CENSUS OF POPULATION

Vol. 1. Characteristics of Population. Separate reports for the United States, each State, the District of Columbia, Puerto Rico, Guam, Virgin Islands, American Samoa, Canal Zone, and Trust Territory of the Pacific. Each report issued first as four separate paper-bound chapters, then assembled and issued in hard-cover:

Number of Inhabitants, Series PC(1)-A. Population counts for States, counties, SMSA's, urbanized areas, county subdivisions, all incorporated places, and unincorporated places of 1,000 inhabitants or more.

General Population Characteristics, Series PC(1)-B. Statistics on age, sex, race, marital status, and relationship to head of household for States, counties, SMSA's, urbanized areas, county subdivisions, and places of 1,000 or more inhabitants.

General Social and Economic Characteristics, Series PC(1)-C. Sample population data presented for the following areas: States, counties, SMSA's, urbanized areas, and places of 2,500 or more inhabitants.

Detailed Characteristics, Series PC(1)-D. Sample population data cross-classified by age, race, etc., and presented for some or all of the following areas: States, SMSA's, and large cities.

Vol. II. Subject Reports. Detailed information and cross-relationships for the United States, regions, and some States and SMSA's on such subjects as national origin and race, fertility, families, marital status, migration, education, disability, employment, occupation, industry, journey to work, and income.

Census Tract Reports. Series PHC(1). Population and housing data by census tract for each SMSA.

General Demographic Trends for Metropolitan Areas, 1960-1970, Series PHC(2). Comparative 1960 and 1970 data on population and housing subjects presented for the State and for SMSA's and their central cities and constituent counties.

1970 CENSUS OF HOUSING

General Housing Characteristics, Series HC(V1) (Advance reports). One report for each State, the District of Columbia, and the United States. Selected data for States, standard metropolitan statistical areas (SMSA's), counties, and places of 10,000 or more inhabitants.

Vol. 1. Housing Characteristics for States, Cities, and Counties. Separate reports for the United States, each State, the District of Columbia, Puerto Rico, and each outlying area. Each report issued first as two separate paper-bound chapters, then assembled and issued in hard-cover:

General Housing Characteristics for States, Cities, and Counties, Series HC(1)-A. Data for States, counties, SMSA's, urbanized areas, and places of 1,000 or more inhabitants.

Detailed Housing Characteristics for States, Cities, and Counties, Series HC(1)-B. Sample data for some or all of the following areas: States, counties, SMSA's, urbanized areas, and places of 2,500 or more inhabitants.

Vol. II. Metropolitan Housing Characteristics, Series HC(2). Detailed and cross-classified data. One report for each SMSA and a national summary report.

Vol. III. Block Statistics, Series HC(3). One report for each urbanized area showing data for individual blocks on selected housing and population subjects. Also includes reports for certain communities outside urbanized areas.

Vol. IV. Components of Inventory Change, Series HC(4). A report for the United States and each of 15 SMSA's based on a sample survey covering such components of change as new construction, conversion, merger, and demolition.

Vol. V. Residential Finance, Series HC(5). A report for the United States, by region, based on a sample survey. Data on financing and characteristics of homeowner properties and rental and vacant properties.

Vol. VI. Plumbing Facilities and Estimates of Dilapidated Housing. Series HC(6). A report for the United States presenting data on substandard housing units for States, counties, and cities, based on the number of units lacking plumbing facilities combined with estimates of units with all plumbing facilities but in dilapidated condition.

Vol. VII. Subject Reports, Series. HC(7). Each of the nine reports in this volume concentrates on a particular subject. Detailed information and cross-classifications are generally provided on a national and regional level; in some reports, data for States or SMSA's may also be shown. Some of the subjects covered are housing of minority groups and senior citizens, households in mobile homes, and housing characteristics by household composition.

1969 CENSUS OF AGRICULTURE

Vol. I. Area Reports. A separate report for each State, Puerto Rico, Guam, the Virgin Islands, American Samoa, and the Trust Territory of the Pacific Islands, presenting data for the area and its subdivisions. The State reports include separate data for all farms and for farms with sales of $2,500 or more.

Vol. II. U.S. Summary. Statistics by subject presented in separate chapters with totals for the United States, regions, geographic divisions, and States. Data for all farms and for farms with sales of $2,500 or more. The subject matter chapters will be issued as individual reports as follows:

Introduction
1. General Farm Information; Procedures for Collection, Processing, Classification
2. Farms: Number, Use of Land, Size of Farm
3. Farm Management, Farm Operators
4. Equipment, Labor, Expenditures, Chemicals
5. Livestock, Poultry, Livestock and Poultry Products
6. Crops, Nursery and Greenhouse Products, Forest Products
7. Value of Products, Economic Class, Contracts
8. Type of Farm
9. Irrigation and Drainage on Farms

Vol. III. Agricultural Services. Data by State and county and for the United States relating to the growing field of agricultural services.

Vol. IV. Irrigation. Data for drainage basins in the United States. Includes data on land irrigated, production of crops on irrigated land, number of establishments, water conveyed, users served, water obtained by source, and type of organization.

Vol. V. Special Reports.
Parts 1-9. Type-of-Farm Operations. One report for each major type-of-farm classification, presenting 1971 data for selected counties, States, and the United States.
Part 10. Horticultural Specialties. Data for 1970 for counties, States, and the United States.
Part 11. Farm Finance. Financial data for States and the United States.
Part 12. Ranking Agricultural Counties. The top ranking counties in descending order of importance for various agricultural characteristics and items of production, with comparable data and rank for 1964.
Part 15. Graphic Summary. Computer generated dot-maps and pattern-maps depicting many characteristics of United States agriculture in 1969.
(Parts 13, 14, and 16 relate to forms, procedures, and coverage of the 1969 Census of Agriculture.)

Vol. VI. Drainage of Agricultural Lands. Data from the 1969 Census of Agriculture for individual farms with sales of $2,500 and over, presented for States and counties; and selected data from the 1972 Census of Governments on project area, revenue and expenditure, debt and employment for drainage districts and counties.

1967 CENSUS OF BUSINESS

Vol. I. Retail Trade—Subject Reports. Data by kind of business on sales and employment size of establishment, single units and multiunits for the United States, States, and standard metropolitan statistical areas (SMSA's).

Vol. II. Retail Trade—Area Statistics. For each State, the District of Columbia, the Virgin Islands, Guam, and the United States. Data by kind of business on number of establishments, sales, payroll, employment, and number of proprietors of unincorporated businesses, for the States, SMSA's, counties, and cities.

Vol. III. Wholesale Trade—Subject Reports. Sales size, employment size, and single units and

multiunits; credit sales, receivables, and bad debt losses; sales by customer classes; petroleum bulk stations and terminals, value added, capital expenditures, fixed assets, and rental payments of merchant wholesalers; merchandise inventories, manufacturers' sales branches, and sales offices employment; voluntary group grocery wholesalers, central administrative offices and auxiliaries, type of operation, merchant wholesalers; and public warehousing.

Vol. IV. Wholesale Trade—Area Statistics. For each State, the District of Columbia, the Virgin Islands, Guam, and the United States. Data by kind of business and type of operation on number of establishments, sales, payroll, employment, inventories, and number of proprietors of unincorporated businesses for total wholesale trade; and number of establishments and sales for merchant wholesalers and all other wholesale types combined. For the State, SMSA's, counties, and cities.

Vol. V. Selected Services—Area Statistics. For each State, the District of Columbia, the Virgin Islands, Guam, and the United States. Data by kind of business on number of establishments, receipts, payroll, employment, and number of proprietors of unincorporated businesses in personal, business, and repair services, selected amusement and recreation services, and hotels, motels, and tourist courts for the State, SMSA's, counties, and cities.

BC67-MRC. 49 Major Retail Center reports by State. Data on number of establishments, sales, payroll, and employment for detailed kinds of retail business and for central business districts in cities with 100,000 inhabitants or more. For major retail centers in each SMSA, number of establishments by detailed kinds of retail businesses and sales data for 3 groupings (shopping goods stores, convenience goods stores, and all other retail stores).

BC67-MLS. 52 Retail Merchandise Line Sales reports. For each State, the District of Columbia, and the United States. Data on number and sales of establishments in a specified kind of business and number and sales by 25 broad merchandise lines. For the United States, geographic divisions, States, SMSA's, and nonmetropolitan areas.

BC67-RS-5. Retail Trade, Miscellaneous Subjects. Data on eating and drinking places; drug stores; vending machine operators; gasoline, other automotive fuels, and LP gas; leased departments in department stores; legal form of organization; and central administrative offices and auxiliaries.

BC67-WS8. Wholesale Trade, Miscellaneous Subjects. Data on merchandise inventories, manufacturers' sales branches and sales offices, merchant wholesalers, type of operation, voluntary group grocery wholesalers, legal form of organization, and central administrative offices and auxiliaries.

BC67-SS. Selected Services, Subject Reports. A series of separate reports providing special data on many service industries, including laundry and dry cleaning; hotels and motels; motion pictures; travel agencies; law firms; and architectural and engineering firms.

BC67-SS8. Selected Services, Miscellaneous Subjects. Data on advertising agencies; commercial research, development, and testing laboratories; automobile and truck rental and leasing without drivers; automobile repair; tire retreading, bowling, photographic studios, credit and collection agencies; commercial spectator sports; dental laboratories, truck and bus carriers, legal form of organization, and central administrative offices and auxiliaries.

BC67(S)SS1. Selected Services, Special Report, Establishment and Firm Size. Data on receipts, payroll, and employment by kind of business for the United States based on receipts size of establishments, employment size of establishments, and number of establishments operated by the same firm (single units and multiunits).

BC67-PR. Data by kind of business for Puerto Rico, SMSA's, municipios, business districts, and major retail centers.

Vol. I. Construction Industry—Industry Statistics and Special Reports. Data by kind of business on number of construction establishments, proprietors and working partners; receipts; employment; payrolls; payments to subcontractors; payments for materials; rental of equipment; and capital expenditures.

Vol. II. Construction Industry—Area Statistics. For each State, the District of Columbia, and the United States. Limited data for all establishments and detailed data for establishments with payroll.

CC67-PR. Data for construction establishments with payroll for Puerto Rico, SMSA's, regions, and selected municipios.

CC67-S. 2 special reports. Data for construction establishments with and without payroll, by legal form of organization, for industries and industry groups; and, for construction establishments with payroll, by industry and by specialization in primary types of construction.

1967 CENSUS OF COMMERCIAL FISHERIES

FC67-1. Census of Commercial Fisheries. Data on number of operators, employment, payroll, operating cost, and receipts, by major type of catch and by regions and selected States. Data also shown for monthly employment, value of catch, and characteristics of vessels operated.

1967 CENSUS OF MANUFACTURES

Vol. I. Summary and Subject Statistics, Series MC67(1). In addition to a general summary, presents data on size of establishments, type of organization, manufacturers' inventories, capital expenditures, materials consumed, and water use in manufacturing. Also includes data on manufacturing activity in Government establishments.

Vol. II. Industry Statistics, Series MC67(2). Data for 422 manufacturing industries on quantity and value of products shipped and materials consumed; cost of fuels and electric energy; capital expenditures; inventories; employment; payrolls; man-hours; value added by manufacture; number of establishments; and number of companies. Data for the United States, geographic regions and States, employment-size class of establishment, and degree of primary product specialization. Separate summary chapters are also shown for each of the 20 major industry groups.

Vol. III. Area Statistics, Series MC67(3). A separate chapter for each State and the District of Columbia presenting general statistics (number of establishments, employment, payrolls, value added by manufacture, and capital expenditures) for each State and selected standard metropolitan statistical areas and counties, by industry groups and important individual industries. Totals for all manufacturing are shown for all counties and for cities with 450 or more employees.

MC67(S)-2.1, 2.2, and 2.3. Concentration Ratios. Information on the share of industrial activity accounted for by the 50, 100, 150, and 200 largest companies for the United States and for each manufacturing industry. Also shows the value of shipments of approximately 1,200 classes of products and the proportion accounted for by the 4, 8, 20, and 50 largest companies manufacturing each class of product.

1967 CENSUS OF MINERAL INDUSTRIES

MIC67(1)-1 to 5. Subject reports. Data on size of establishments, employment, type of operation, capital expenditures, and water use in mineral industries.

MIC67(1)-10A to 14E. 14 Industry reports. Data for 53 mineral industries and 10 subindustries on quantity and value of products shipped and supplies used, quantity and cost of fuels and electric energy, capital expenditures, employment, payrolls, man-hours, cost of contract work, cost of purchased machinery, value added in mining, number of establishments, and number of companies. Detailed data shown by geographic region and State and by type of operation.

MIC67(2)-1 to 49. 49 Area reports. A separate report for each State, (Delaware, Maryland, and District of Columbia combined in a single binding). Data shown for each of 50 mining industries for industry groups by type of operation and county, and for number of establishments by size and county. Data also shown for value of shipments, value added by mining, employment, payrolls, man-hours, capital expenditures, cost of supplies, and purchased machinery installed.

Guide to State Statistical Abstracts

This bibliography includes the most recent State statistical abstracts (including one for Puerto Rico) published since 1965 plus those that will be issued in late 1974 or early 1975. When a statistical abstract does not exist for a particular State, a near equivalent has been listed wherever possible. All sources contain, under one cover, statistical tables on a variety of subjects for the State as a whole, its component parts, or both. The page counts given for publications cited as "In process" are approximate.

Alabama
University of Alabama, University, Center for Business and Economic Research (formerly Bureau of Business Research)
Economic Abstract of Alabama. 1972. 200 pp. *Supplement to Economic Abstract of Alabama, 1972*. 1974. 68 pp.

Alaska
Department of Economic Development, Juneau, Division of Economic Enterprise
Alaska Statistical Review, 1972. 1972. 198 pp.

Arizona
Valley National Bank, Phoenix
Arizona Statistical Review. 30th ed. 1974.

Arkansas
Arkansas Almanac, Incorporated, Little Rock
Arkansas Almanac, 1975. 14th ed. 1974. 250 pp.

California
Department of Finance, Sacramento Budget Division
California Statistical Abstract. 1974. 150 pp. (To be released in Nov. 1974.)

Colorado
Management Services Office, Denver, Department of Administration
Colorado Year Book, 1962-1964. 26th ed. 1965. 1072 pp.

Connecticut
Connecticut Department of Commerce, Hartford, Research and Information Division
Connecticut Market Data. 1974-75. 108 pp.

Delaware
Delaware State Planning Office, Dover
Statistical Abstract for the State of Delaware. 1974.

Florida
University of Florida, Gainesville, Bureau of Economic and Business Research
Florida Statistical Abstract, 1974. 8th ed. 1974.

Georgia
University of Georgia, Athens, Division of Research, College of Business Administration
Georgia Statistical Abstract, 1974. 1974. 400 pp. (In process.)

Hawaii
Department of Planning and Economic Development, Honolulu
The State of Hawaii Data Book 1974: A Statistical Abstract. 8th ed. 1974. 300 pp.

Idaho
University of Idaho, Moscow, Bureau of Business and Economic Research
Idaho Statistical Abstract. 1971. 298 pp.

Illinois
Department of Business and Economic Development, Springfield
Illinois State and Regional Economic Data Book–1973. 1973. 245 pp.

Indiana
Indiana Department of Commerce, Indianapolis, Economic Research Section
Indiana Fact Book. 1974. 300 pp.

Iowa
Iowa Development Commission, Des Moines, Research Division
1974 Statistical Profile of Iowa. 116 pp.

Kansas
University of Kansas, Lawrence, Institute for Social and Environmental Studies
Kansas Statistical Abstract, 1973. 9th ed. 1974. 281 pp.

Kentucky
Department of Commerce, Frankfort
Deskbook of Kentucky Economic Statistics. 11th ed. 1974. 55 pp.

Louisiana
University of New Orleans, New Orleans, Division of Business and Economic Research
Statistical Abstract of Louisiana. 5th ed. 1974.

Maine
Department of Commerce and Industry, Augusta
Maine Economic Data Book 1973. 5th ed. 1973. 250 pp.

Maryland
Department of Economic and Community Development, Annapolis
Maryland Statistical Abstract. 1973.

Massachusetts
Department of Commerce and Development, Boston
Fact Book. 1974. unp. (Limited distribution.)

Michigan
Michigan State University, East Lansing, Graduate School of Business Administration, Division of Research
Michigan Statistical Abstract. 10th ed. 1974. 705 pp.

Minnesota
Minnesota State Planning Agency, Saint Paul, Office of Local and Urban Affairs
Minnesota State Statistical Abstract. 1973.

Mississippi
Mississippi State University, State College, College of Business and Industry, Division of Research
Mississippi Statistical Abstract. 1973.

Missouri
University of Missouri, Columbia, Extension Division
Data for Missouri Counties. 1970. (Loose leaf; updated periodically.)

Montana
Montana State Division of Research and Information Systems, Helena
Montana Data Book. 1970. 262 pp. (Loose leaf; to be updated periodically.)

Nebraska
Department of Economic Development, Lincoln, Division of Research
Nebraska Statistical Handbook. 1974-1975. 288 pp.

Nevada
Department of Economic Development, Carson City
Nevada Community Profiles. 1970.

New Jersey
Office of Business Economics, Trenton
Economic Facts Book. 1974.

New Mexico
University of New Mexico, Albuquerque, Bureau of Business Research
New Mexico Statistical Abstract. Vol. 2. 1972. 100 pp.

New York
Division of Budget, Albany, Office of Statistical Coordination
New York State Statistical Yearbook. 7th ed. 1974. 276 pp.

North Carolina
Department of Administration, Raleigh, Office of the State Budget, in cooperation with Association for Coordinating Interagency Statistics
North Carolina State Government Statistical Abstract. 1973.

North Dakota
Business and Industrial Development Department, Bismarck
North Dakota Growth Indicators. 10th ed. 1973. 64 pp.

Ohio
Department of Economic and Community Development, Columbus, Human Resource Development Division
Statistical Abstract of Ohio: 1969. 2d ed. 1969. 409 pp.

Oklahoma
University of Oklahoma, Norman, Center for Economic and Management Research
Statistical Abstract of Oklahoma, 1974. 1974.

Oregon
University of Oregon, Eugene, Bureau of Business Research
Oregon Economic Statistics, 1974. 1974. 100 pp.

Pennsylvania
Department of Commerce, Harrisburg, Bureau of Statistics, Research and Planning
Pennsylvania Statistical Abstract, 1974. 16th ed. 1974. 375 pp.

Rhode Island
Department of Economic Development, Providence
Rhode Island Basic Economic Statistics. 1974-1975. 200 pp. (In process.)

South Carolina
Budget and Control Board, Columbia, Division of Research and Statistical Services
South Carolina Statistical Abstract: 1974. 1974. 170 pp.

South Dakota

University of South Dakota, Vermillion, Business Research Bureau

South Dakota Economic and Business Abstract, 1972. 1972. 300 pp.

Tennessee

University of Tennessee, Knoxville, Center for Business and Economic Research

Tennessee Statistical Abstract, 1974. 3d ed. 1974. 706 pp.

Tennessee Pocket Data Book, 1974. 2d ed. 1974. 182 pp.

Texas

Dallas Morning News, Dallas

Texas Almanac, 1974-1975. 1973. 704 pp.

Utah

University of Utah, Salt Lake City, Bureau of Economic and Business Research

1973 Statistical Abstract of Utah. 1973.

Utah Foundation, Salt Lake City

Statistical Review of Government in Utah. 1974. 112 pp. (Issued in Feb. of each year.

Vermont

Department of Budget and Management, Montpelier

Vermont Facts and Figures, 1974. 3d ed. 1974. 403 pp.

Virginia

University of Virginia, Charlottesville, Thomas Jefferson Center for Political Economy

Statistical Abstract of Virginia. Vol. 1, 1966, 313 pp.; Vol. II, 1970, 524 pp.

Washington

Washington State Office of Program Planning and Fiscal Management, Olympia

State of Washington Pocket Data Book 1973. 299 pp.

Washington State Research Council, Olympia

The Research Council's Handbook. 4th ed. 1973. 650 pp. (With annual supplements.)

West Virginia

West Virginia Research League, Inc. Charleston

The 1973 Statistical Handbook. 1973. 53 pp.

Wisconsin

Department of Administration, Madison, Bureau of Planning and Budget, Informational Systems Unit

Wisconsin Statistical Abstract. 3d ed. 1974. 215 pp.

Wyoming

University of Wyoming, Laramie, Division of Business and Economic Research

Wyoming Data Book. 1972.

Puerto Rico

Planning Board, San Juan, Bureau of Statistics

Statistical Yearbook 1972. 200 pp. (In process.)

STATISTICAL ABSTRACT SUPPLEMENTS

Pocket Data Book, USA 1973. Graphic and tabular presentation of summary statistics on a wide variety of subjects. Designed for quick and easy reference. 352 pages. Issued 1973. Price $2.80. (Paperbound).

County and City Data Book, 1972. Statistical data for each county in the United States, 343 standard metropolitan statistical areas, and 840 incorporated cities having 25,000 inhabitants or more in 1970. Information also for urbanized areas, unincorporated places, regions, and States. Based largely on 1967 censuses of business, governments, manufactures, and mineral industries, 1969 census of agriculture, and 1970 censuses of population and housing. 1,076 pages.

Congressional District Data Book, 93d Congress. Population and housing data from the 1970 census and vote cast in congressional and presidential elections, 1964–1970. Issued 1973. Price $12.70. Separate reports for States also available as *Congressional District Data* (Districts of the 93d Congress). Content identical to *Congressional District Data Book.* Issued 1971–1972.

Historical Statistics of the United States, Colonial Times to 1957. More than 8,000 series, largely annual, on social and economic development from 1610 to 1957. 801 pages. Issued 1960. (Out of print).

Historical Statistics of the United States, Colonial Times to 1957; Continuation to 1962 and Revisions. Carries forward to 1962 the more than 6,000 series in the basic volume that are still current; includes related series and revisions and corrections. 158 pages. Issued 1965. (Out of print).

Directory of Non-Federal Statistics for States and Local Areas: 1969. A finding guide to sources of statistics issued by State agencies, colleges and universities, and private organizations. Specific sources shown for each State, the District of Columbia, Puerto Rico, Guam, and Virgin Islands. 686 pages. Issued 1970. Price $6.25 (paperbound).

Directory of Federal Statistics for States: 1967. A finding guide to sources of Federal statistics available at the State level. shown for hundreds of items. 380 pages. ıt of print).

ate reports of *Congressional District Data* of the Census, Washington, D.C. 20233; Superintendent of Documents, U.S. Govern- e, Washington, D.C. 20402.
